MOTIVATION

Assets are long-term investments that support business operations for many years. Sound asset management enables companies to support their long-term planning and strategies.

This case study looks at the lifecycle of an asset. From the creation of an asset, through procurement and depreciation, to disposal. Asset values are continuously monitored and compared.

PREREQUISITES

Before you work on the case study, you should familiarize yourself with navigation in the SAP system.

To carry out this FI case study successfully, it is not necessary to have worked through the FI exercises or other case studies. However, it is recommended.

NOTES

This case study uses the model company Global Bike, which was developed exclusively for SAP UA Curricula.

SAP University Alliances

Process Overview

Learning Objective Understand and execute an asset accounting process (AA). **Time** 70 Min.

Scenario To handle an Asset Accounting process, you will take on various roles within Global Bike. Thereby you will work in the departments Finance (FI) and Materials Management (MM).

Employees involved
Silvia Cassano (AP Accountant)
Daniel Coronado (Asset Accountant)
Shuyuan Chen (Head of Accounting)
Aura Maxwell (Purchasing Agent)
Tatiana Karsova (Goods Receipt Clerk)

In order to correctly post an asset acquisition and separate it from other costs, a separate cost center is defined in advance. In the role of the asset accountant, you then create a new asset. This is used to purchase new laptops and associated software licenses to increase productivity in the service department.

Materials Management takes care of procurement, orders several laptops and posts the goods receipt.

Subsequently, the value of the new equipment and associated depreciation can be viewed in the asset accounting overview. However, when the supplier invoice is paid, unexpected costs are incurred that affect the asset value. Finally, the asset is sold because it did not meet the requirements.

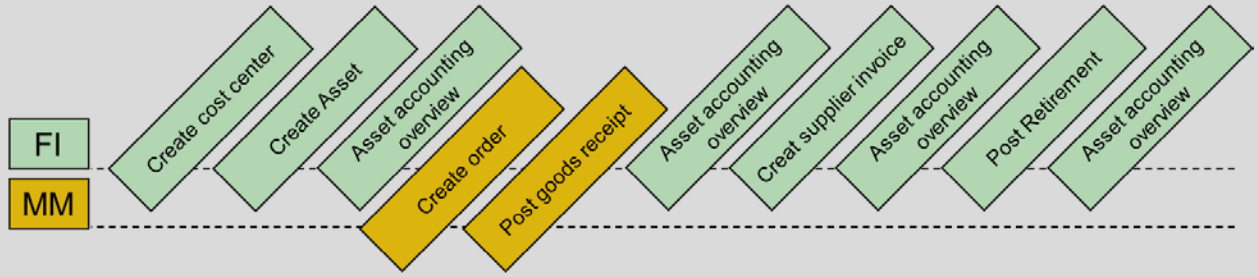

Table of Contents

Process Overview 2
Step 1: Create Cost Center 4
Step 2: Create Asset 6
Step 3: Asset Accounting Overview 8
Step 4: Create Order 11
Step 5: Post Goods Receipt 14
Step 6: Asset Accounting Overview 16
Step 7: Create Supplier Invoice 19
Step 8: Asset Accounting Overview 23
Step 9: Post Retirement 26
Step 10: Asset Accounting Overview 31

Step 1: Create Cost Center

Task Create a cost center for asset procurement in the Fiori Launchpad. **Time** 5 Min.

Short Description The *cost center* represents an organizational unit within a controlling area and specifies a clearly delimitable location where costs are incurred. This delimitation can take place according to functional, accounting or spatial aspects as well as according to cost responsibility. In order to correctly allocate asset procurement, a separate cost center is created.

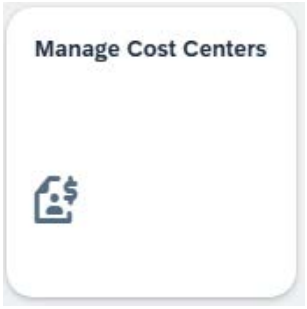

Name (Position) Shuyuan Chen (Head of Accounting)

Note

Note If you have already created the cost center for asset procurement in the Financial Accounting - Investment Management (FI-IM) case study, you can skip this step.

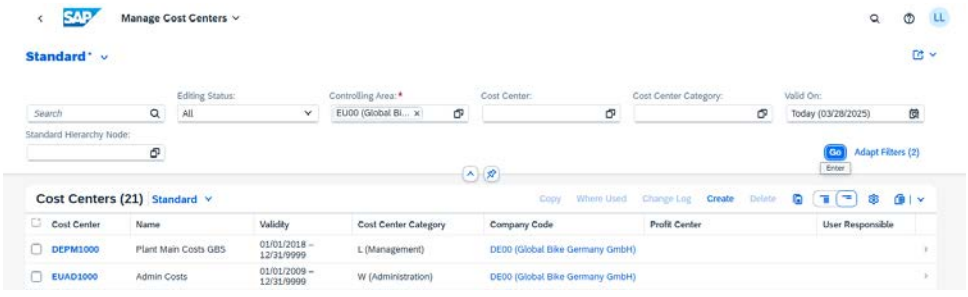

Start

To create a new cost center, use the *Manage Cost Centers* app in the *Financial Accounting* area on the *Investment and Asset Management* page in the Head of Accounting role.

EU00

In the *Manage Cost Centers* window, enter **EU00** in the *Controlling Area* field. Click on Go.

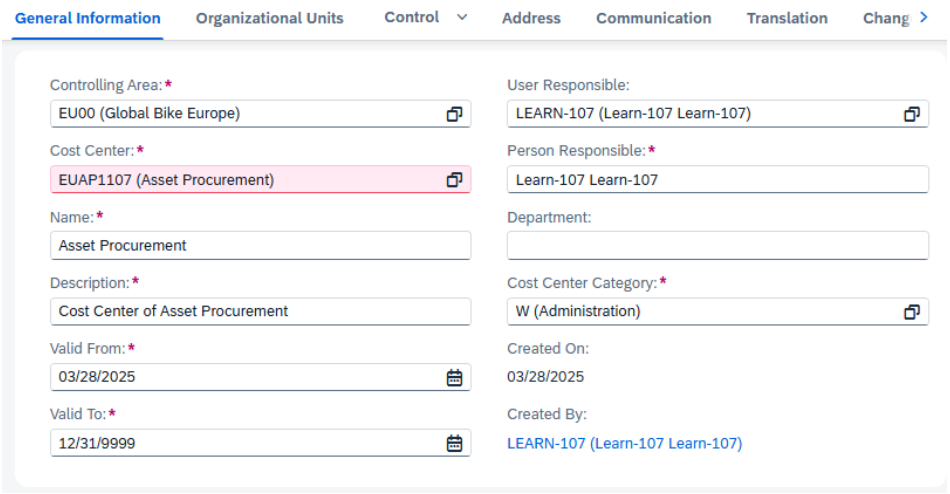

You see all available cost centers in controlling area EU00. There is no cost center yet for the acquisition of assets. To create a new cost center, click on Create.

EU00
EUAP1###

Enter **EU00** in the *Controlling Area* field and **EUAP1###** (AP = Asset Procurement) in the *Cost Center* field. Remember to insert for ### your three-digit number that you have been given by your instructor.

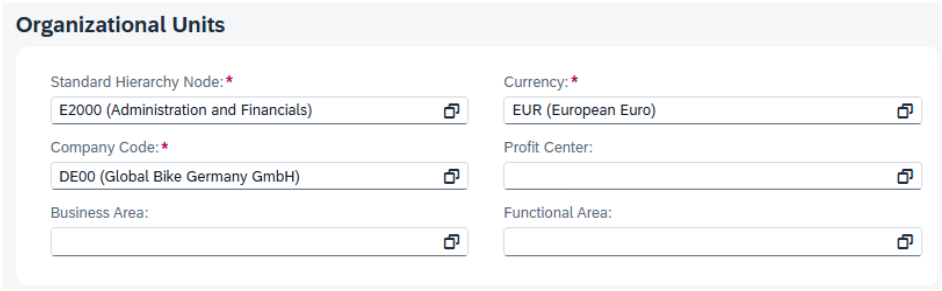

Enter **Asset Procurement** as *Name* and **Cost Center of Asset Procurement** as *Description*. As *User Responsible* enter your **LEARN-###**, the name of your user will be automatically added as *Person Responsible*. In the *Cost Center Category* field, select **W** (Administration).

Asset Procurement
Cost Center of Asset Procurement
LEARN-###
W

Switch to the *Organizational Units* area. Assign your new cost center to the *Standard Hierarchy Node* **E2000**. Also select the *Company Code* **DE00** (*Global Bike Germany GmbH),* the *Currency* **EUR** will be added automatically.

E2000
DE00
EUR

Press Create to save your cost center.

Click on SAP to return to the SAP Fiori Launchpad.

Step 2: Create Asset

Task Create an Asset. **Time** 5 Min.

Short Description In the field of business and entrepreneurship, a fixed asset often refers to the purchase of physical goods such as machinery, equipment, buildings, or vehicles that will be used in business operations over the long term. These fixed assets are typically used over a long period of time and are part of a business's fixed assets. Now create an asset for office equipment and computers.

Name (Position) Daniel Coronado (Asset Accountant)

To create a new asset, use the *Create Asset* app in the *Financial Accounting* area on the *Investment and Asset Management* page in the *Asset Accountant* role.

Start

In the *Asset Class* field, select the value help icon and enter **DE00** as the *Company Code* in the window that opens. Click on Go.

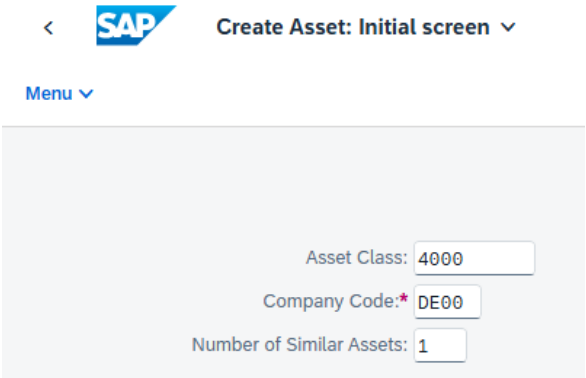

DE00

Then select the entry *4000 Office equipment and computers* from the list of results and click on OK. The asset class controls both the account determination and the depreciation parameters.

4000

If the fields for the *Company Code* and the *Number of Similar Assets* are not filled in, enter **DE00** as the *Company Code* and **1** for the *Number of Similar Assets*.

DE00
1

Click Master data, you will be taken to the *Create Asset: Master Data* screen.

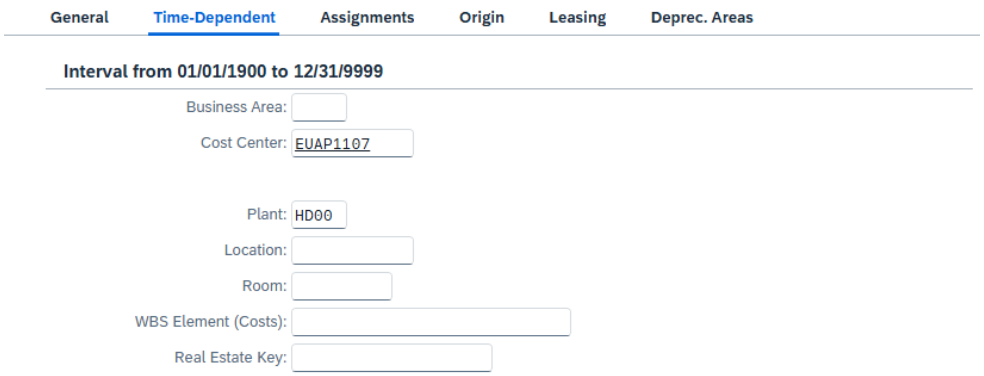

In the *General* subsection, enter **Laptop Service ###** as *Description*.

Laptop Service ###

Switch to the *Time-Dependent* area. Enter **EUAP1###** as the *Cost Center* and **HD00** as the *Plant*.

EUAP1###
HD00

Press Save. If a message is displayed, confirm it with ✓. The system returns the status that the attachment has been created.

Click on SAP to return to the SAP Fiori Launchpad.

Step 3: Asset Accounting Overview

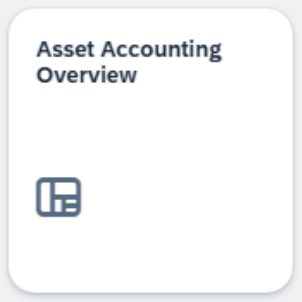

Task Get an overview of your Asset. **Time** 5 Min.

Short Description The asset accounting overview provides a graphical overview of the number of existing assets, asset transactions, planned depreciation and the current asset inventory. Quick links can be used to jump to other apps to view detailed information.

Name (Position) Daniel Coronado (Asset Accountant)

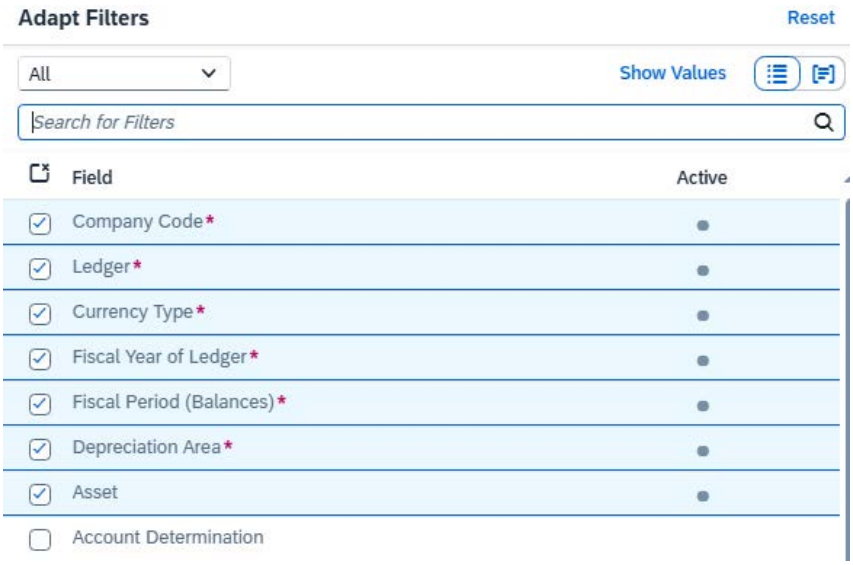

To view the asset accounting, use the *Asset Accounting Overview* app on the *Investment and Asset Management* page in the *Asset Accountant* role.

Start

Click Adapt Filters on the right side. Deselect *Asset Class* and select *Asset* for it.

~~Asset Class~~
Asset

Click OK on to apply the adjustment.

In the *Company Code* field, enter **DE00**. Select the entry **0L** (leading ledger) as the *Ledger*.

DE00
0L

Select the entry **10** (*company code currency*) as *Currency Type*.

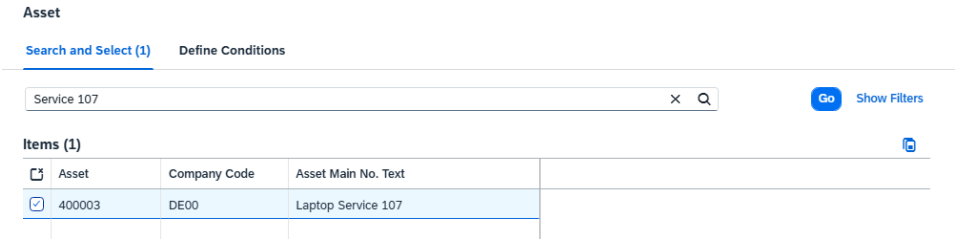

10

Enter the **current year** in the *Fiscal Year of Ledger* and the **current month** in the *Fiscal Period (Balances)* field. As the *Depreciation Area*, select the entry **01** (*Book depreciation*).

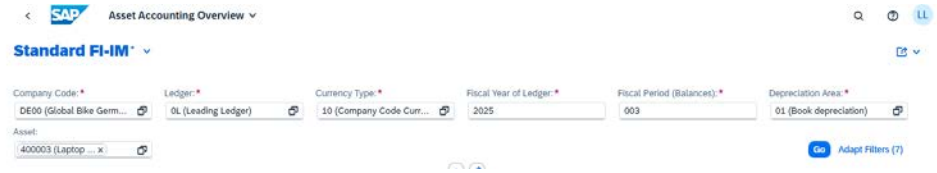

Current year
Current month
01

In the Asset field, open the value help. In the search field, enter *Service ###* and press Go. Your plant will be displayed.

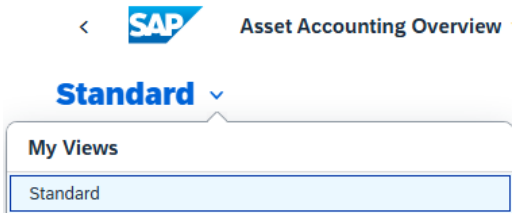

Service ###

Select the entry and press OK to apply it.

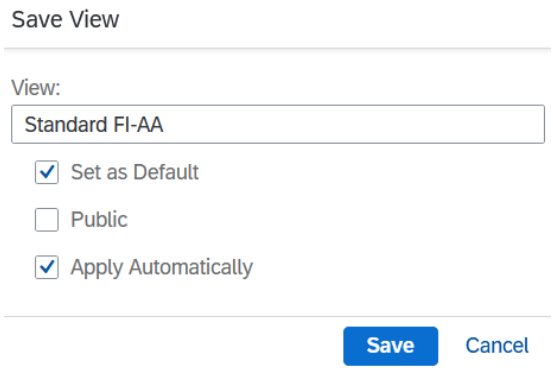

This search will be used many times. To save it, press the button next to Standard in the upper left corner. A submenu will open.

Click on Save As.

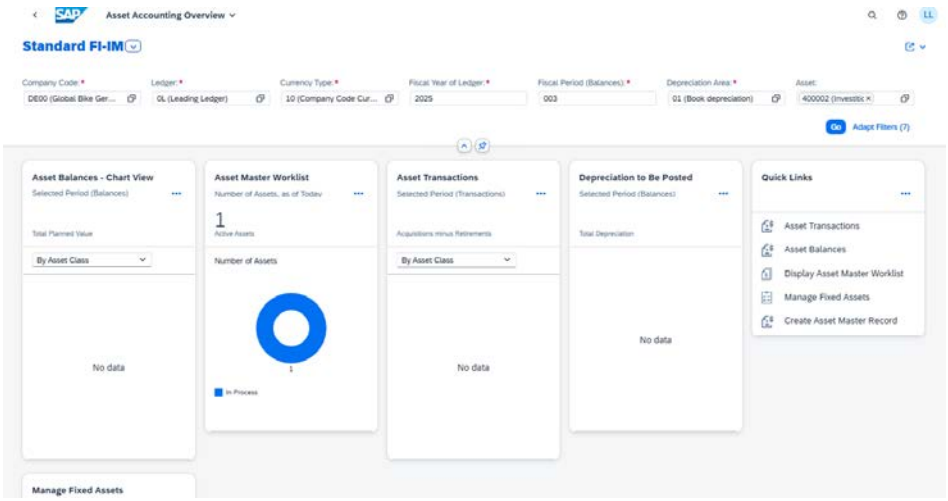

In the *Save View* window that opens, enter **Standard FI-AA** as the *View* and select *Set as Default* and *Apply Automatically*.

Standard FI-AA
Set as Default
Apply Automatically

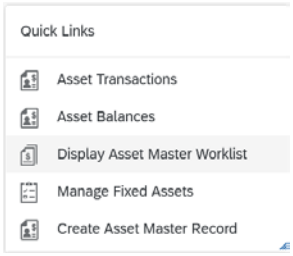

Press Save to save the search and then press Go to run the search.

You can see that there is an asset that is being processed, but more data is not available at this time (e.g. no asset transactions).

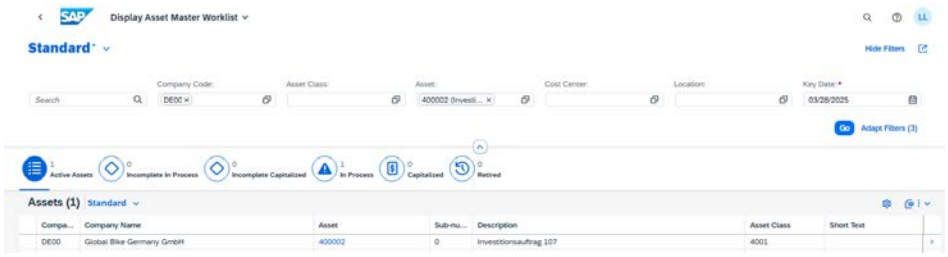

Note The structure of the page is dynamic and may differ in its order from the example above. The individual fields can also be moved and rearranged using Drag&Drop.

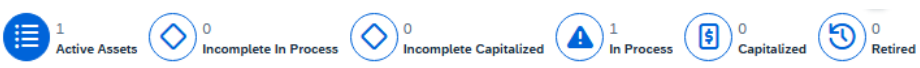

In the *Quick Links* area, select the *Display Asset Master Worklist* link.

You switch to the corresponding app and all entries are automatically transferred.

Your asset is completely recorded but still in process.

Click on SAP to return to the SAP Fiori Launchpad.

Step 4: Create Order

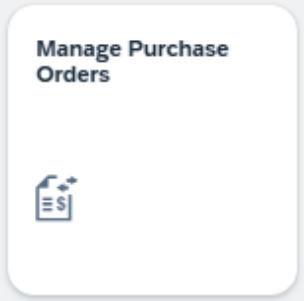

Task Create an order. **Time** 10 Min.

Short Description Order a laptop for the service area. Although there is no separate material data record for the laptop, it is assigned to an account via the asset created. In this case, no material needs to be specified in the order item.

Name (Position) Aura Maxwell (Purchasing Agent)

To create a new purchase order, use the *Manage Purchase Orders* app in the *Financial Accounting* area on the *Investment and Asset Management* page in the *Purchasing Agent* role.

Start

On the *Manage Purchase Orders* screen, click Create.

In the *Basic Data* area, select **Standard PO (NB)** as the *Purchasing Doc. Type*. Select **113###** (*Burgmeister Zubehör OHG*) as the *Supplier*.

Standard PO (NB)
113###

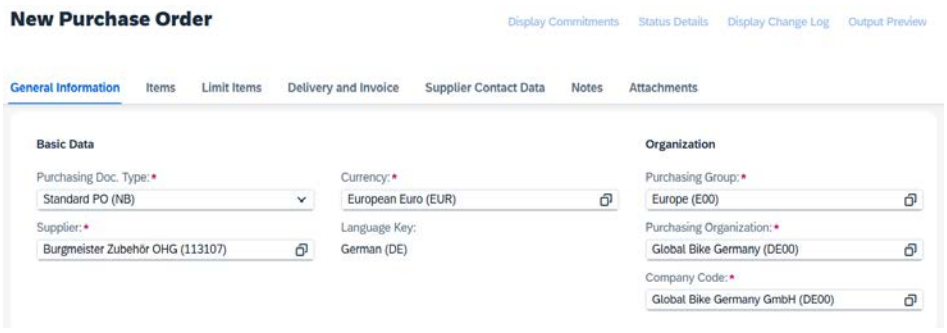

The *Currency* **EUR** (*European Euro*), the *Purchasing Organization* **Global Bike Germany (DE00)** and the *Company Code* **Global Bike Germany GmbH (DE00)** are automatically added with the selection of the supplier.

EUR

DE00
DE00

In the *Organization* area, enter **E00** (Europe) as the *Purchasing Group*.

E00

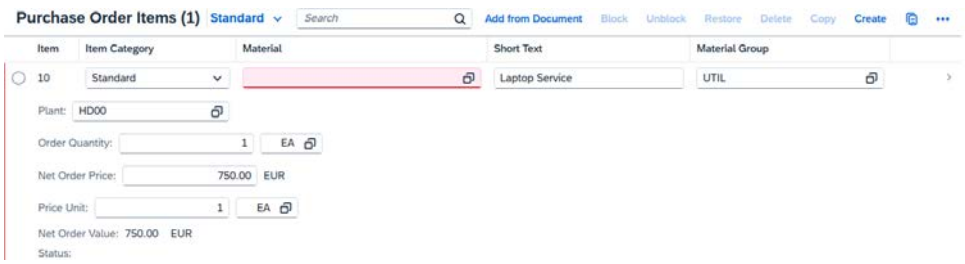

Switch to the *Items* area. Click Create to create a new item.

Now enter **Laptop Service** in the *Short Text* field. Select **UTIL** (*Utilities*) as the *Material Group*. Enter **HD00** as the *Plant*.

Laptop Service
UTIL
HD00

Enter **1 EA** as *Order Quantity* and **750.00 EUR** as *Net Order Price*.

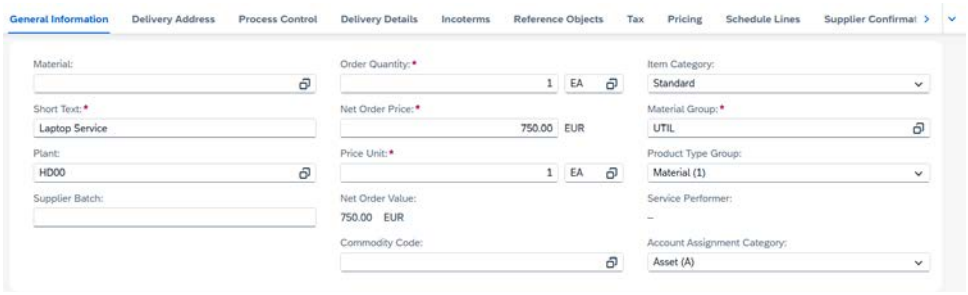

1 EA
750.00

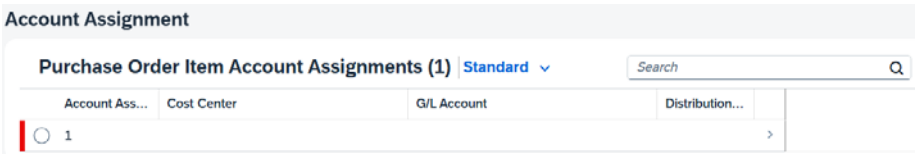

Click on › at the end of the line to open the details.

In the *General Information* area, select **Asset (A)** as the *Account Assignment Category*. Afterwards, the *Material* field will no longer be highlighted in red.

A

Switch to the *Account assignment* area.

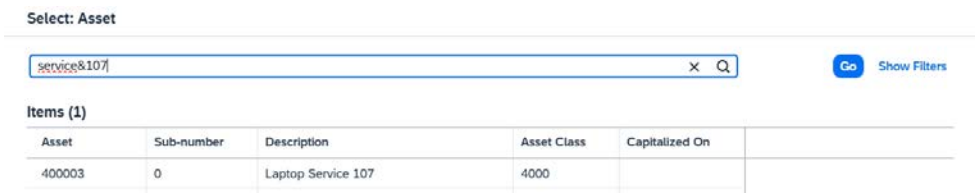

Click on › at the end of the line to open the details.

Select the *Asset Management* area, the window will automatically scroll to the correct position. In the *Asset* field, click the value help icon ⧉. The pop-up window *Select: Asset* opens.

In the *Search* enter **service&###** and click Go.

service&###

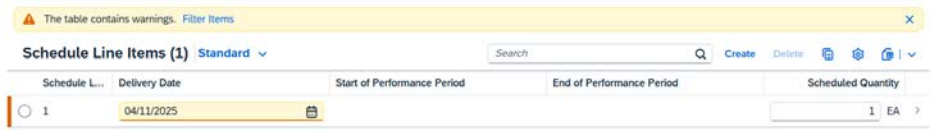

Click on the entry of your asset, the *Asset* and the *Sub-number* will be completed.

Click on Apply. You will return to the order item.

Select the *Schedule Lines* tab and add as *Delivery Date* **today in two weeks**.

today in two weeks

Select Apply to apply your adjustments to the order item. Then press Order.

Click on SAP to return to the SAP Fiori Launchpad.

Step 5: Post Goods Receipt

Task Post the goods receipt for the purchase order. **Time** 5 Min.

Short Description You will receive the goods you ordered from Burgmeister Zubehör OHG in the previous step. Create a goods receipt entry that refers to your order. The stock is increased, and a material document is created to document this.

Name (Position) Tatiana Karsova (Good Receipt Clerk)

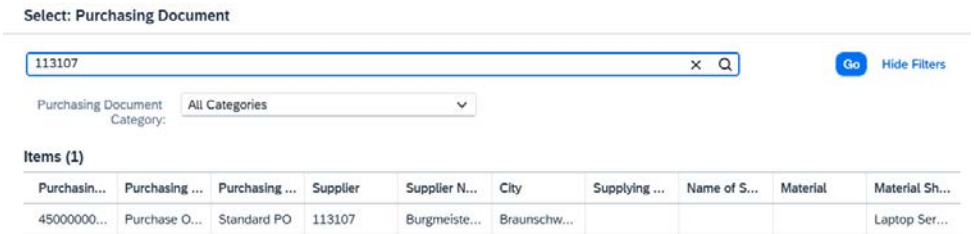

To post the goods receipt, use the *Post Goods Receipt for Purchasing Document* app in the *Financial Accounting* area on the *Investment and Asset Management* page in the *Goods Receipt Clerk* role.

Start

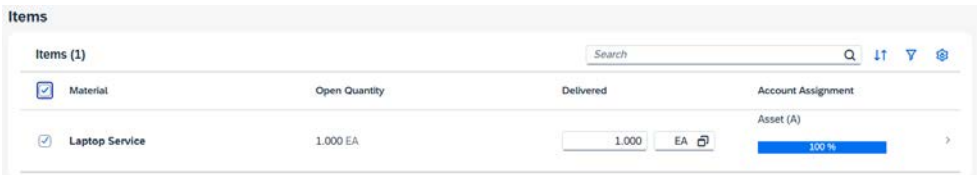

In the *Purchasing document* field, use the value help icon to find your created order. In the window that opens, enter **113###** in the *search* field and click Go.

113###

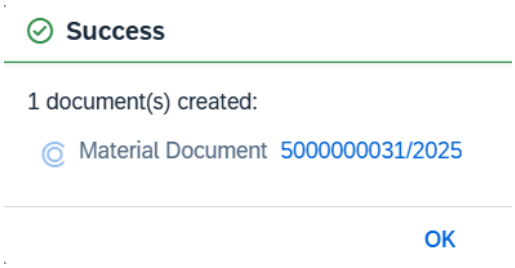

Click on your order to accept it.

Then select the *Laptop Service* entry in the *Items* area so that you can make your booking.

Press Post to post the goods receipt to your installation.

You will receive the following success message with your document number.

Confirm the message with OK.

Click on SAP to return to the SAP Fiori Launchpad.

Step 6: Asset Accounting Overview

Task Check your plant after goods receipt. **Time** 5 Min.

Short Description After the goods receipt has taken place, the first asset transaction took place at the same time. There is now an asset inventory and at the same time, based on the depreciation rule, the depreciation was scheduled.

Name (Position) Daniel Coronado (Asset Accountant)

To view the asset accounting, use the *Asset Accounting Overview* app on the *Investment and Asset Management* page in the *Asset Accountant* role.

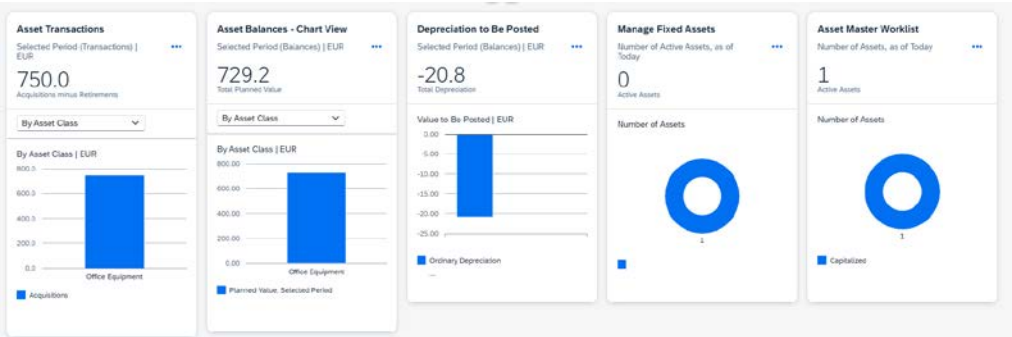

Start

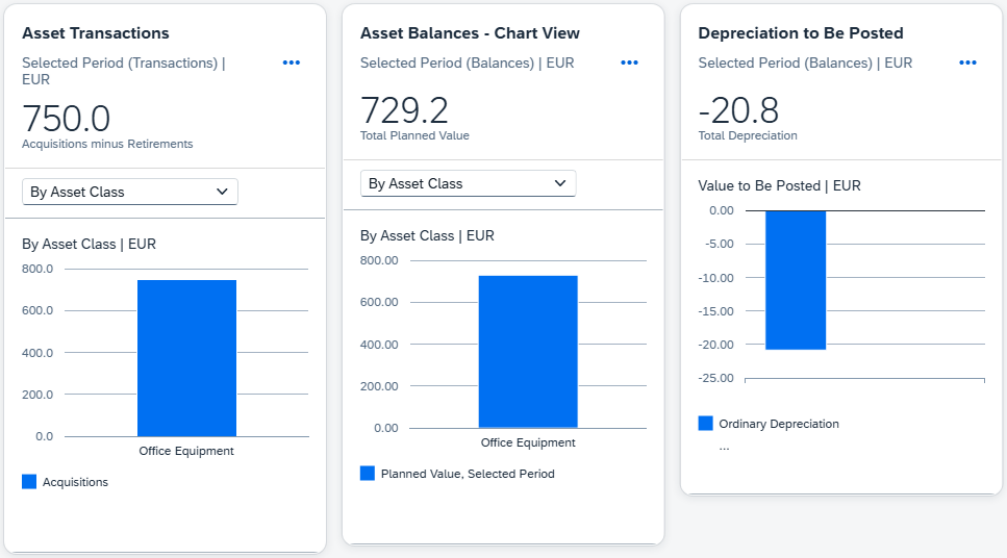

The saved view *Standard FI-AA* should be preset and executed automatically. You will see an overview of your asset.

Note Pay attention to the fiscal period. If a month change has occurred since the view was created, it must be updated.

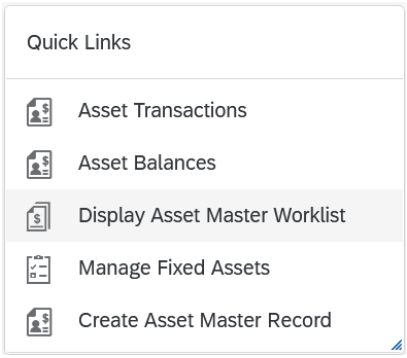

If necessary, press Go to update the values.

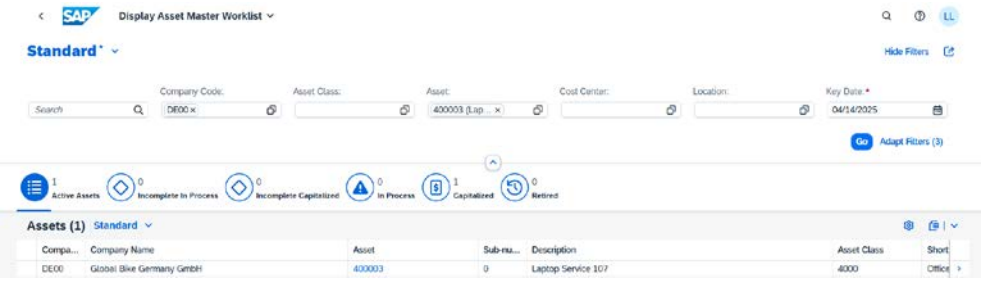

You can see the *Asset Transactions* at a value of 750 EUR and the first *Depreciation to Be Posted* for the current month in the amount of 20.80 EUR. The *Asset Balance* according to the asset inventory list is again calculated from the difference between the acquisition price and the depreciation. Currently, it amounts to 729.20 EUR.

In the *Quick Links* area, select the *Display Asset Master Worklist* link.

You switch to the corresponding app and all entries are automatically transferred.

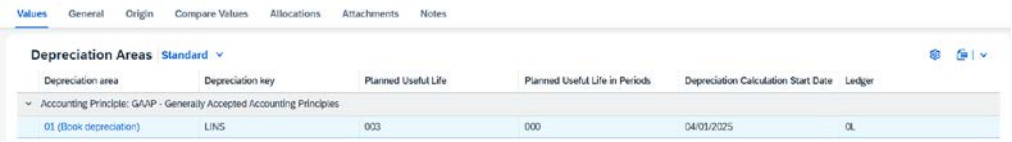

You can see that your Asset has now changed its status from *In process* to *Capitalized*.

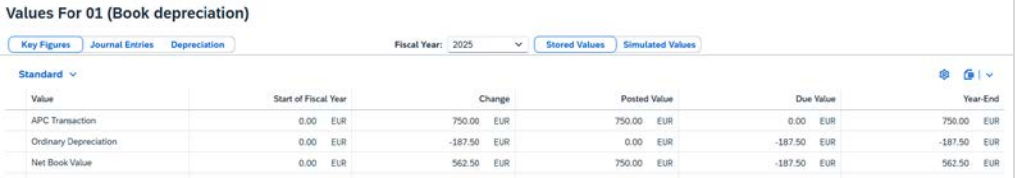

Click on › at the end line of your attachment to open the details.

In the *Values* area, you can see important information about your asset under *Depreciation Areas*. In the individual depreciation areas, the asset is

depreciated on a straight-line basis (*LINS*) with a planned useful life of 3 years. The start of depreciation (*AfA*) is the day of capitalization.

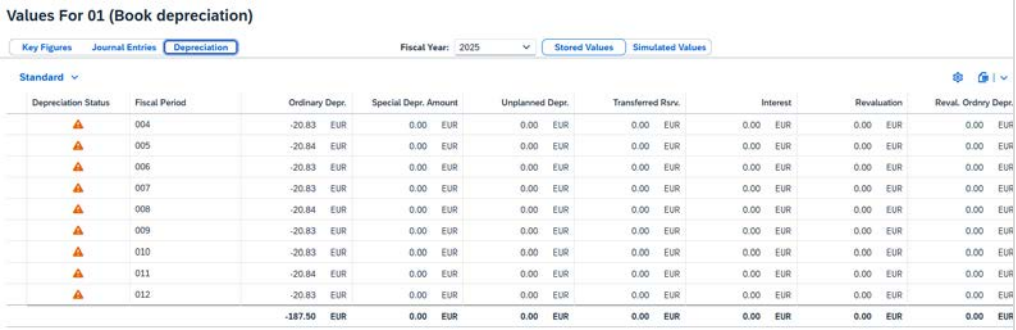

In the *Values* area, you can see the key figures *APC Transaction*, *Ordinary Depreciation*, and *Net Book Value* for the entire current year.

Note Depending on the current period, the values differ, as the number of possible write-offs is accompanied by the number of months still open.

Switch to *Depreciation* to see an overview of planned depreciation per month.

Click on SAP to return to the SAP Fiori Launchpad.

Step 7: Create Supplier Invoice

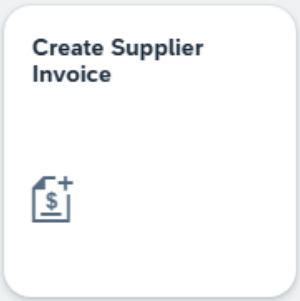

Task Create a supplier invoice. **Time** 10 Min.

Short Description Create an invoice for your supplier Burgmeister Zubehör OHG for the delivered equipment. However, due to a subsequent change to the laptop, unplanned delivery costs arose which are now charged.

Name (Position) Silvia Cassano (AP Accountant)

To create an invoice receipt, use the *Create Supplier Invoice* app in the *Financial Accounting* area on the *Investment and Asset Management* page in the *AP Accountant* role.

Start

Enter **DE00** in the *Company code* field. A warn message is displayed that data will be lost. Confirm the message with OK.

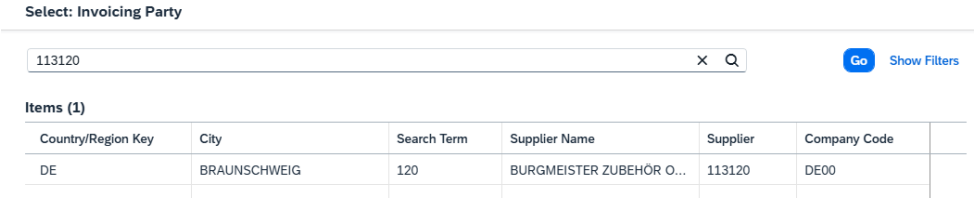

DE00

Enter **today's date** as the *invoice date*, the *posting date* should already contain **today's date**.

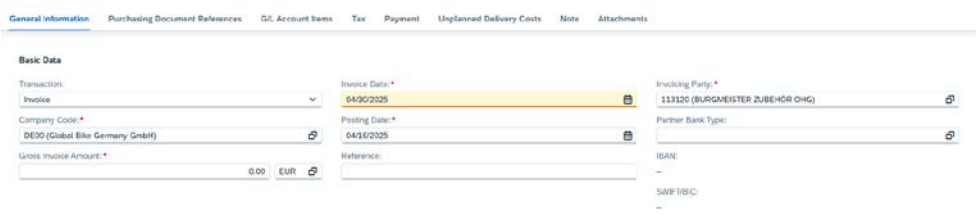

today's date

In the *Invoicing Party* field, select the value help icon. Enter **113###** in the search field and click Go.

113###

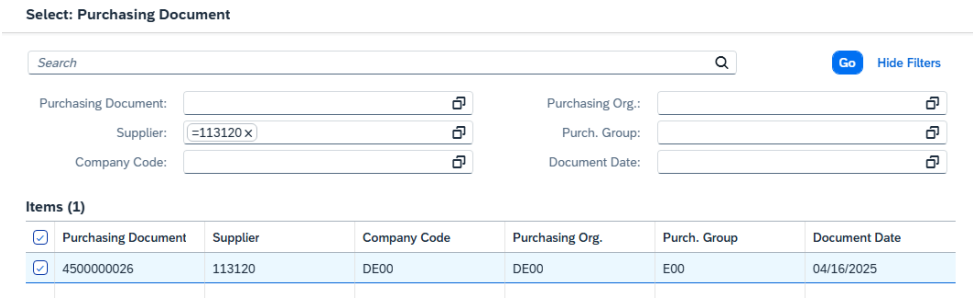

Click on the entry of your supplier to accept it.

Switch to the *Purchasing Document References* area.

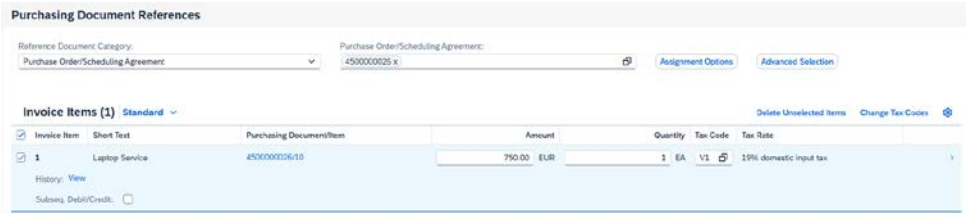

In the *Purchase Order/Scheduling Agreement* field, select the value help icon. In the *Supplier* field, enter **113###** and click Go.

113###

Select your entry and click on OK.

You will see your invoice item and the corresponding amount.

In the upper part of the screen the balance due is displayed. This includes the 19% input tax due on the order item.

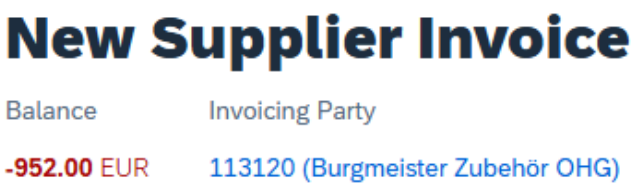

Switch to the *Unplanned Delivery Costs* area. Enter **50.00 EUR** in the *Amount* field.

50.00

Click Check to check your entries and determine a new balance.

gross invoice amount

Since the balance is not yet cleared, you will also see an error message. Switch to the *General Information* section and add the **Gross Invoice Amount** to the balance.

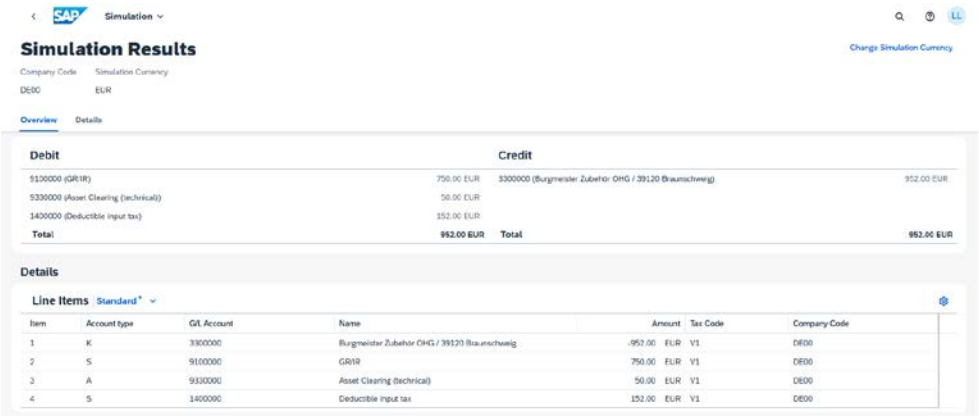

Click again on Check, the balance should now be balanced.

Furthermore, success message should now be issued by the system.

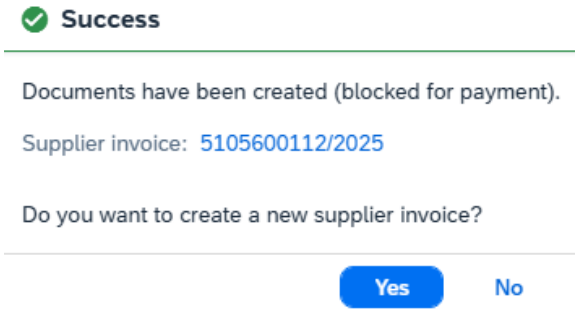

Then press Simulate to check your bookings in advance. You will see once again an overview of the individual costs and your payment.

Note Warning messages may occur but need not be considered further.

Finally, press Post. The system will generate a unique supplier invoice number.

Click No , as there is no need to create another supplier invoice.

You will automatically return to the SAP Fiori Launchpad.

Step 8: Asset Accounting Overview

Task Check your asset after paying the supplier invoice. **Time** 5 Min.

Short Description Due to the unplanned purchase incidentals, the asset value has changed and so has the monthly depreciation. Check these and other effects from the point of view of the asset accountant.

Name (Position) Daniel Coronado (Asset Accountant)

To view the asset accounting, use the *Asset Accounting Overview* app on the *Investment and Asset Management* page in the *Asset Accountant* role.

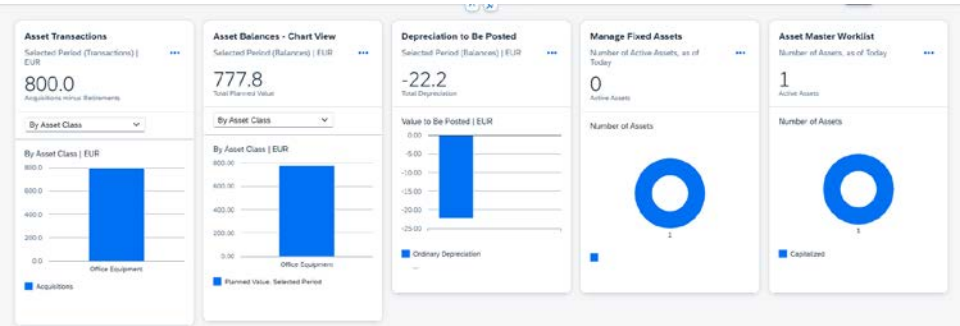

Start

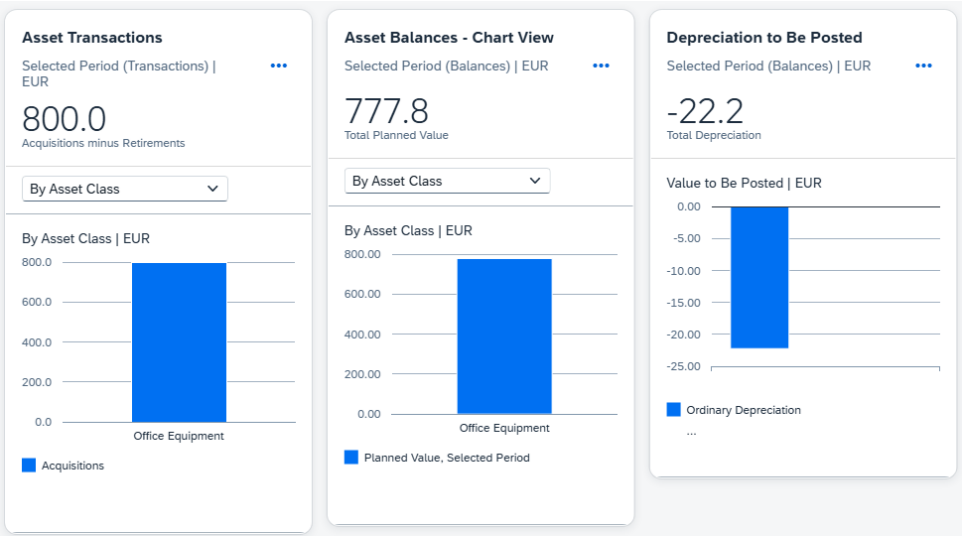

The saved view Standard FI-AA should be preset and executed automatically. You will see an overview of your asset.

Note Pay attention to the fiscal period. If a month change has occurred since the view was created, it must be updated.

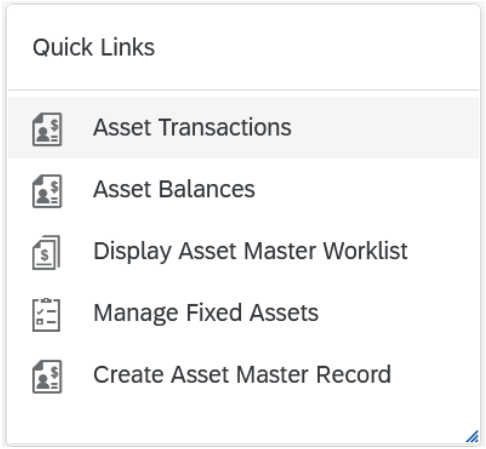

If necessary, press Go to update the values.

It can be seen that the asset values have now increased due to the unplanned delivery costs in the supplier invoice.

To track the change in value as an asset accountant, select the *Asset Transactions* link in the *Quick Links* area.

In the *Asset Transactions* window, press Go . The values for the search are taken from the Asset Accounting overview. An entry for company code DE00 is displayed.

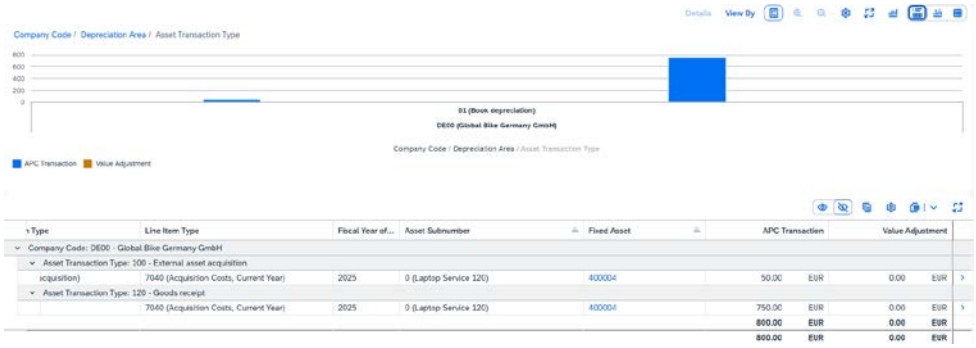

Click on › before *Company Code: DE00* to expand the entry. You will see the *asset transaction types* 100 and 120. Expand these entries as well.

Company Code	Journal Entry	Ref. Document Nu...	Asset Transaction Type
Company Code: DE00 - Global Bike Germany GmbH			
Asset Transaction Type: 100 - External asset acquisition			
DE00 (Global Bike Germany G...	100000007	5105600112	100 (External asset acquisition)
Asset Transaction Type: 120 - Goods receipt			
DE00 (Global Bike Germany G...	5000000009	5000000032	120 (Goods receipt)
DE00 (Global Bike Germany Gm...			

Scroll to the right to the end of the entries, the individual amounts are shown there.

Fixed Asset	APC Transaction		Value Adjustment		
400004	50.00	EUR	0.00	EUR	›
400004	750.00	EUR	0.00	EUR	›
	800.00	**EUR**	**0.00**	**EUR**	
	800.00	**EUR**	**0.00**	**EUR**	

A graphical display is also possible. Press  to display both a graphical and tabular view.

Click on  to return to the SAP Fiori Launchpad.

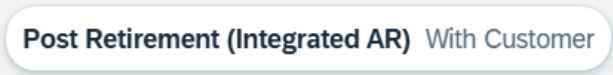

Step 9: Post Retirement

Task Post the retirement of your asset **Time** 5 Min.

Short Description Due to lack of communication, it has become apparent that the laptop cannot be used for service. This is now being discarded internally, but at a higher price than originally paid, resulting in a profit.

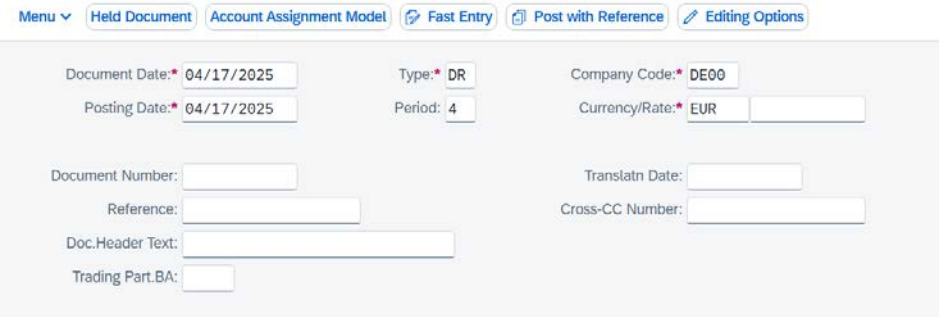

Name (Position) Daniel Coronado (Asset Accountant)

In the *Financial Accounting* area, on the *Investment and Asset Management* page, in the *Asset Accountant* role, use the *Post Retirement (Integrated AR) With Customer* app.

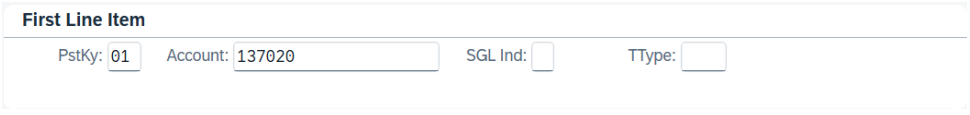

Enter the last working day of the month as the voucher and posting date. The document *type* is **DR**. Enter **DE00** as the company code and **EUR** as the currency.

DR, DE00, EUR

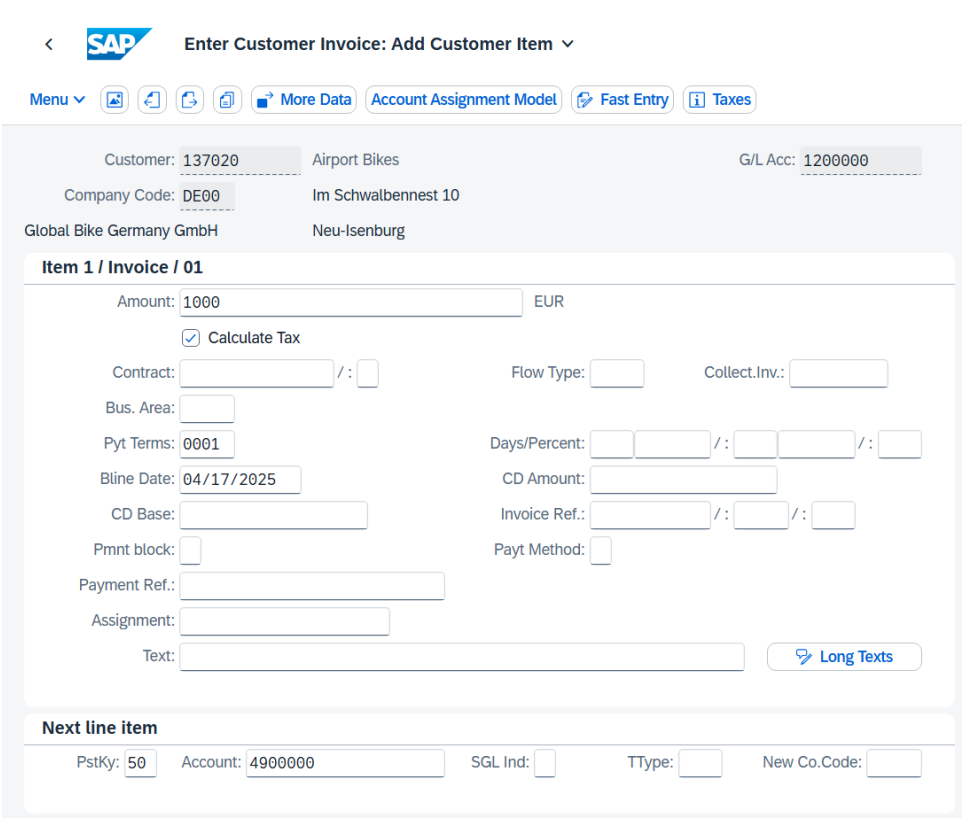

The *posting key* **01** (invoice) is automatically entered in the *First Line Item* area and you enter a customer account **137**### in the *Account* field. Remember to enter the three-digit number you were given by your lecturer for ###.

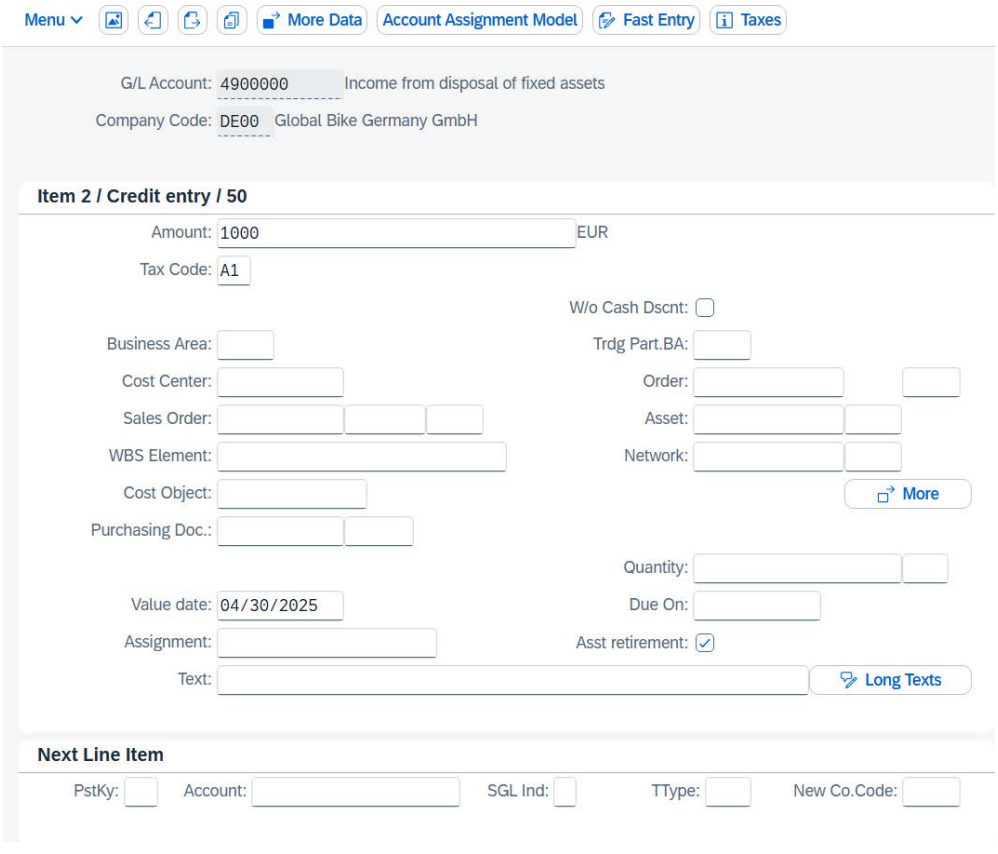

After pressing the Enter key, a message appears stating that the voucher date is in the future and must be checked. Please ignore this message.

In the next part, enter **EUR 1000** as the *amount*. Also select *Calculate tax*. In the *Next Line Item Field*, enter the *PstKy* **50** and the revenue account **4900000** as the *Account*.

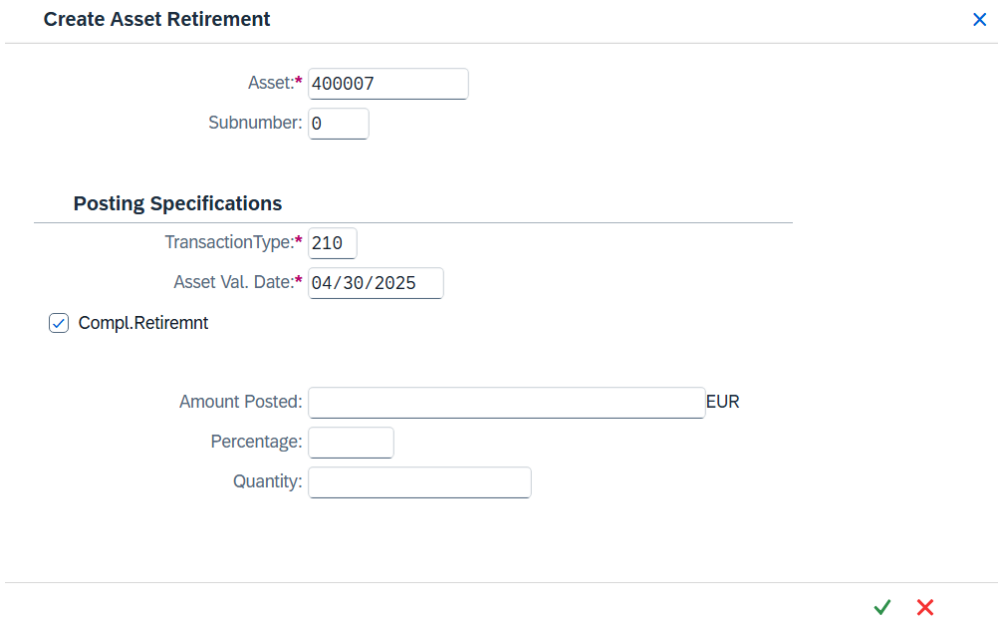

Press Enter. In this section, enter the *Amount* of EUR 1000 and the *Tax Code* **A1**, delete the automatically specified *Cost Center*, change the *Value Date* to the **last working day of the month** and select **Asst retirement**.

1000
A1
Last working day of month
Asst retirement

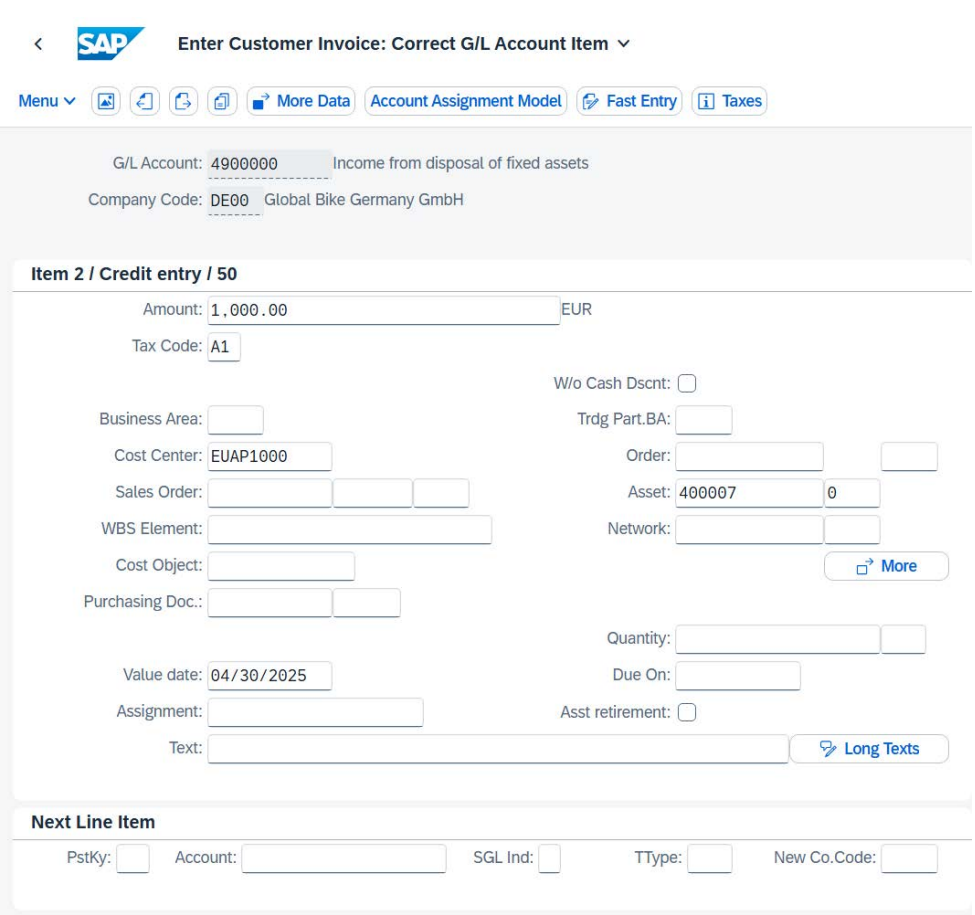

After pressing the Enter key, the “Create Asset Retirement” window appears. In this window, enter the number of the *Asset* you wish to sell. In our case, this is the asset that was previously created and the *Asset Val. Date*. - the last weekday of the month. Then select the **Compl. Retirement**.

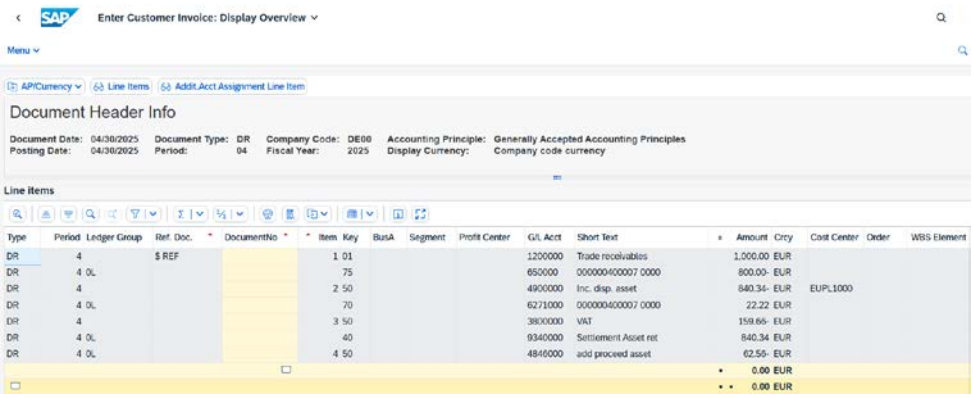

Confirm with ✓.

After entering the Asset, the data is transferred to the corresponding fields. Cost Center appears again, leave it as it is.

Select the *Display Document Overview* icon to view the voucher items.

Simulate the Asset Accounting by selecting the symbol Asset Accounting.

Note

- The VAT is 159.66 EUR.
- Since the asset was purchased at the beginning of the month and sold at the end of the month, the system still calculates the depreciation for this month in the amount of 22.22 EUR. The system still expects us to post the depreciation for this asset, but since the depreciation can only be posted for all assets and not for each individual asset, this step is excluded from the case study.
- The total profit from the sale is 65.56 EUR.

Go back one step and then press Post.

Click on SAP to return to the SAP Fiori Launchpad.

Step 10: Asset Accounting Overview

Task Get an overview after the asset retirement. **Time** 5 Min.

Short Description The retirement of the asset results in the asset balance falling to zero and there is no longer any planned depreciation. The retirement is also shown graphically in the asset transaction.

Name (Position) Daniel Coronado (Asset Accountant)

To view the asset accounting, use the *Asset Accounting Overview* app on the *Investment and Asset Management* page in the *Asset Accountant* role.

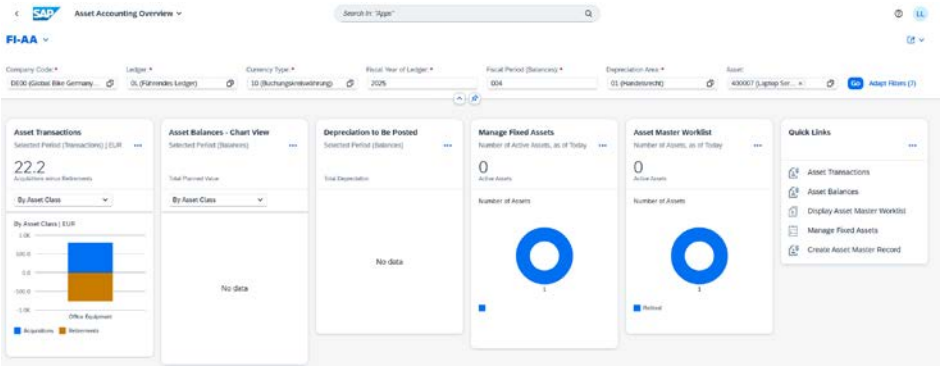

Start

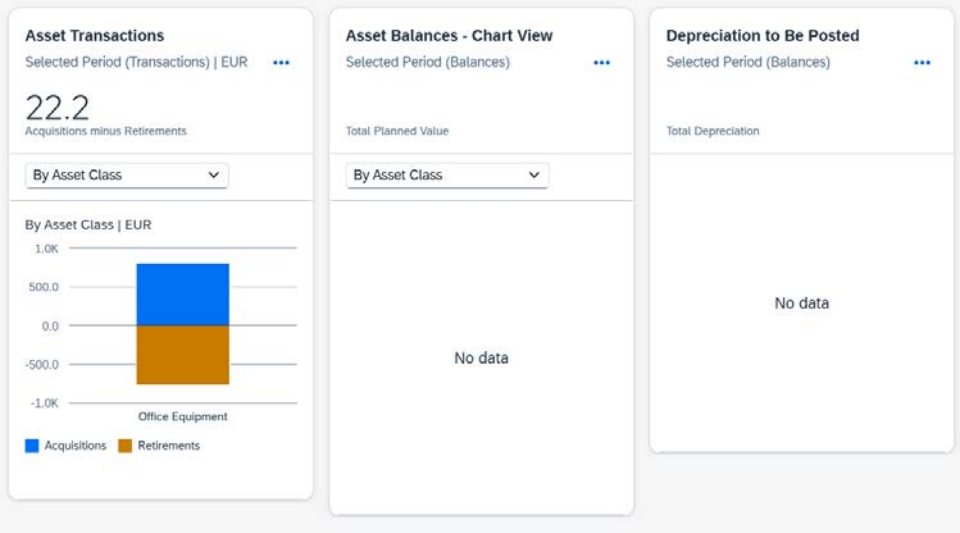

The saved view Standard FI-AA should be preset and executed automatically. You will see an overview of your asset.

Note Pay attention to the fiscal period. If a month change has occurred since the view was created, it must be updated.

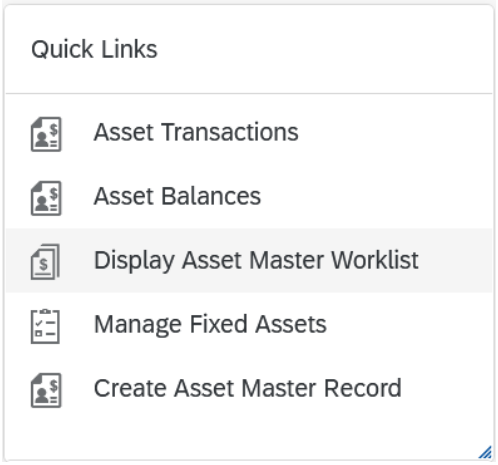

If necessary, press Go to update the values.

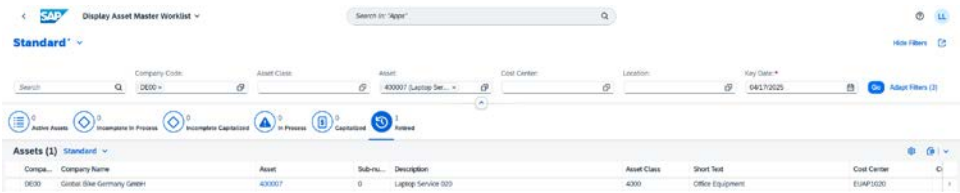

In the *Asset Transaction* you can see the retirement of your asset, the current asset inventory list no longer shows an inventory value. Nevertheless, the planned depreciation must still be made.

In the *Quick Links* area, select the *Display Asset Master Worklist* link.

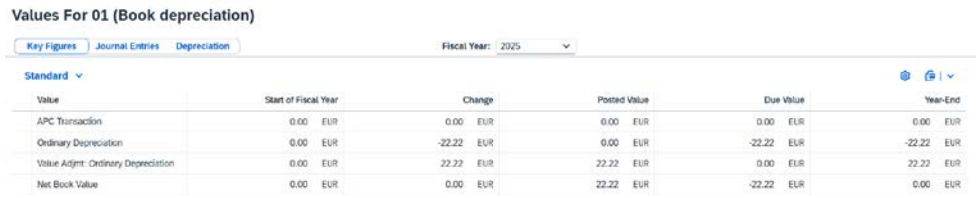

You switch to the corresponding app and all entries are automatically transferred.

Click on 1 Retired and then on › at the end line of your attachment to open the details.

In the *Values* area of the Commercial law valuation area, you can see that both the *APC Transaction* and the *Net Book Value* are EUR 0.00.

Note Ordinary Depreciation and Value Adjmt: Ordinary Depreciation in the annual financial statements still EUR -22.22 and EUR 22.22 accordingly. This is related to the depreciation charged.

Switch to the *Journal Entries*. Here you can once again see a summary of all the documents that have been entered for your system.

Click on SAP to return to the SAP Fiori Launchpad.
