WM 1: Display Storage Bin

Exercise Display a storage bin. **Time** 5 min

Task Use the SAP Fiori Launchpad to display a storage bin.

Name (Position) Carolin Bruzik (Warehouse Supervisor)

Storage bin

A storage bin is the smallest addressable unit in a warehouse. It identifies the exact location in the warehouse where goods can be stored. It can be further sub-divided into bin sections.

Several different materials (quants) can be stored in one bin at the same time. A quant is used to identify a material stock of a particular category in a storage bin.

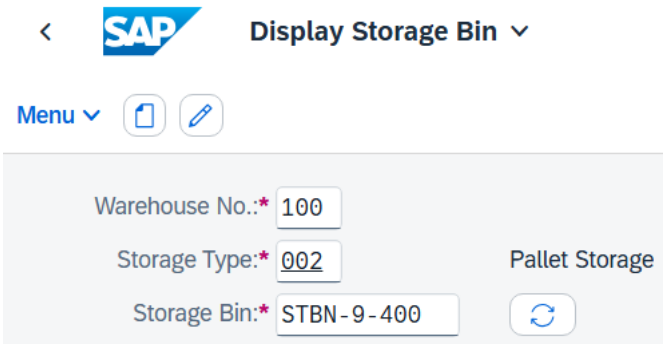

Start

To display a storage bin, use the app *Display Storage Bin* in the *Warehouse Management* area on the *Physical inventory* page in the *Warehouse Supervisor* role.

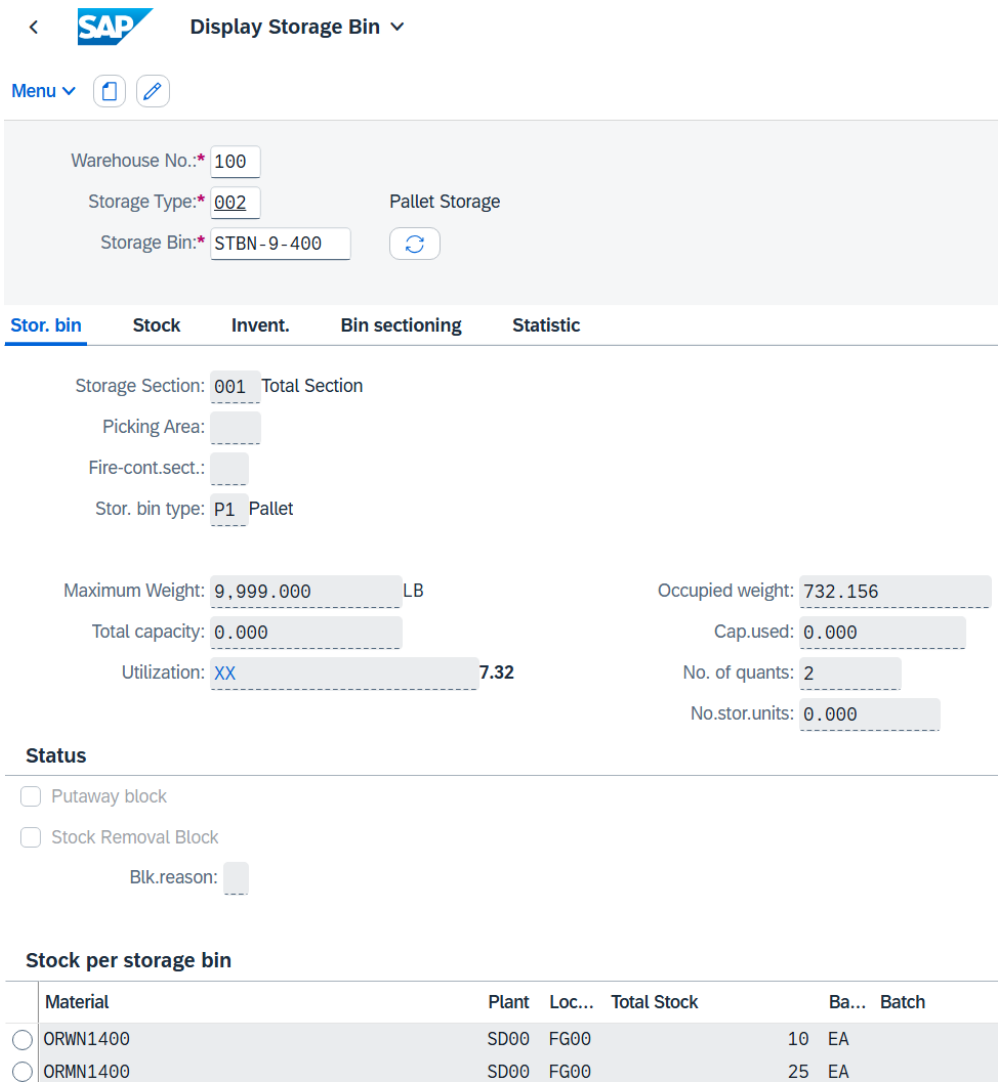

100
002
STBN-9-###

In the *Display Storage Bin* Screen, enter **100** as *Warehouse No*. and **002** (Pallet Storage) as *Storage Type*. Then, enter **STBN-9-###** as *Storage Bin* (replace ### with your number).

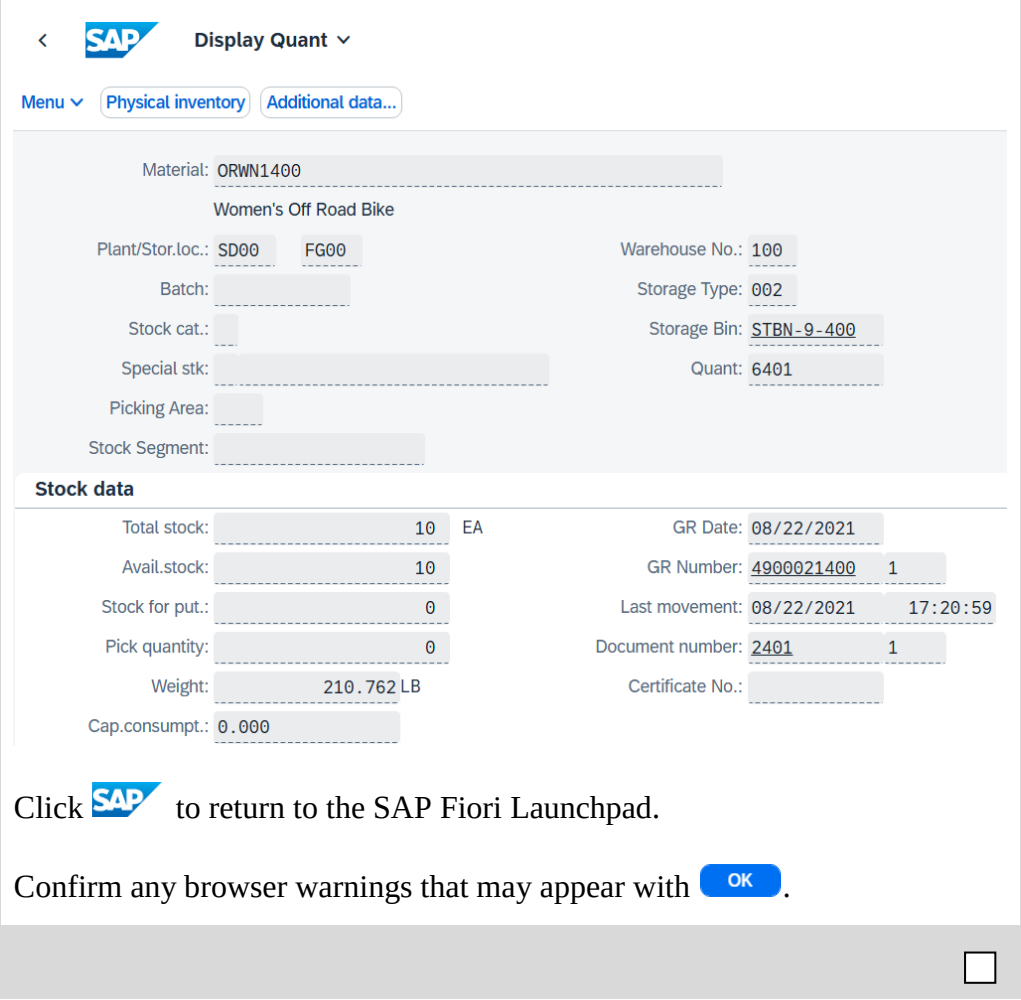

Press Enter to confirm your entries and to refresh the screen. This displays detailed information about the storage bin you selected.

Select the entry of the material ORWM1### and click 

to get a detailed view of the material.

Click SAP to return to the SAP Fiori Launchpad.

WM 2: Run Bin Status Report

Exercise Run a bin status report. **Time** 10 min

Task Use the SAP Fiori Launchpad to run a bin status report and take a look at all bins within the warehouse.

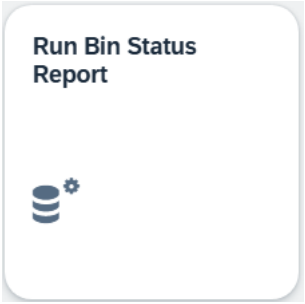

Name (Position) Carolin Bruzik (Warehouse Supervisor)

Bin status report

The Bin Status Report provides current information on the status of your bins. You can use this report for an overview of all your bins or to have a look at bins with a specific good in them.

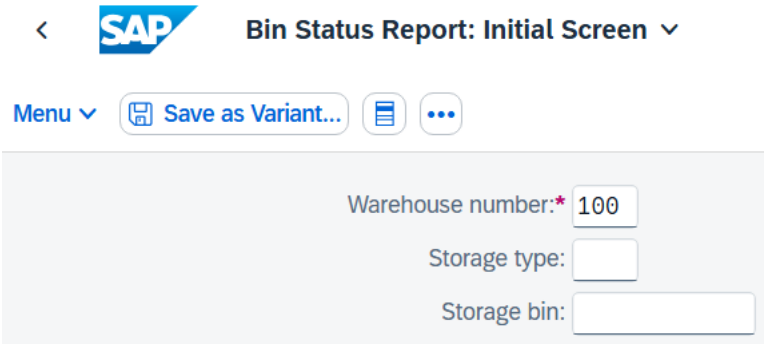

Start

To see the bin status, use in the *Warehouse Management* area on the *Physical inventory* page in the *Warehouse Supervisor* role the app *Run Bin Status Report*.

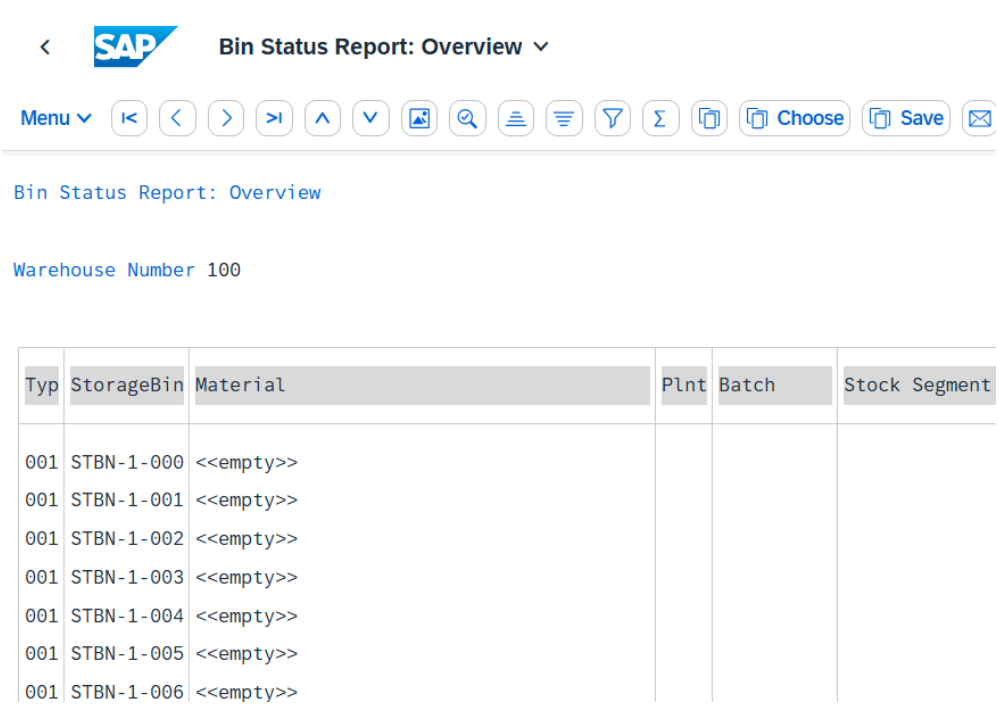

100

In the *Bin Status Report: Initial Screen*, enter **100** (San Diego Warehouse) for Warehouse Number if this has not already been added by the system. Make sure that all other search criteria fields are blank.

Click on Execute. Now you can see a list of all the bins within this warehouse. They are following all the same numbering schema. The table also displays the storage type of each individual bin

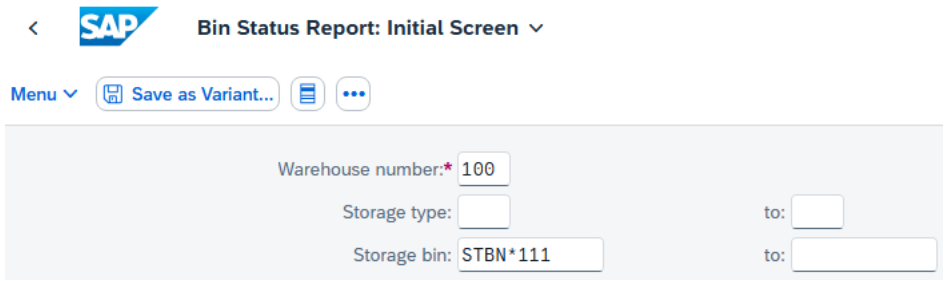

Note: The Bin Status Report may look different depending on whether a Warehouse Management case study has already been completed by you or someone else.

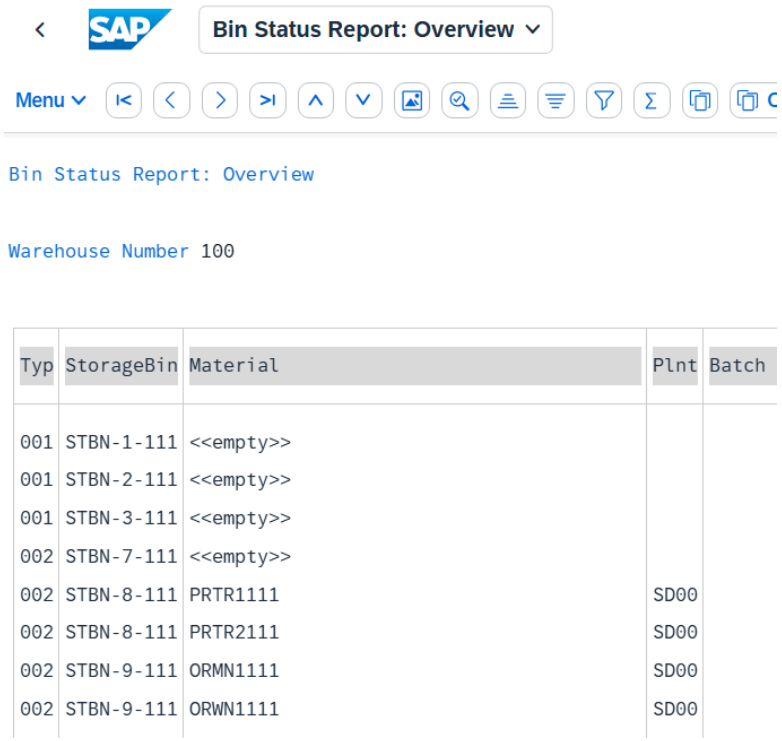

An unfiltered report can contain a lot of bins. Thus, you would like to see your bins only. Because all of your bins end with your number (###), you are able to filter the report. To do so, return to the *Bin Status Report: Initial Screen* by clicking on ‹.

Fill in **100** as Warehouse number and **STBN*###** as Storage bin (replace ### with your number).

100
STBN*###

Then, click on Execute again.

Note: Your bin report might look different dependent whether or not you have already processed a Warehouse Management case study.

If you click on one of the *Storage Bin* entries in the list, you will get the same information screen as in task WM 1.

By clicking on one of the *Material* entries in the list, you will get an information screen, containing detailed information about the quant.

Click SAP to return to the SAP Fiori Launchpad.

Confirm any browser warnings that may appear with OK.
