Human Capital Management (HCM)

Curriculum: Introduction to S/4HANA using Global Bike

SAP University Alliances

SAP UCC Magdeburg

Teaching material - Information

Teaching material - Version

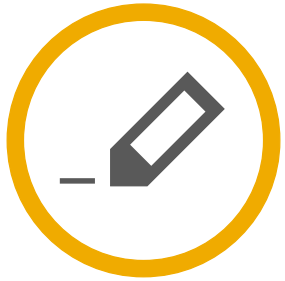

- 4.3 (July 2025)

- Software used
  - S/4HANA 2023
  - Fiori 3.0
- Model
  - Global Bike

- Prerequisites
  - No Prerequisites needed

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Module Information

Authors

- Claudia Kroliczek
- Mark Lehmann
- Stefan Weidner
- Babett Ruß
- Lutz Kleinsorge

Target Audience

- Beginner

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Module Information

Learning Objectives

You are able to

- define the central organizational structures of the HCM module.
- summarize the master data which is most important for the HCM module.
- explain standard HCM processes.

HCM Enterprise Structure

- Enterprise Structure
  - Represents formal and financial structures in a company
  - Each employee needs to be assigned to an enterprise structure.
  - Basically consists of company code, personnel area, and personnel subarea

  - Client
    - An independent environment in the system

  - Company Code
    - Smallest org unit for which you can maintain a legal set of books

  - Personnel Area
    - Represents a company area differentiated between personnel administrative, time management, and expensive organizational aspects

  - Personnel Subarea
    - Represents part of a personnel area
    - Represents a company area differentiated between personnel administration, time management, and payroll accounting aspects

HCM Personnel Structure

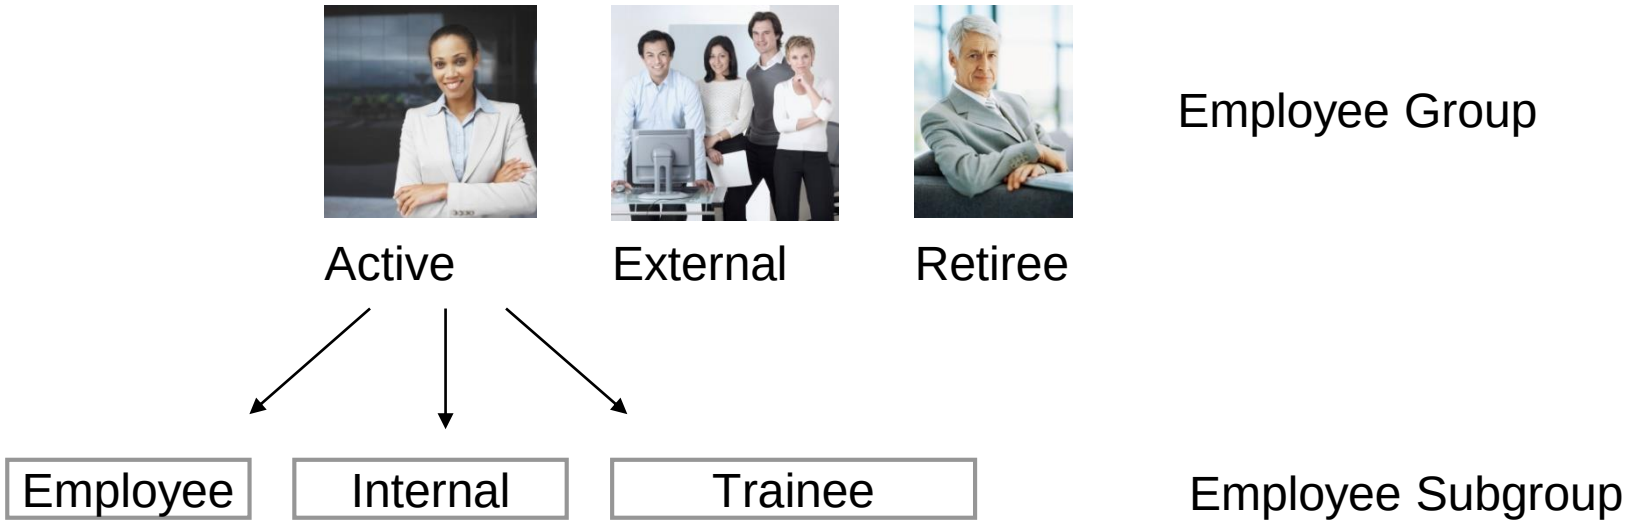

- **Personnel Structure**
  - Describes an employee's position within the company
  - Is defined by employee group and employee subgroup

  - Employee Group
    - Organizational unit for which personnel related regulations can be specified
    - Examples:
      - Active employees
      - External
      - Retirees

  - Employee Subgroup
    - Organizational unit within the employee group, for which personnel related regulations are specified
    - Examples:
      - Industrial employees
      - Commercial clerks
      - Laboratory assistants

HCM Personnel Structure

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

HCM Personnel Structure

- **Payroll area**
  - Organizational unit in payroll accounting
  - Comprises all employees who are accounted for at the same time
  - Payroll accounting is generally run by payroll area

  - Defines the following parameters
    - Payroll dates
    - Lowest retroactive payroll period
    - Period to be accounted for

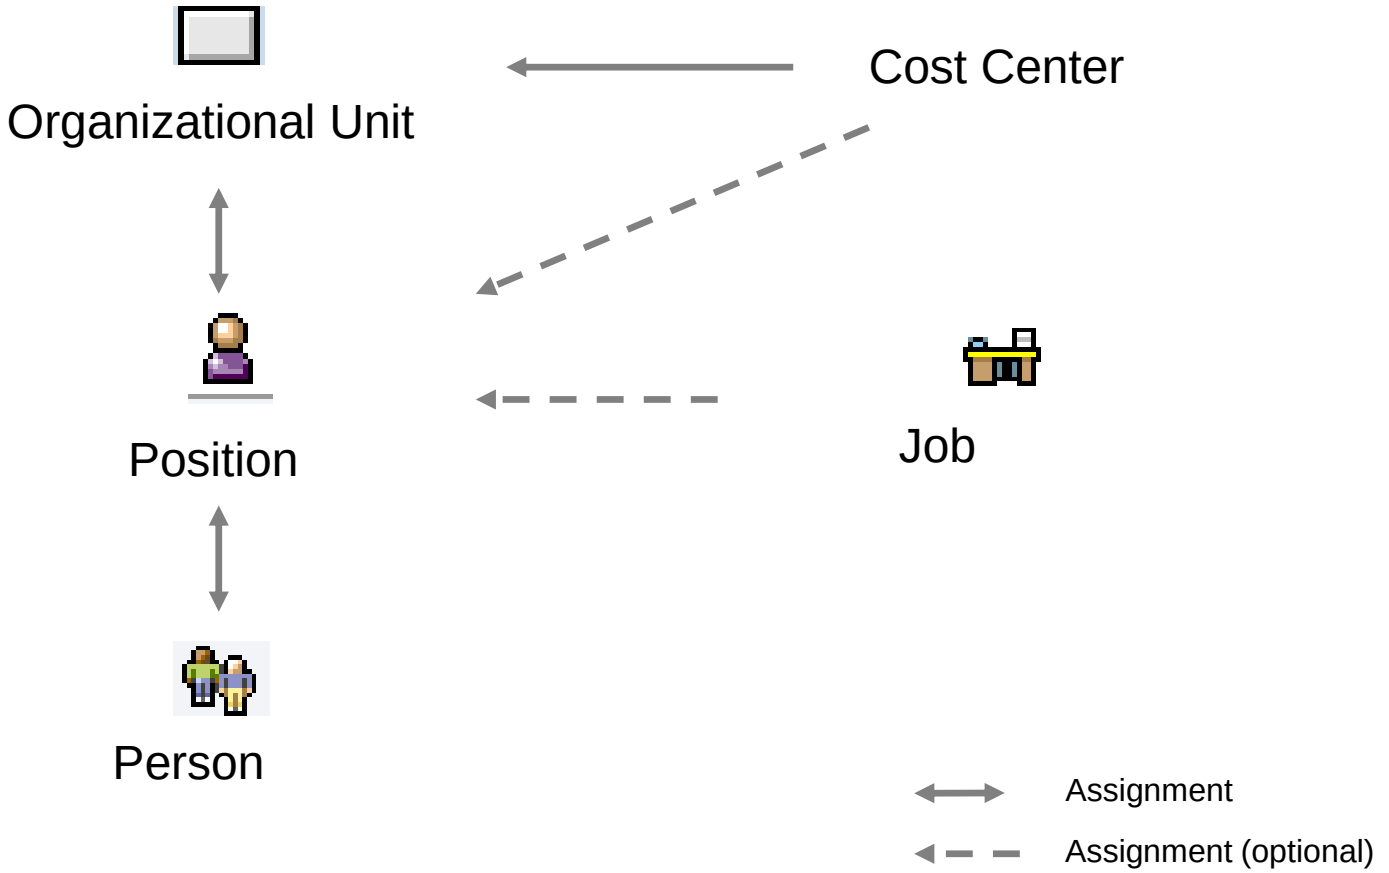

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

HCM Organizational Plan

- **Organizational Plan**
  - Describes in which function an employee is acting
  - Is object-oriented, i.e. each element is represented by an object
  - Objects can be assigned to each other
  - Organizational Unit
    - Can be grouped according to functional and regional aspects.
  - Position
    - Are assigned to organizational units and filled by employees
    - Example: Position accounting clerk in the Accounting Department
  - Person
    - Are employees and fill positions
  - Cost Center
    - originate from Controlling and can be linked with positions or organizational units
  - Job
    - General description of tasks which an employee should perform
    - Are assigned to positions
    - Example: Position Head of Department

HCM Master Data

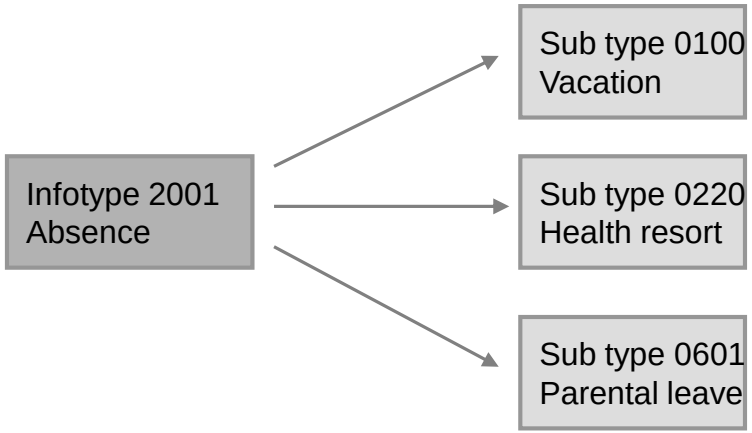

- **Personnel number**
  - Is used in SAP as a central identifier for an employee
  - Can comprise up to eight digits
  - Can be assigned either by the system or manually
  - All employee data available in the system is identified on the basis of the personnel number.

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

HCM Master Data

- **Infotypes**
  - HR master data are structured in infotypes.
  - They are collections of data fields that are logically linked
  - They process employee data in an effective structure in accordance with business requirements
  - Each infotype has an explicit four-digit ID, e.g. infotype Addresses 0006.
  - An infotype can have sub types, which represent a sub variant of the infotype.

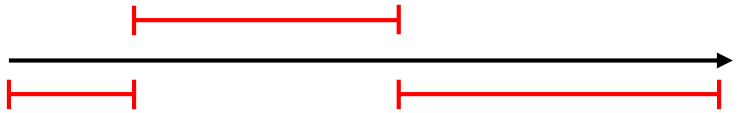

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Time Constraints of Infotypes

1: The infotype must be continuous without gaps and may only occur once at any one time.
The last record of this infotype in the database can then no longer be deleted!

Time constraint 1 e.g. permanent residence

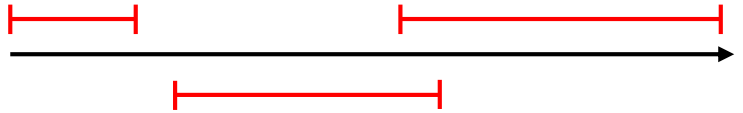

2: Gaps permitted, but no multiple assignments.

Time constraint 2 e.g. husband

3: Gaps and multiple assignments permitted.

Time constraint 3 e.g. secondary residence

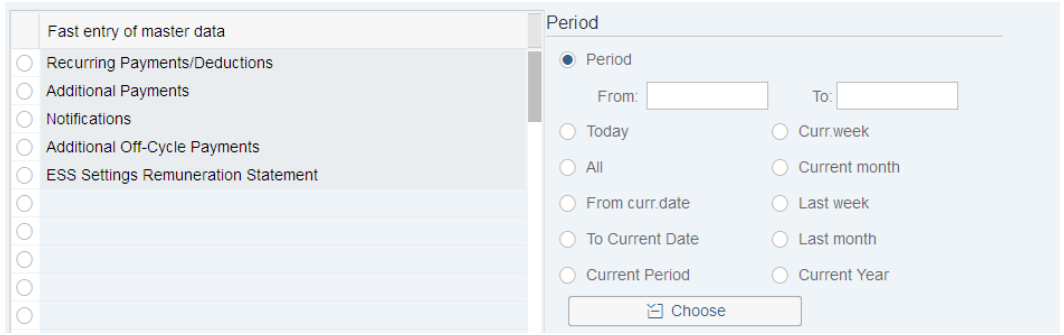

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

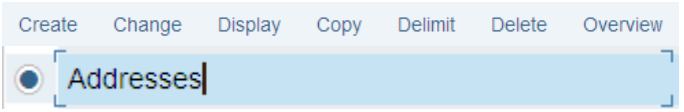

Maintenance of Infotypes

- Infotypes can be maintained in three different ways:

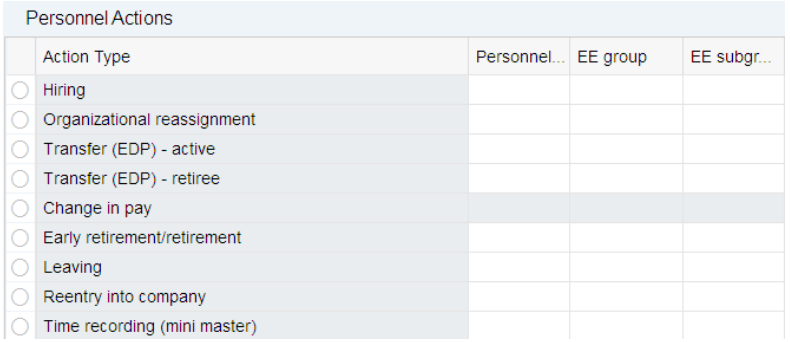

Fast entry

Single infotype maintenance

Personnel action

HCM Processes – Organizational Management

- Model the organizational structure of your enterprise
- Create, change and delimit organizational units
- Create, change and delimit jobs and positions
- Analyze an organizational unit to define workforce requirements and personnel cost planning
- Create further organizational units for planning scenarios or simulations

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

HCM Processes – Personnel Administration

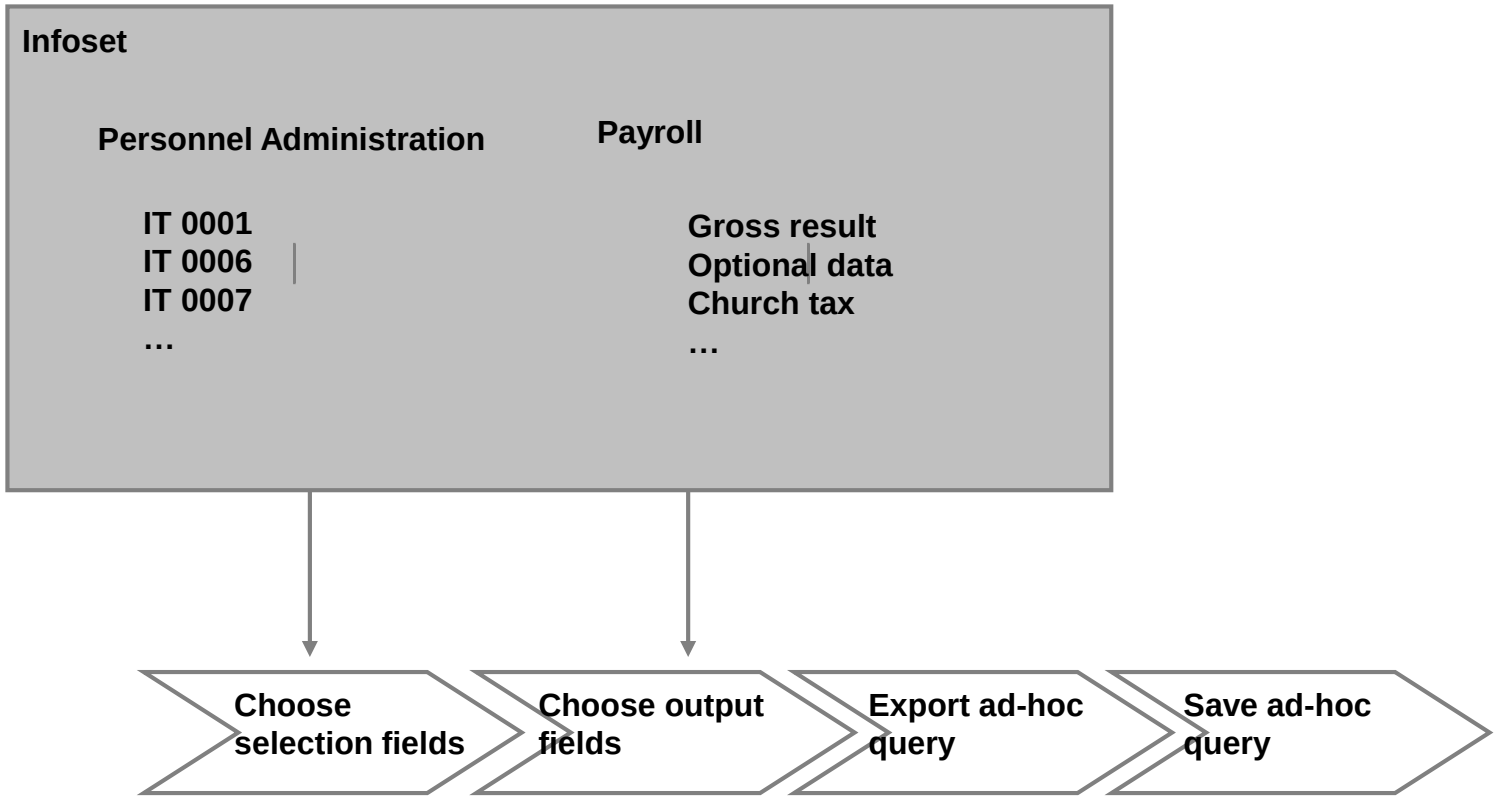

- Creating and maintaining personnel master data
- Plausibility checks
  - may be performed to detect errors
  - prevent the transfer of incorrect data
- Automatic history
  - is created when changing master data
  - may be used for reporting and the verification of data integrity
- Personnel administration sets the data basis for subsequent processes in Human Resource Management and reporting

Personnel Controlling – Ad-hoc Query

Ad-hoc Queries are a tool for analysing data from personnel management

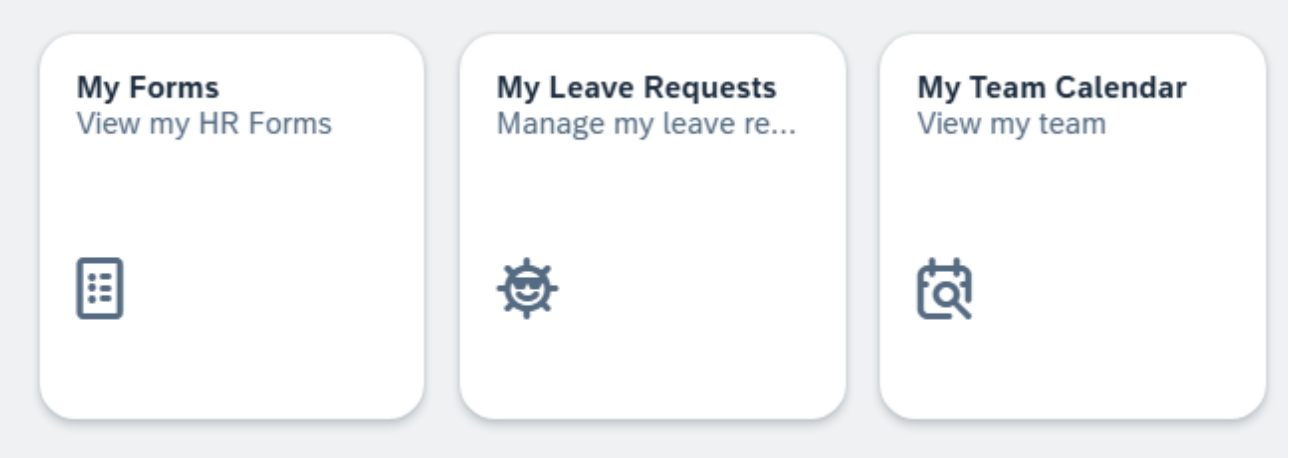

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Employee Self-Service (ESS)

- Modern web interface for employees
- Enables personal data to be maintained independently of time and location
- Access to numerous administrative functions that are normally performed by other departments
- Employees are responsible for updating their own data

- Employees can perform the following activities via the ESS:
  - Submitting travel expense reports
  - Searching the employee directory
  - Viewing the team calendar
  - Updating/changing personal data
  - Applying for employer benefits
  - Documenting working hours
  - Updating bank details
  - Registering/applying for training courses
  - Applying for absences
