Payroll (HCM II)

This case study describes the payroll process and the possibility for employees to view/create/change/delete their own data in the HR system. This fundamentally establishes the connection between the information for hiring employees and the creation of a payroll.

MOTIVATION

This case study represents an introduction to human resource related organizational management and personnel administration in a human resource management system on the basis of the HCM (Human Capital Management) module of an SAP S/4HANA system.

The processes for hiring employees were explained in detail in the HCM I module. Furthermore, some important infotypes that are necessary for hiring an employee have already been shown

In the HCM I module, the processes for hiring employees were explained in detail. In addition, some important infotypes that are necessary for hiring an employee have already been shown, and in this case study you will get to know new infotypes in order to be able to carry out German payroll accounting. You will also learn about ways in which employees in a company can edit their own data.

PREREQUISITES

Before you use this case study, you should be familiar with navigation in the SAP system.

In order to successfully work through this case study, there are no special requirements. However, it is recommended to have completed the HCM case study and the related exercises.

NOTES

This case study uses the Global Bike (GBI) data set, which has been created exclusively for SAP UA global curricula

Process Overview

Learning Objective Understanding the requirements and executing payroll accounting using SAP HCM. Getting to know SAP FIORI apps for employees.

Time 75 min.

Scenario To run payroll for an employee, you will take on the roles of Recruiter and HR Administrator. You will work in the Human Capital Management (HCM) area. You will also apply for leave and book your attendance time at the company in the role of the employee.

Employees involved

Sang Cha (Personnel Administrator)

August Faust (Payroll Officer)

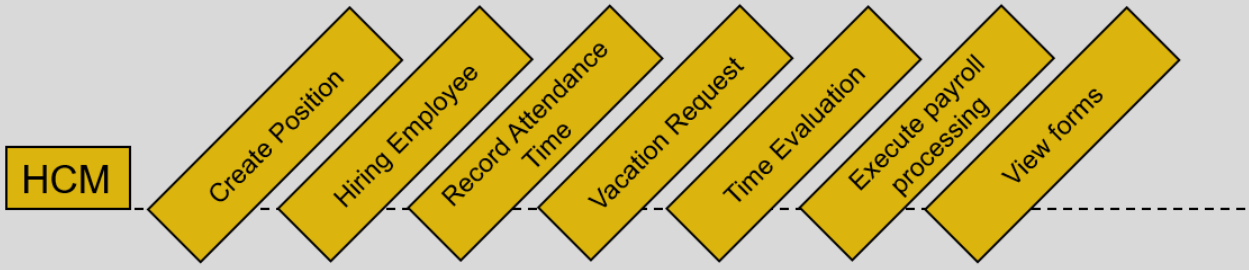

Employee – Marketing Manager (EMPL-###)

Before you start the payroll accounting process, a new position (Marketing Manager) must be created. An employee is then hired in Germany to take over the position of Marketing Manager. Here we look at which Infotypes have an influence on the final payroll run.

This includes:

- Infotype for Working hours
- Base Salary
- Bank Details
- Infotype for Capital Formation
- Taxes and Social Insurance
- Workers Compensation Association

The following chart presents the complete process.

Note The payroll process is carried out in accordance with German law.

Table of Contens

Process Overview 2
Step 1: Create Position 4
Step 2: Hire Employee 9
Step 3: Record Attendance Times 21
Step 4: Vacation Request 24
Step 5: Time Evalutation 27
Step 6: Execute Payroll Processing 30
Step 7: View Forms 33

Step 1: Create Position

Task Create a new position within the organizational structure. **Time** 15 min.

Short Description Use the SAP Fiori Launchpad to create a position for the marketing department.

Name (Position) Sang Cha (Personnel Administrator)

Note Positions are filled by employees. If a position is not filled, it is vacant. Positions are assigned to organizational units.

Example: Position administrator of accounts payable accounting.

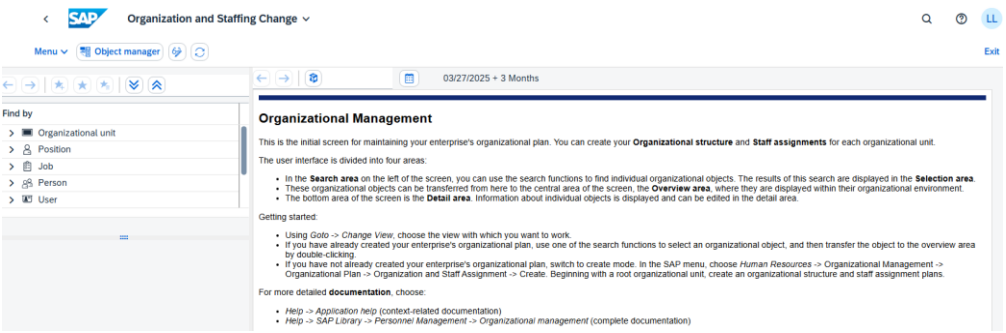

Positions

To create a position, use in the *Human Capital Management* area on the *Personnel Management* page in the *Senior Personnel Administrator* role the app *Organizational Management.*

Start

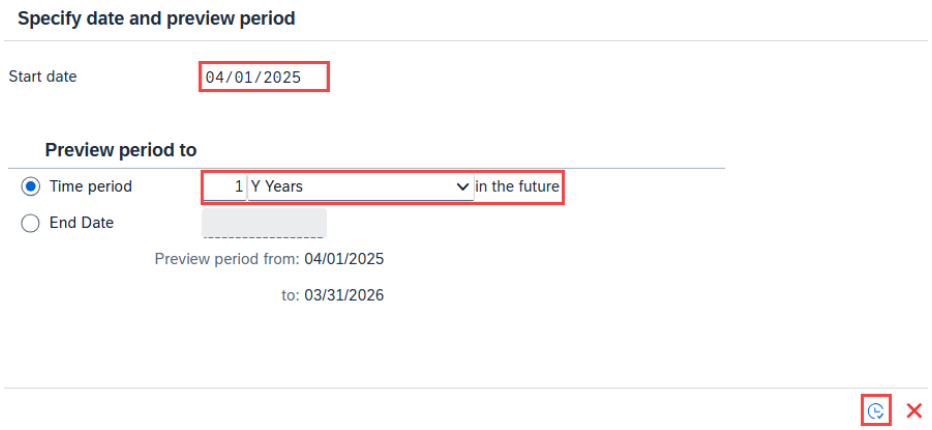

The *Organization and Staffing Change* screen appears.

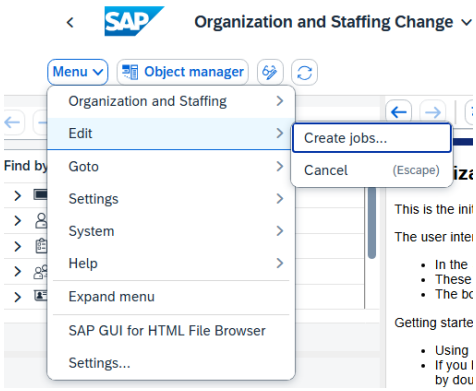

To create positions with backdated validity, first change the preview period. To do this, click on and enter the **1st of the last month** as the start date. Also select a preview period of **1 year** in the future and then click on .

1st last month
One year

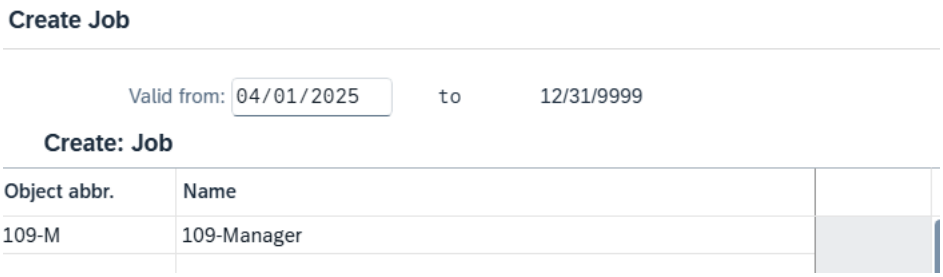

Note While positions represent the specific positions to be filled by holders in a company (e.g. marketing manager), jobs are general classifications of functions in a company (e.g. clerk) that can be defined in more detail by assigning characteristics. They therefore provide job descriptions that apply to several positions with comparable tasks and characteristics. As soon as a job has been created, you must define the corresponding number of positions required in the company. The job from which the position is to take over tasks/characteristics must be linked to the respective position. (e.g. authorizations). You have the option of defining further tasks that are only to be carried out by this position.

Create two jobs by navigating via the drop-down menu. On the left-hand side of the screen you will find the **Menu item → Edit → Create jobs.**

A Create job window opens, enter **###-M** in the Object abbreviation field. Please define your own designations. Remember to enter your three-digit number for ###, e.g. if your number is 109, please enter 109.

###-M

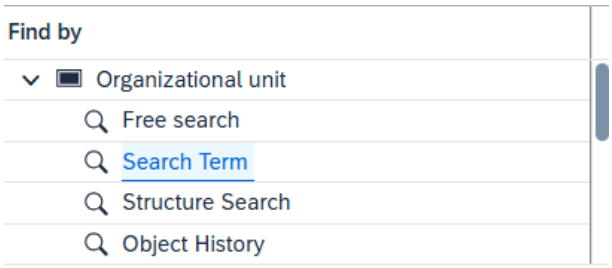

Then save the new jobs with ✓. You will receive a message that the object have been created, confirm this with ✓.

Press Save to save your newly created jobs.

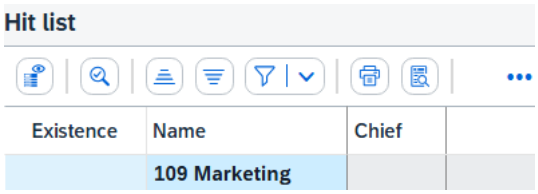

Note Jobs are general classifications of functions in a company (e.g. clerk). They define the task and characteristics of a position independently of a specific filling. A job serves as the basis for creating several positions with comparable requirements and forms the basis for job descriptions. The job must be saved so that the subsequent steps, such as the creation of positions, can be carried out.

The positions should be created in the Security department. To do this, go to the search area *Search for* **Organizational unit → Search Term.**

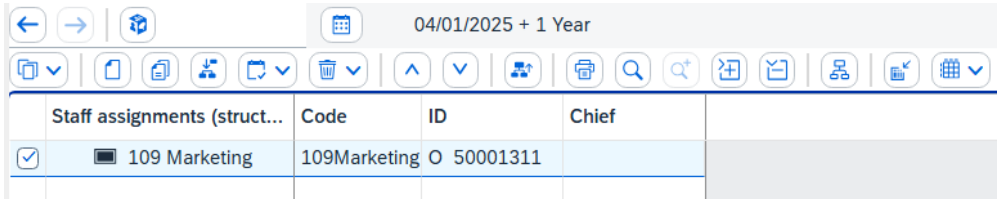

In the pop-up Search for organizational unit that opens, enter **### Marketing** (replace ### with your number) in the field *with name* and press ✓ Find . The search result is displayed in the hit list of the selection area on the left-hand side of the screen.

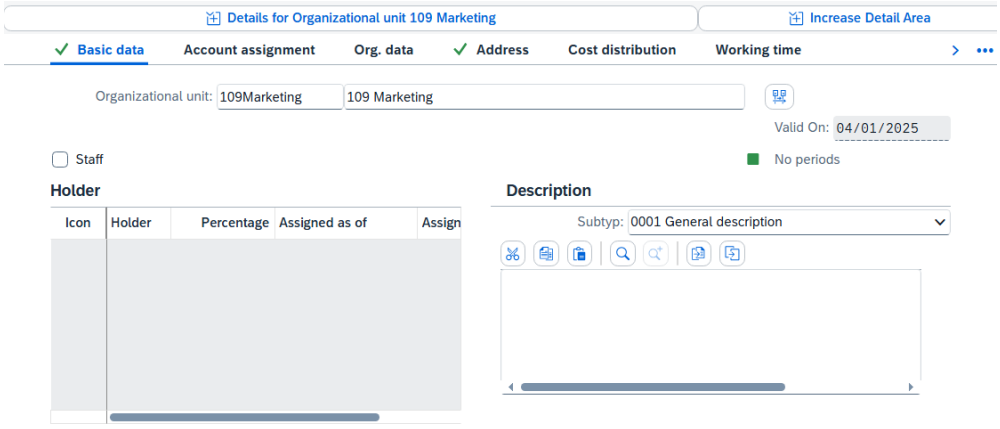

Marketing

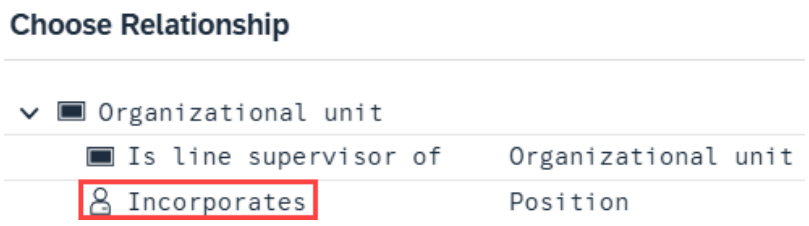

Select your organizational unit from the selection area by double-clicking on it so that it is displayed in the central overview area.

The basic data of your organizational unit *### Marketing* is displayed in the detail area.

Select your organizational unit in the overview area and click on in the context menu to create a new link. In the *Choose Relationship* window that opens, click on Incorporates .

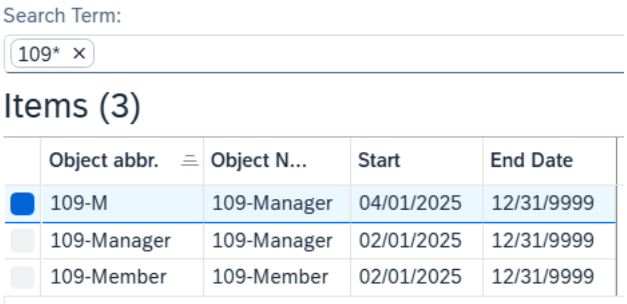

A new position is created under your organizational unit *### Marketing*. You will now see the information for the new position in the detail area. For Position, enter **### MM** as the abbreviation in the field on the left **and ### Marketing Manager** as the name in the field on the right. Also activate the **Head of own organizational unit** checkbox. Delete the default value in the Job field, enter **###*** and start the value help. In the new window, press Go, select the job **###- Manager (###-M)** and double-click.

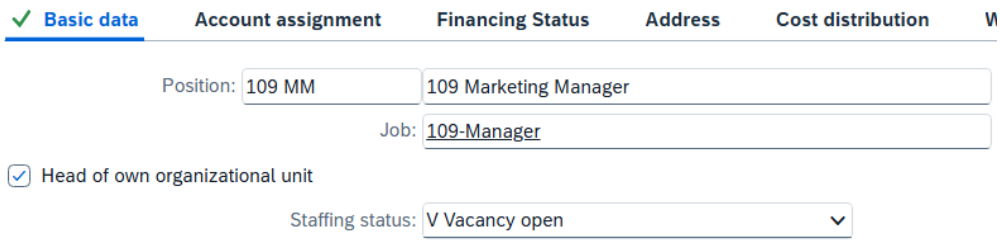

MM

Marketing Manager

Head of own organizational unit

###-Manager (###-M)

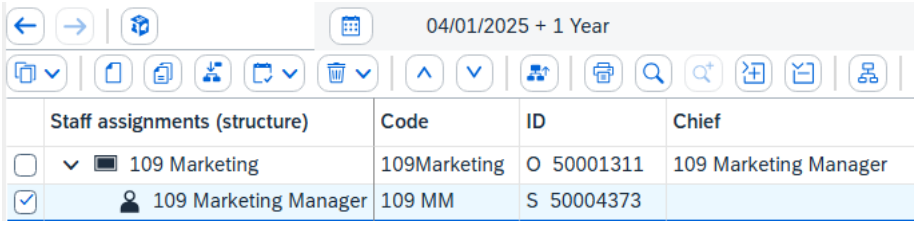

The **1st of the last month** is automatically entered in the Valid from field, provided you have adjusted the start date accordingly at the beginning.

1st of the last month

Press Save to save your new position. As you may have noticed, the overview area has already been updated during editing.

Press Save to save your data.

Click on SAP to return to the SAP Fiori Launchpad.

Step 2: Hire Employee

Task Hire an employee. **Time** 15 min.

Description Use the Fiori Launchpad to hire an employee in the new marketing department.

Name (Position) Sang Cha (Personnel Administrator)

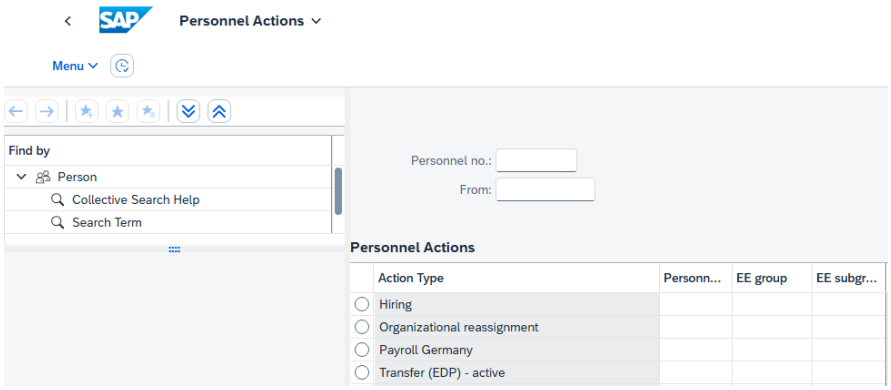

To hire the employee, use in the *Human Capital Management* area on the *Personnel Management* page in the *Senior Personnel Administrator* role the app *Hiring/transfer Employee.*

Start

Make sure that the *Personnel number* field is empty and enter **1st of the last month** as the start of employment.

1st of the last month

Then select the **Payroll Germany** in the Action type list and fill in the 3 columns next to it, using the value help. *For personnel area* **HH00** (Global Bike Hamburg), as *employee group* **1** (*Active*) and as *employee subgroup* **DS** (*Executive employee*).

HH00
1
DS

Personnel Actions

	Action Type	Personn...	EE group	EE subgr...
○	Hiring			
○	Organizational reassignment			
◉	Payroll Germany	HH00	1	DS
○	Transfer (EDP) - active			

Then press to create the action. In the Personnel action area, enter **01** as the *reason for the action.* Now focus on the Organizational assignment area. Now click on the value help symbol in the Position field.

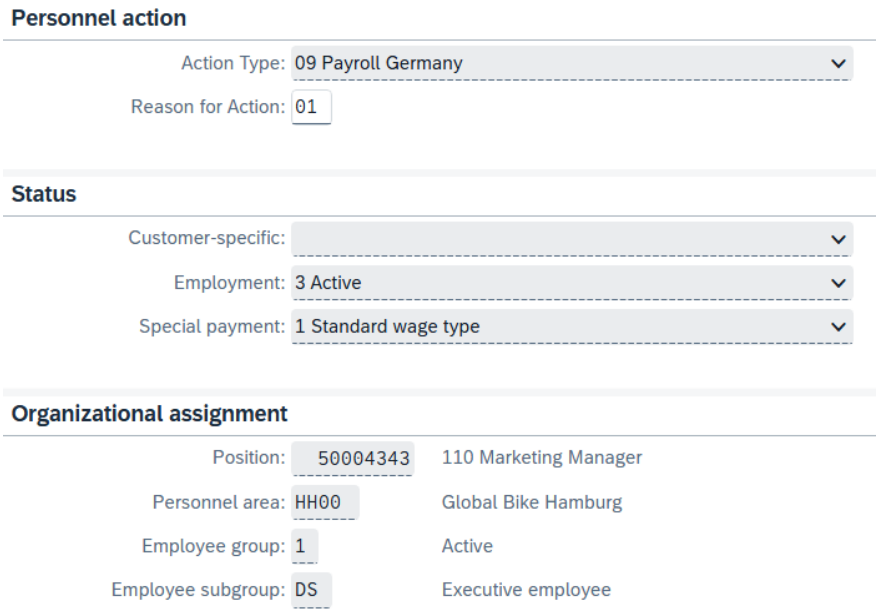

0101

In the *Position (1)* window that opens, replace the search term with ###* and then select the ### **Marketing Manager**. Remember to enter your three-digit number for ###, e.g. if your number is 109, please enter 109.

###*
Marketing Manager

Confirm the selection with OK.

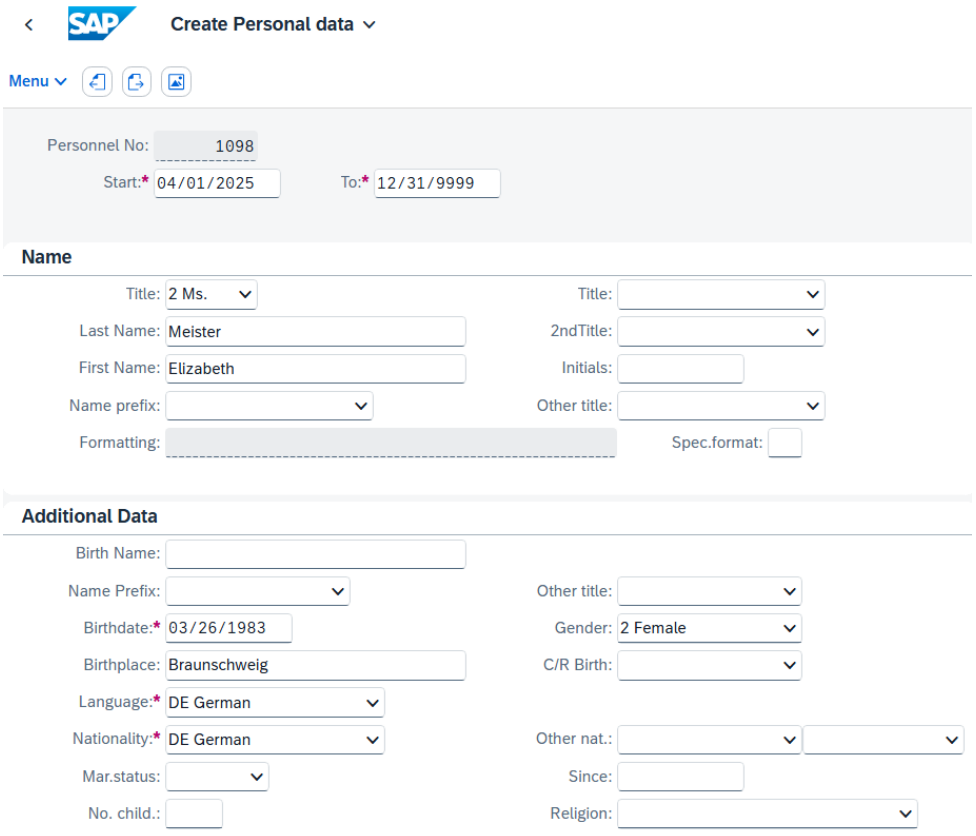

Press Save to save the action. You are automatically directed to the *Create Personal data* screen. Make a note of the employee's personnel number, which you can find in the *Personnel number*. field at the top of the screen.

Personnel number: _____

Note Personal information such as surname, first name and date of birth are defined in data fields. Data fields are grouped into information units according to their content. In Human Resources, these information units are referred to as information types or infotypes for short. Infotypes for employees are managed in Personnel Administration and are linked to the organizational plan via their position assignment**.**

Determine the salutation and enter a **title**, **surname**, **first name** and **place of birth** of your choice. Enter a **date of birth** and select **german** as the nationality. Finally, you can select the appropriate **gender** if you wish.

title, surname
first name, place of birth
date of birthdate of birth
german
gender

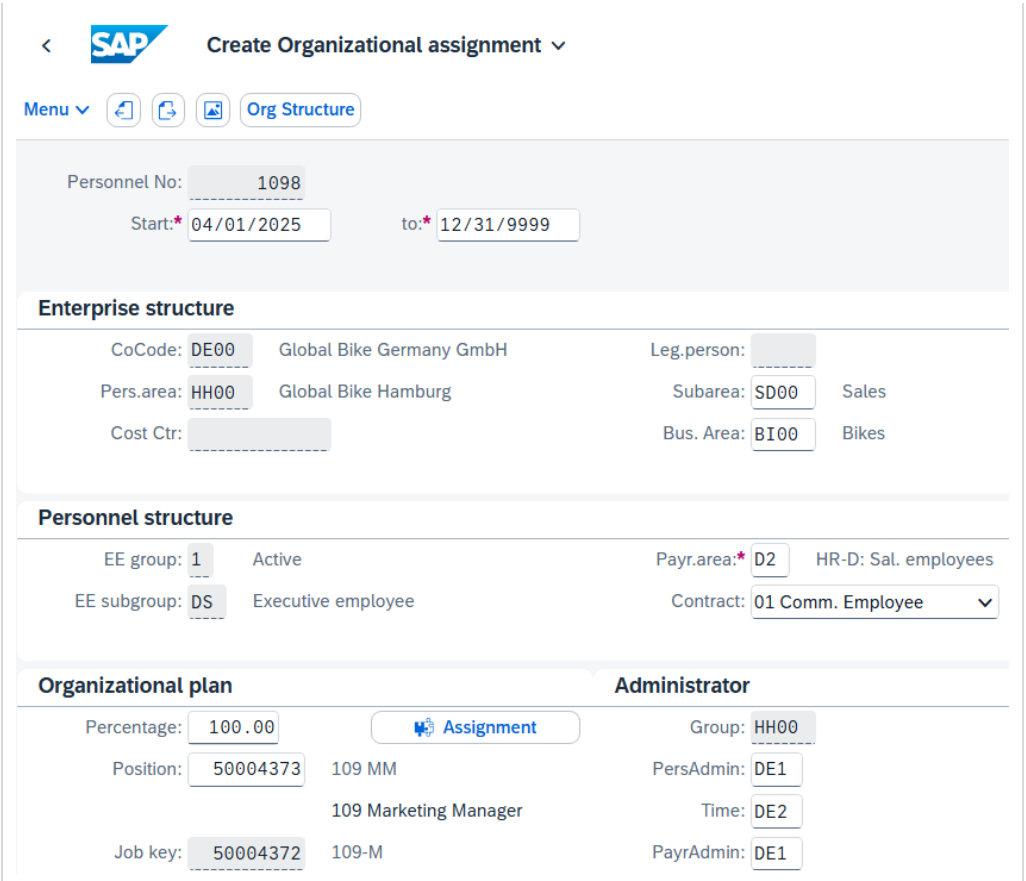

Press Save to confirm your data for this infotype.

In the Enterprise structure area, **SD00** should already be entered as the *Subarea*, otherwise correct this. In the Personnel structure area, select **Comm. employee** as the *Contract*. In the Administrator area, also use the value help to select **DE1** as *PersAdmin*, **DE2** for *Time* and **DE1** for *PayrAdmin.*

SD00

Comm. employee

DE1,DE2,DE1

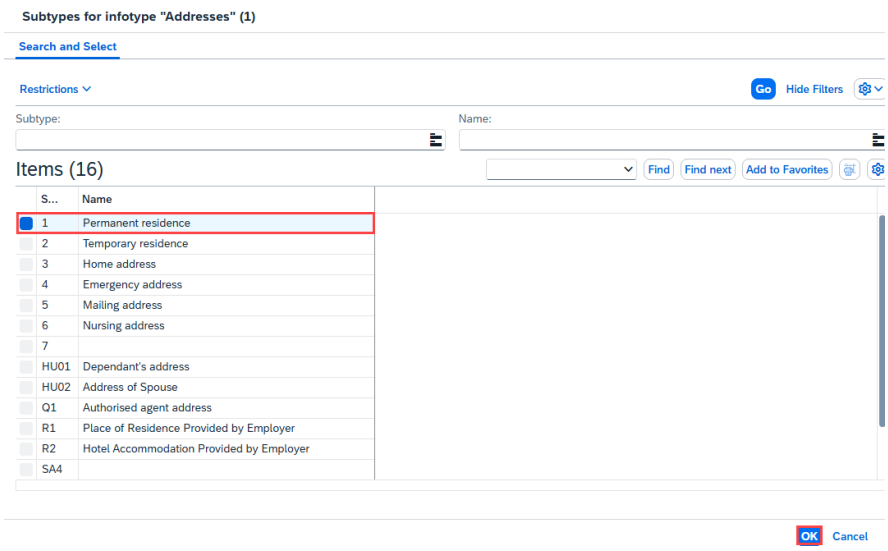

Note Legal entities, personnel areas, and personnel subareas are central to human resources processes. Assignment to a personnel subarea determines characteristics such as membership in collective bargaining agreements, holiday calendars, and legal entities. Assignment to employee groups and circles controls processes such as payroll accounting, time management, statistical evaluations, and authorization assignments.Since different administrators may be responsible for different human resources processes, different people can be assigned to this infotype.

Select again Save. The *Delimit vacancy* pop-up opens. Confirm the delimitation of the vacancy for your position by clicking on Yes.

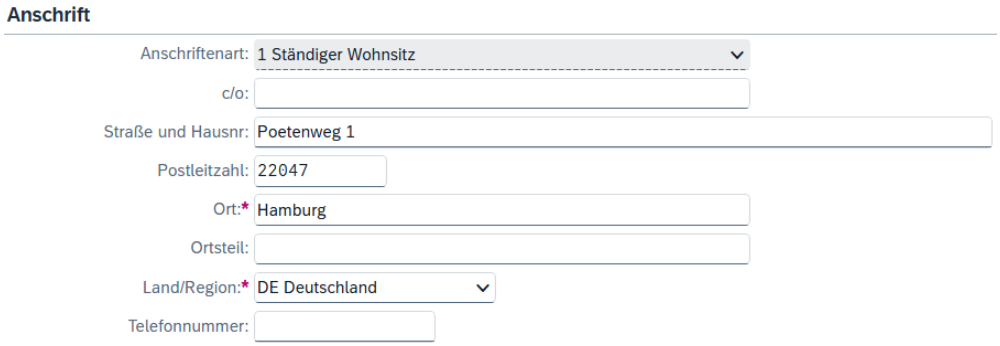

In the *Subtypes for infotype Addresses(1)* window that opens, select **Permanent residence** and continue with OK.

Permanent residence

In the *Create Addresses* infotype, enter data of your choice for the **street** and **house number** in the *Street and House No.* field. Enter **Hamburg** as the *city* and **22047** as the *zip code*.

Straße und Hausnummer
Hamburg
22047

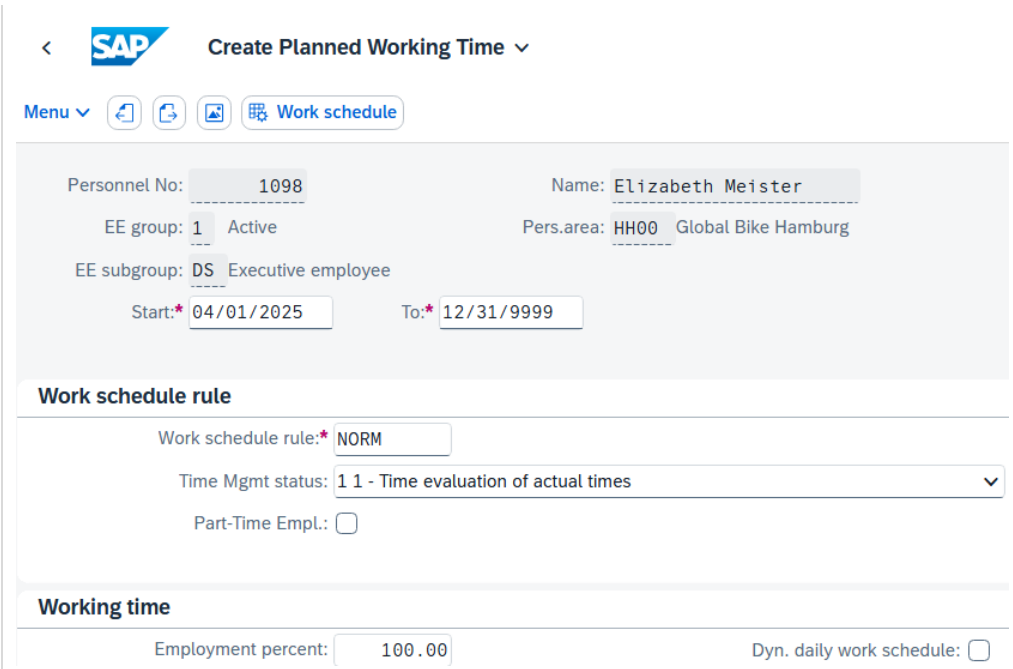

Continue by pressing on Save .

In the following infotype (*Create planned working time*), the employee is assigned to a work schedule rule (shift plan). Our employee works full-time, in the Work schedule rule area the *work schedule rule* is set to **NORM** and the **Time mgmt status** is set to **1 - Time evaluation of actual times** is already preset.

NORM
1

Note Employees can work full-time or part-time in various flextime models or full- or part-time continuous shifts. Assigning employees to work schedules is essential for tracking work hours, determining overtime, and calculating time bonuses for Sunday, night, holiday, and overtime work.

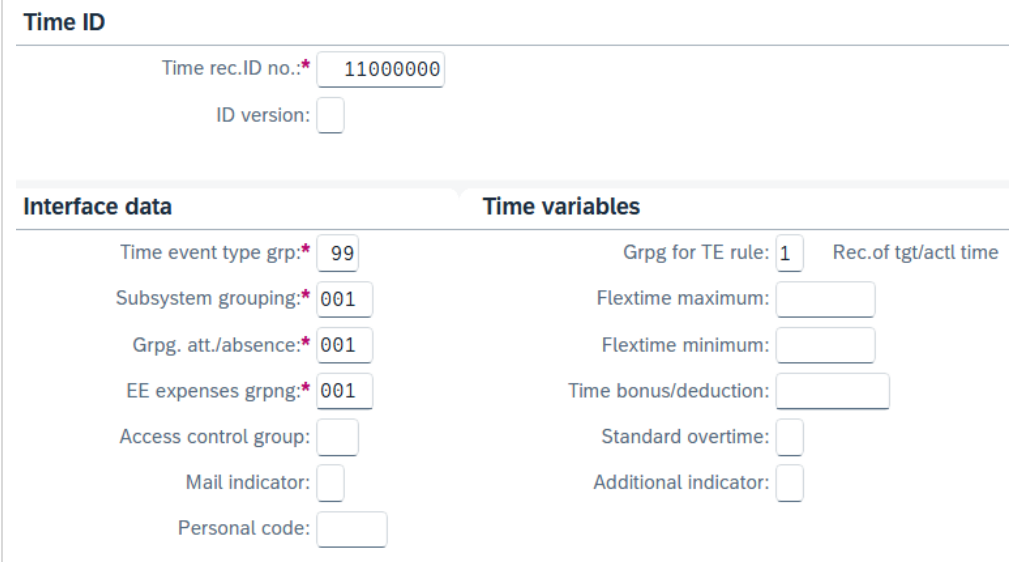

Continue by pressing on Save.

The *Create Time Recording Info* infotype appears. Enter **###00000** as the *time rec. ID no*. In the Interface data area, enter the numbers for *time event type grp* **99**, *Subsystem grouping* **001**, *Grp. Att/absence* **001**, *EE expenses grpng.* **001**. Add **1** (target/actual time entry) to the *Grpg for TE rule*.

###00000

99,001,001

001
1

Note Time recording systems manage the "time card number." SAP offers standard interfaces to its systems for manufacturers. In the SAP system, the time card number is required to link the time recording system to the personnel system.

Continue by pressing on Save.

The employee's salary is defined in the following *Create Basic Pay* infotype. In the *Pay scale* area, select *Type* **90** (Fixed salaries), *Area* **07** (Hamburg), *Group* **001** and *Level* **01**. If you confirm your entries with Enter, you will see

90, 07

001, 01

that the employee is entitled to a fixed salary of 3,500.00 EUR according to the pay scale.

Note In a company with different agreements with different unions, different agreements may apply to different areas (for example, Hamburg, North Rhine-Westphalia). New pay rates are negotiated during collective bargaining. This makes it easier to avoid having to enter the payment adjustments for each person later. The information about how much people are paid is managed in the SAP table structure. The payment rates that are valid at the time are found via the assignment in IT Basic Pay. The "Working hours period" field can be used to calculate partial months. For example, if someone works 40 hours a week, that would equal 173.3 monthly hours. If someone takes time off without pay, their pay will be reduced based on the hours specified here.

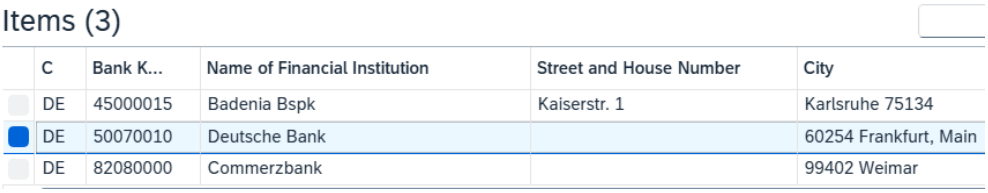

Press Save to save the current infotype

In the new *Create bank details* infotype, you maintain your employee's bank account to which the remuneration is to be transferred.

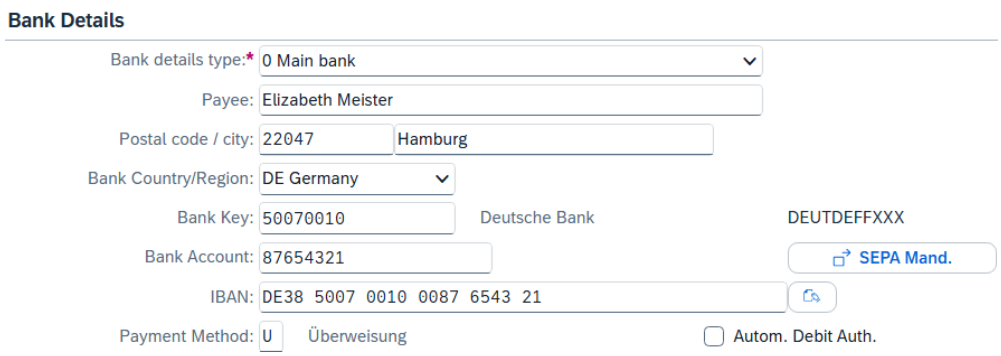

Use the value help in the "*Bank key*" field to search for an existing bank in the SAP system by clicking on .in the popup (*find bank)* to display it. Then select the **Deutsche Bank** entry by double-clicking on it.rück zum Bildschirm *Personalmaßnahmen*.

Deutsche Bank
BLZ: 50070010

Select any **eight-digit number** as the *Bank Account*. Then click on the "Suggest IBAN" button and confirm with , the system will now generate a valid IBAN. A reason for payment is not required - the reason for payment is set automatically as part of the payment runs from payroll accounting.

eight-digit number

Note Since 2008, the SEPA (Single European Payment) procedure has been in effect, a common payment area for cashless payments in EUR. The IBAN, which is mandatory for participation in SEPA, can be generated from the bank code and account number.

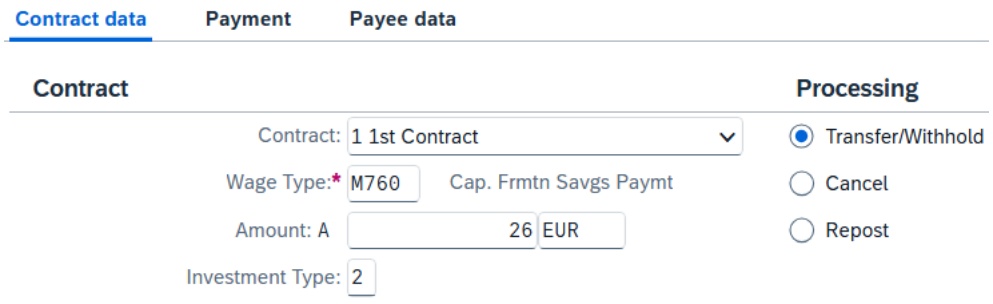

Press Save to save the current infotype

Select **26.00 EUR** as the amount in the *Create capital formation* infotype. Use the value help symbol to select the **2 (building soc. Saving)** *investment type*.

26.00 Euro

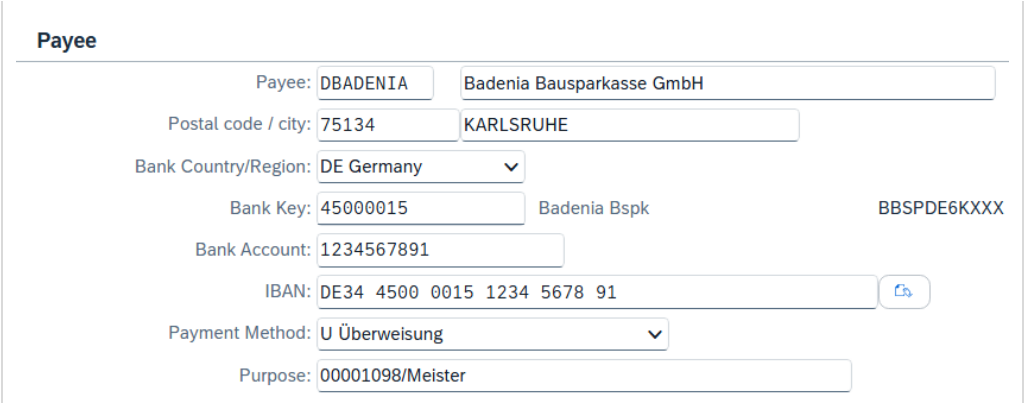

2 (building soc. Saving)

Note Many companies provide subsidies to their employees for capital formation contracts, such as building society savings contracts. This infotype stores the information required for technical processing. SAP offers an alternative option with the IT "Retirement Assets Act D", which stores the information and calculation rules for subsidized direct insurance, direct commitment, pension fund, pension scheme, and support fund implementation methods in accordance with legal requirements.

Switch to the *Payee data* tab. In the *Payee* field, select **Badenia Bausparkasse GmbH** using the value help symbol. Confirm your selection with Enter to have the remaining fields filled in automatically. As you can see, the reason for payment is generated from the personnel number and the surname.

Badenia Bausparkasse GmbH

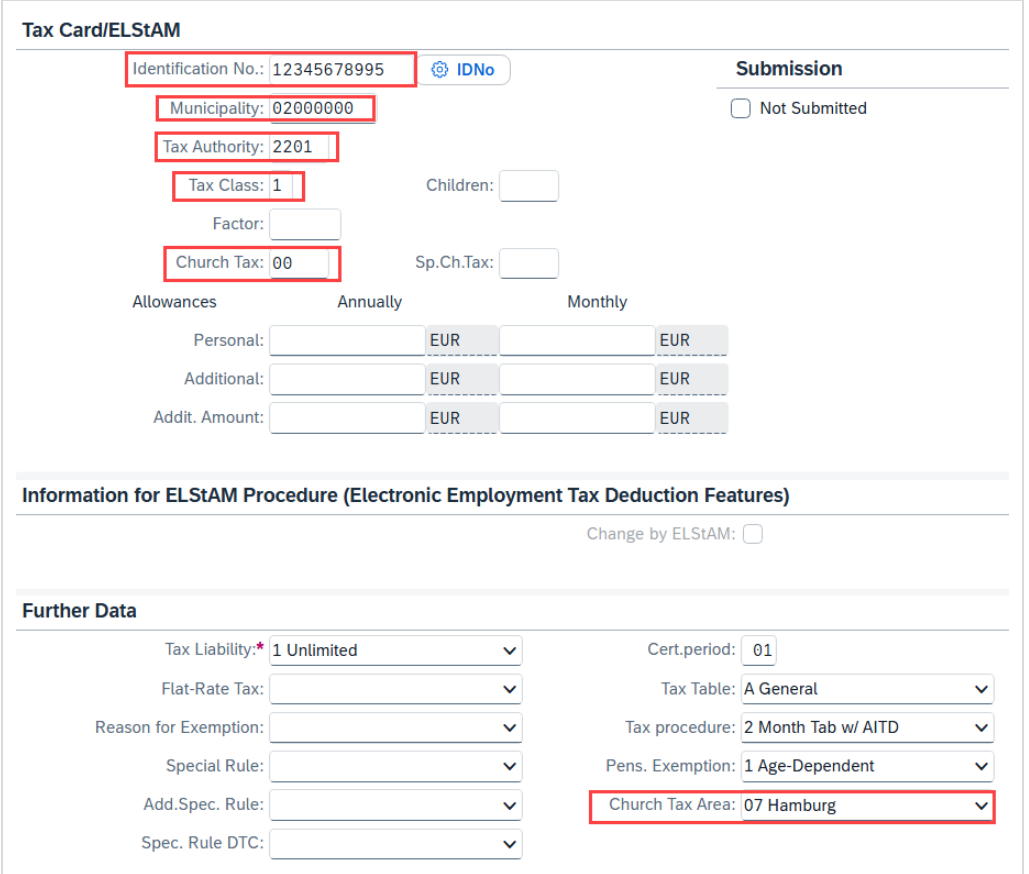

Press Save to save the current infotype

In the following *Create fiscal data D* infotype, data is maintained that is important both for correct tax calculation and for communication with the tax authorities. Enter **12345678995** as the *Identification No.* in the Tax card / ELStAM area. Select **02000000** as the *Municipality* and **2201** as the *tax authority*. The employee's *tax class* is **1** and he/she is not liable for *church tax* **(00).** In the area *further data* as *church tax area* **07** and press Enter.

12345678995

Click on Save to complete the setting process.

Click on SAP to return to the SAP Fiori Launchpad.

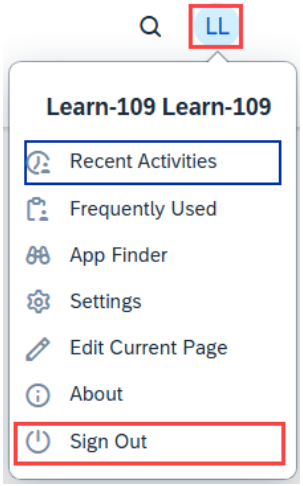

Step 3: Record Attendance Times

Task As an employee “Marketing Manager”, record your attendance times on your first day at the new company. **Time** 10 min.

Description Use the Fiori Launchpad to record attendance times

Name (Position) Employee – Marketing Manager (EMPL-###)

To switch to the Marketing Manager role (you need other authorizations and your user needs to be assigned to the German Company), you must log out. To do this, select your profile picture and choose Log out from the drop-down menu.

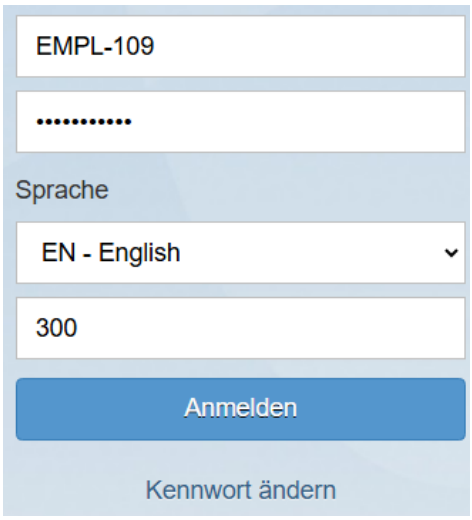

Log in with the user that you assigned in SAP Fiori during the recruitment process (newly hired employee). Change the password for the new user.

Username: **EMPL-###**

EMPL-###

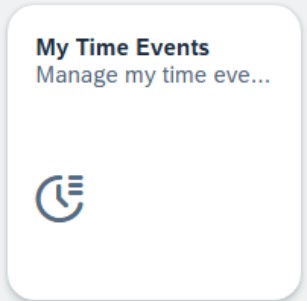

Password: **tlestart**

tlestart

To book attendance times as a Marketing Manager employee, use the *My Time Events* app in the *Human Capital Management* on the *Payroll* page in the Employees role.

Start

Note The following two exercises do not require supervisor approval of attendance times or absences for reasons of simplification.

Confirm the error message with the Close button.

s

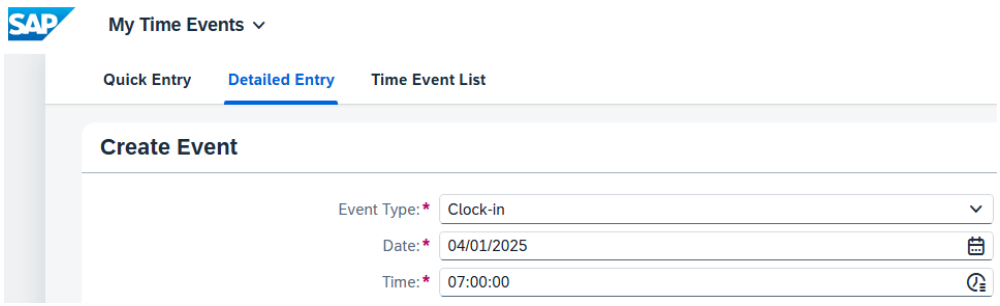

Select the *Detailed Entry* tab and select the value **"Clock-in"-P10** from the drop-down menu in the *Event type* field. For the date, enter the **1st working day of the new employee's month of employment.** In the Time field, click on and enter **07:00:00**.

Clock-in-P10

1st working day of the new employee's month

07:00:00

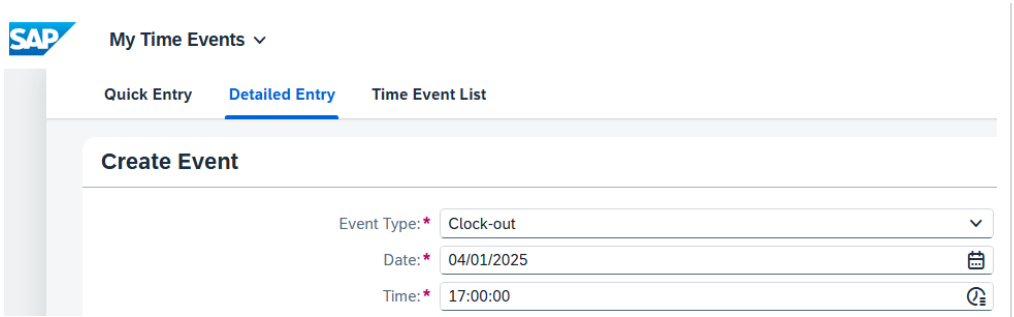

Click on Save to save the entry, then confirm with OK.

Repeat the process and select **"Clock-out"-P20** as the *Event Type*. For the date, enter the **1st working day of the new employee's month of employment**. In the Time field, click on and enter **17:00:00.**

Clock-out-P20

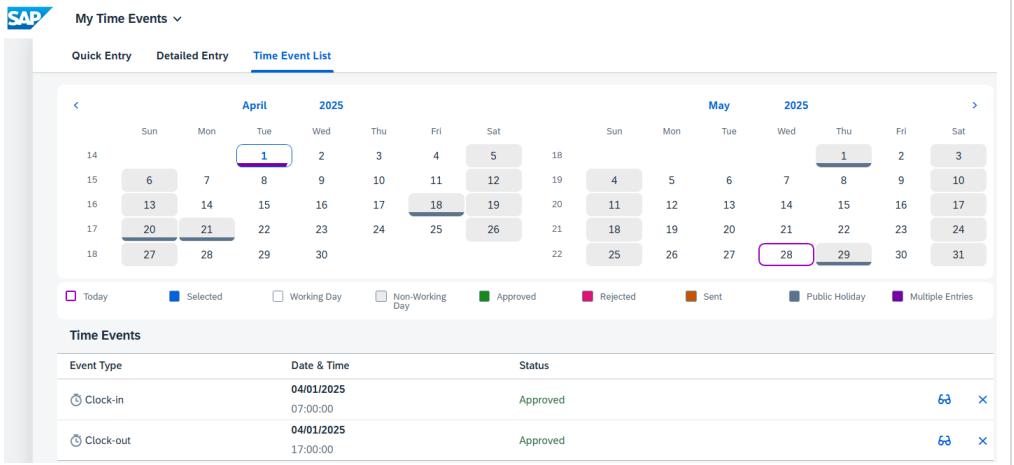

1st working day of the new employee's month

17:00:00U4

Click on Save to save the entry, then confirm with OK.

Check the time bookings made in the Time event list tab.

Click on SAP to return to the SAP Fiori Launchpad.

Step 4: Vacation Request

Task As a marketing manager, book vacation for the remaining working days in the first month.

Time 10 min.

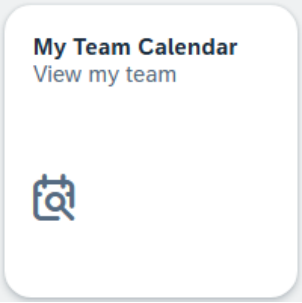

Description Nutzen Sie das SAP Fiori Launchpad, um Urlaub zu beantragen

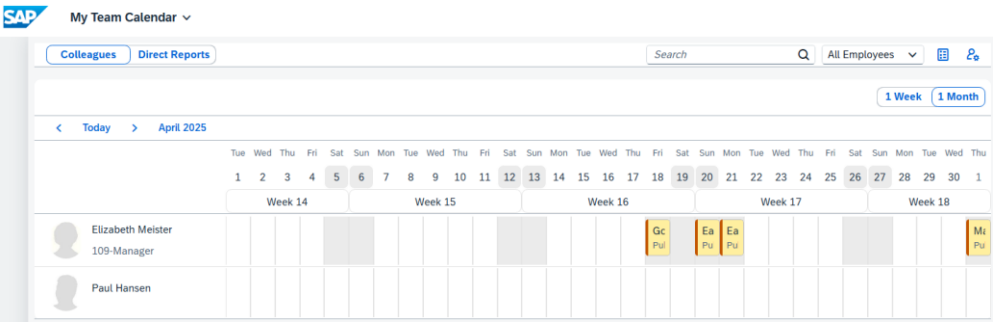

Name (Position) Employee – Marketing Manager (EMPL-###)

For better coordination and to avoid overlaps, the attendance situation of colleagues on the days in question should be checked in the team calendar before submitting a vacation request.

To check attendance, use the *My Team Calendar* app on the *Payroll* page in the Employees role in the *Human Capital Management* area.

Start

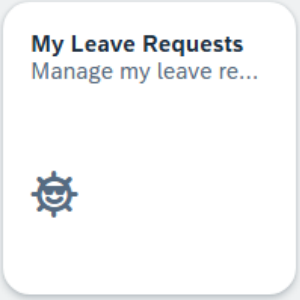

The team calendar shows that Mr. Paul Hansen is present for the entire month. The leave request can therefore be submitted without any overlaps. Go back to Fiori Launchpad.

Um einen Urlaub zu beantragen, verwenden Sie im Bereich *Personalwirtschaft* auf der Seite *Personalabrechnung* in der Rolle *Mitarbeiter* die App *Meine Abwesenheitsanträge*.

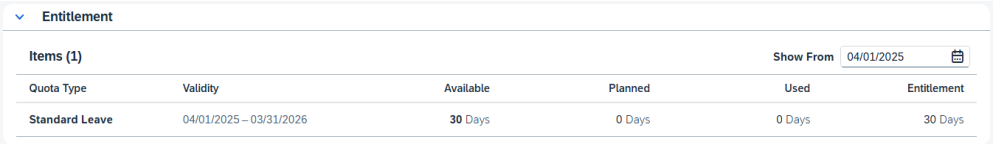

To request for vacation use the *My Leave Requests* app in the *Human Capital Management* on the *Payroll* page in the Employees role.

Note The attendance times are initially saved in the “Workflows application database”. The posting to the employee, in the corresponding infotypes, must be carried out separately. Once all course participants have completed the exercise, the updates are started centrally.

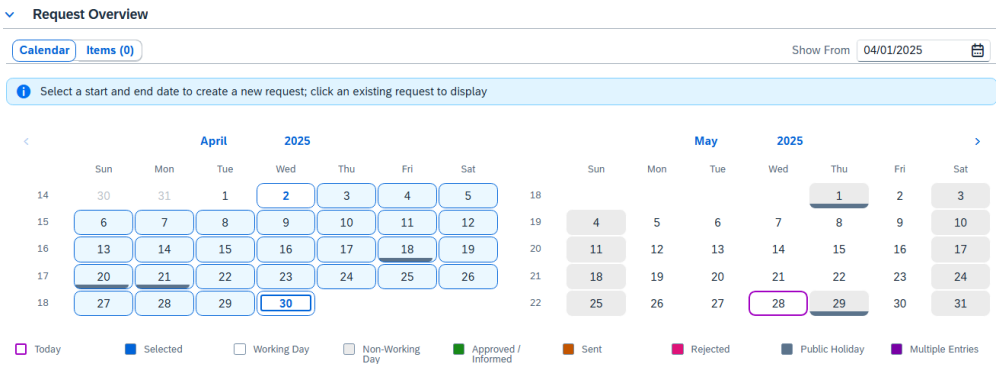

Change the date in the *Entitlement* area to display the open vacation days. Use the icon and select the **1st of the month of employment**. You will see that the employee has not yet taken any vacation days and that all of them are still available.

1st of the month of employment

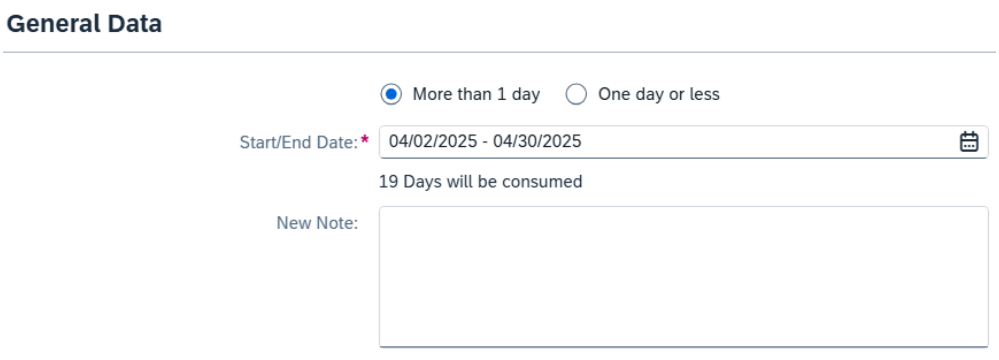

To apply for leave for the rest of the month, click on the *Calendar* tab in the *Request overview* area. Then, click on the **2nd working day** and **the last day of the month**.

2nd working day
the last day of the month

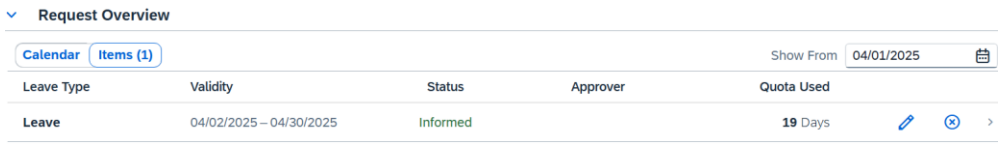

The Create request overview appears. In the General data area in the *Start/end date* field, the period of leave and how many days of leave will be taken are displayed.

Press Save to save the entries.

Items

Check the entries by clicking on **Items** in the *Request overview* area.

Click on  to return to the SAP Fiori Launchpad.

Step 5: Time Evalutation

Task Carry out the payroll accounting of the time management results for the newly hired employee

Time 10 min.

Description Use the SAP Fiori Launchpad to carry out the time evaluation for your newly hired marketing manager.

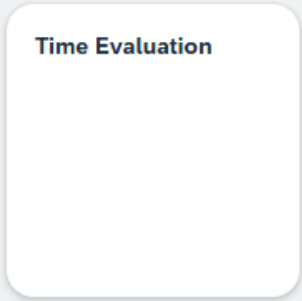

Name (Position) August Faust (Payroll Officer)

Use the *Time Evaluation* app in the *Human Capital Management* area on the *Payroll* page in the *Payroll Officer* role.

Start

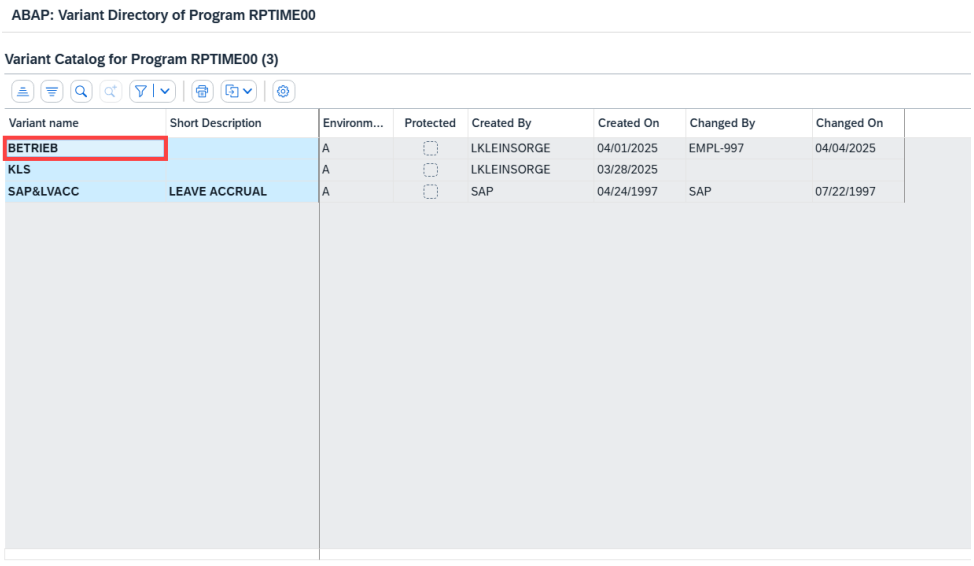

Note To simplify matters, you stay logged in with the EMPL user. You just assume the role of Payroll Officer.

You receive a complete time evaluation for one month, i.e. the evaluation of your employee's attendance/absence/overtime.

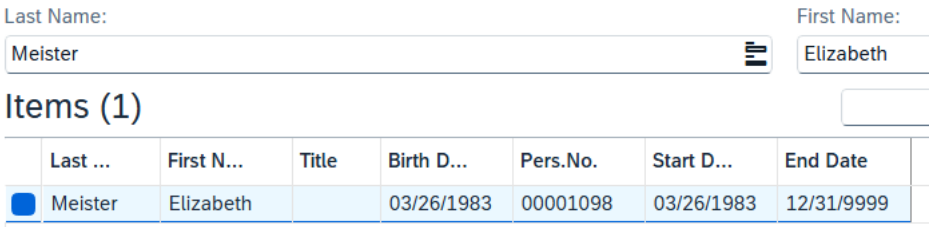

Select the **BETRIEB** variant by clicking on and confirm with .

Betrieb

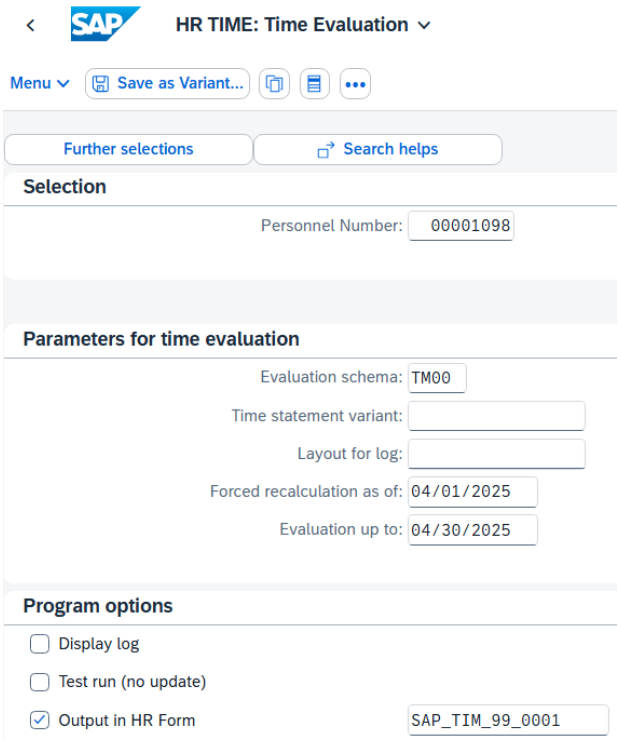

In the *Selection* area, enter the newly hired employee in the *Personnel Number* field. If you no longer know the personnel number, click on the value help symbol and enter the name.

Personnel Number

Then enter the **1st day of the hiring month** and the **last day of the hiring month** in the *Parameters for time evaluation* area for the *Forced recalculation as of* and *Evaluation up to* fields. Delete the entry from the *Time statement variant* field.

1st day of the hiring month
last day of the hiring month

Create the time evaluation by clicking on Execute.

Click on  to return to the SAP Fiori Launchpad.

Step 6: Execute Payroll Processing

Task Execute payroll accounting for the newly hired employee **Zeit** 10 Min.

Description Use the SAP Fiori Launchpad to run payroll for your newly hired marketing manager.

Name (Position) August Faust (Payroll Officer)

To execute a time evaluation, use the *Payroll for Germany* app in the *Human Capital Management* area on the *Payroll* page in the *Payroll Officer* role.

Start

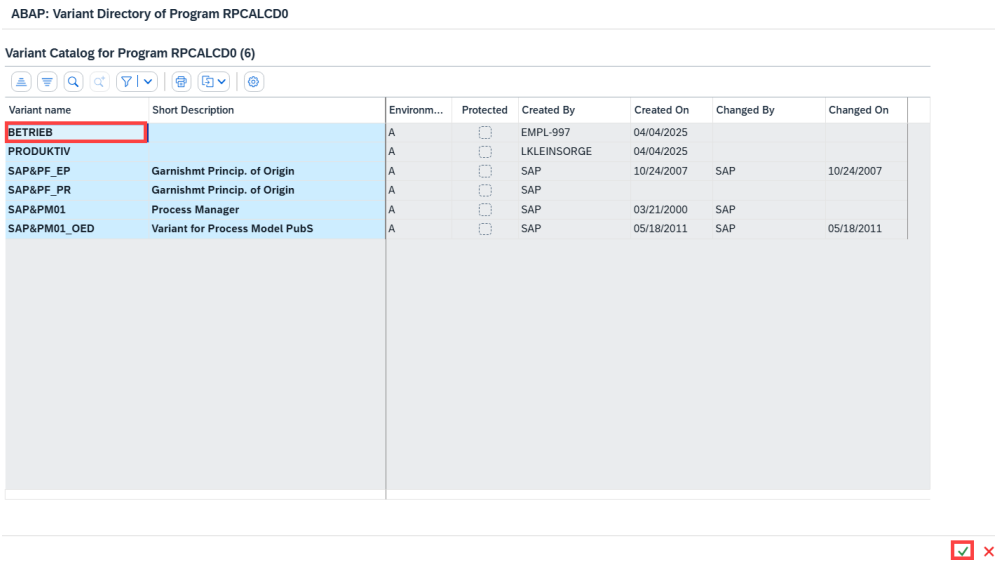

Note In general, payroll accounting is concerned with calculating the remuneration for the work performed by each employee. It comprises a large number of processes, including the creation of payroll results and salary statements as well as transfers or payments to employees, the transfer of results to financial accounting/controlling and thus the debiting and crediting of accounts and cost centers, as well as payments to social insurance, the sending of contribution statements to the health insurance fund and much more.

You receive a complete payslip for one month

The *Payroll Program-Germany* overview appears. Select the **BETRIEB** variant by clicking on and confirm with .

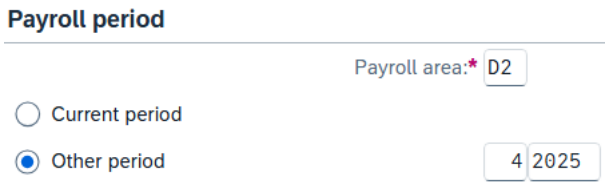

Betrieb

In the *Payroll period* area, use the value help icon to select *payroll area* **D2** (HR-D: Sal employees) the "Payroll area" was assigned to the employee in the "Organizational assignment" infotype. Change the selection to **Other period** and specify the month in which you have hired the employee as the payroll period.

D2

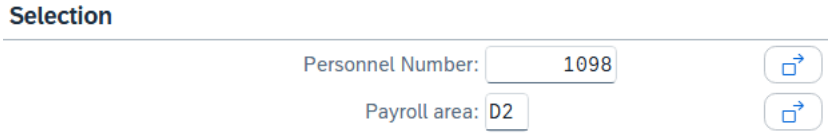

Other period

In the *Selection* area, enter the **personnel number** of your Marketing Manager and select **D2** in the payroll field again. Compare your entries with the following screenshot.

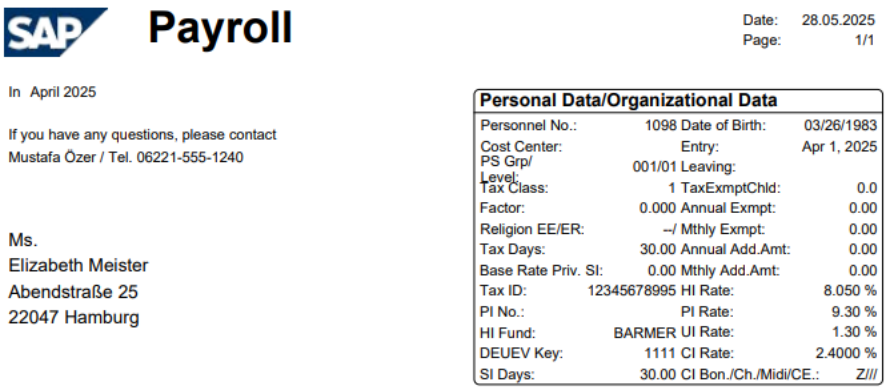

Personnel number

D2

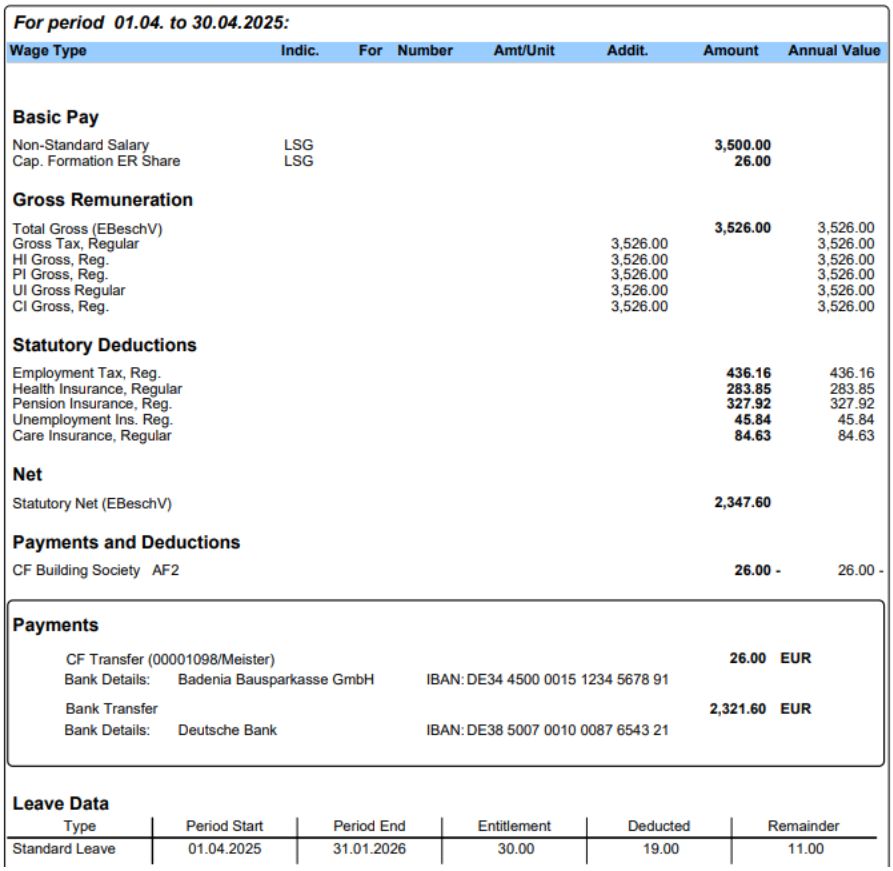

Note If you have not noted your personnel number, you can alternatively use the value help . In the pop-up that opens, enter the name of the new employee and accept it.

Press Execute to execute the calculation. After a short calculation time, the result will be displayed. In the header area, you can see personal and organizational data, for example.

Below, you will also find detailed information about the selected period.

For period 01.04. to 30.04.2025:

Leave Data

Type	Period Start	Period End	Entitlement	Deducted	Remainder
Standard Leave	01.04.2025	31.01.2026	30.00	19.00	11.00

As you can see, the total gross amount includes the employee's fixed salary plus the contribution to capital formation and bonuses for working on a Sunday. There is also a list of the usual deductions under German law to determine the net salary. These include income tax and the employee's social security contributions.

Note The content of the form displayed corresponds to the provisions of the "Remuneration Statement Regulation" in Germany.

Due to the length of the report, you can use the payroll example here to review it without scrolling. You will recognize various items that were included in the previous recruitment process. These include, for example, the 26.00 EUR for capital formation at Badenia Bausparkasse GmbH or the health insurance company Barmer Ersatzkasse.

Step 7: View Forms

Task Take a look at the payroll accounting of the time management results and the remuneration for the newly hired Manager Marketing employee.

Time 5 min.

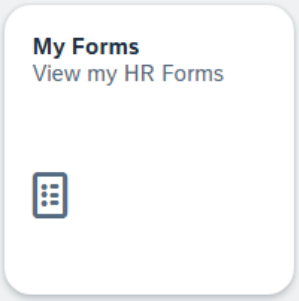

Description Use the SAP Fiori Launchpad to view the corresponding forms of the EMPL-###, the newly hired Marketing Manager.

Name (Position) Employee – Marketing Manager (EMPL-###)

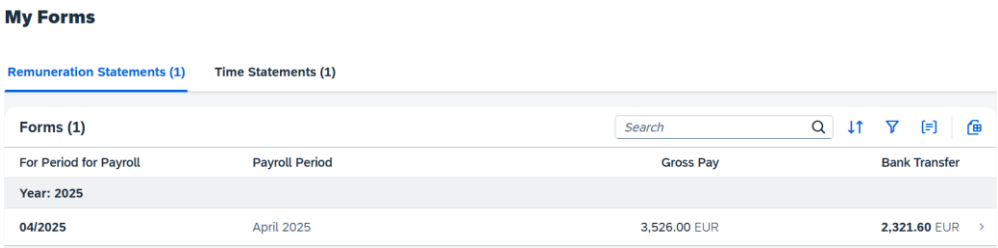

To display the forms, use the *My Forms* app in the *Human Capital Management* area on the *Payroll* page in the *Employees* role.

Start

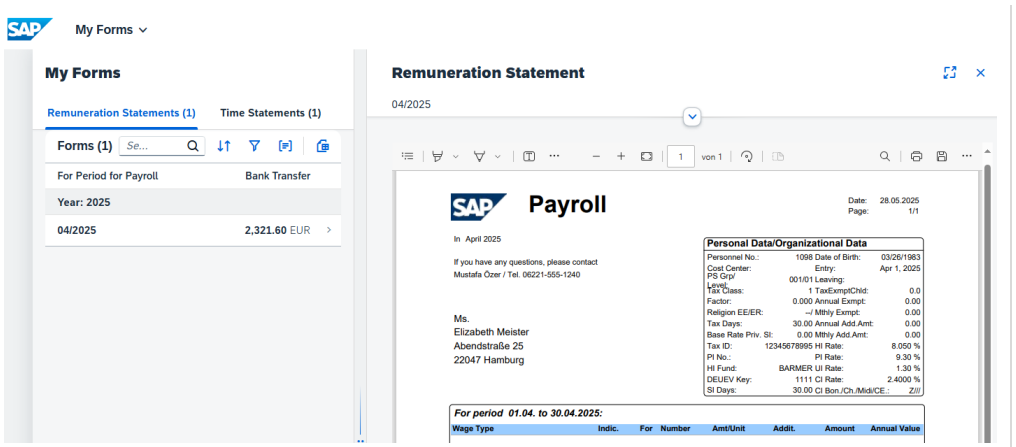

Note In this step, the perspective of the employee (EMPL-###) is assumed again in order to call up the forms.

Please check the *Remuneration Statements* tab to see if your newly created payroll is displayed there.

Click on the displayed form to view the payroll.
