Warehouse Management (WM) II

This case study explains an integrated warehouse management process, which is triggered by a stock transport order from a manufacturing facility to a warehouse-managed storage location.

MOTIVATION

Warehousing has significant value for logistics.

Current trends such as higher cost pressure, shorter cycles of innovation, higher customer expectations and globalization of markets make great demands on companies, particularly on warehouse logistics. This is especially difficult in industries with high differentiation like the consumer goods industry. Furthermore, customers have increasingly higher demands on reliability, promptness and flexibility of deliveries.

Warehouse management systems support the global flow of goods between the producer and the purchaser and facilitate near fail-proof logistic operations in increasingly complex supply chains.

PREREQUISITES

Before you use this case study, you should be familiar with navigation in the SAP system.

In order to work successfully through this case study, it is not necessary to finish the WM exercises. However, it is recommended.

NOTES

This case study uses the Global Bike (GBI) data set, which has exclusively been created for SAP UA global curricula.

Process Overview

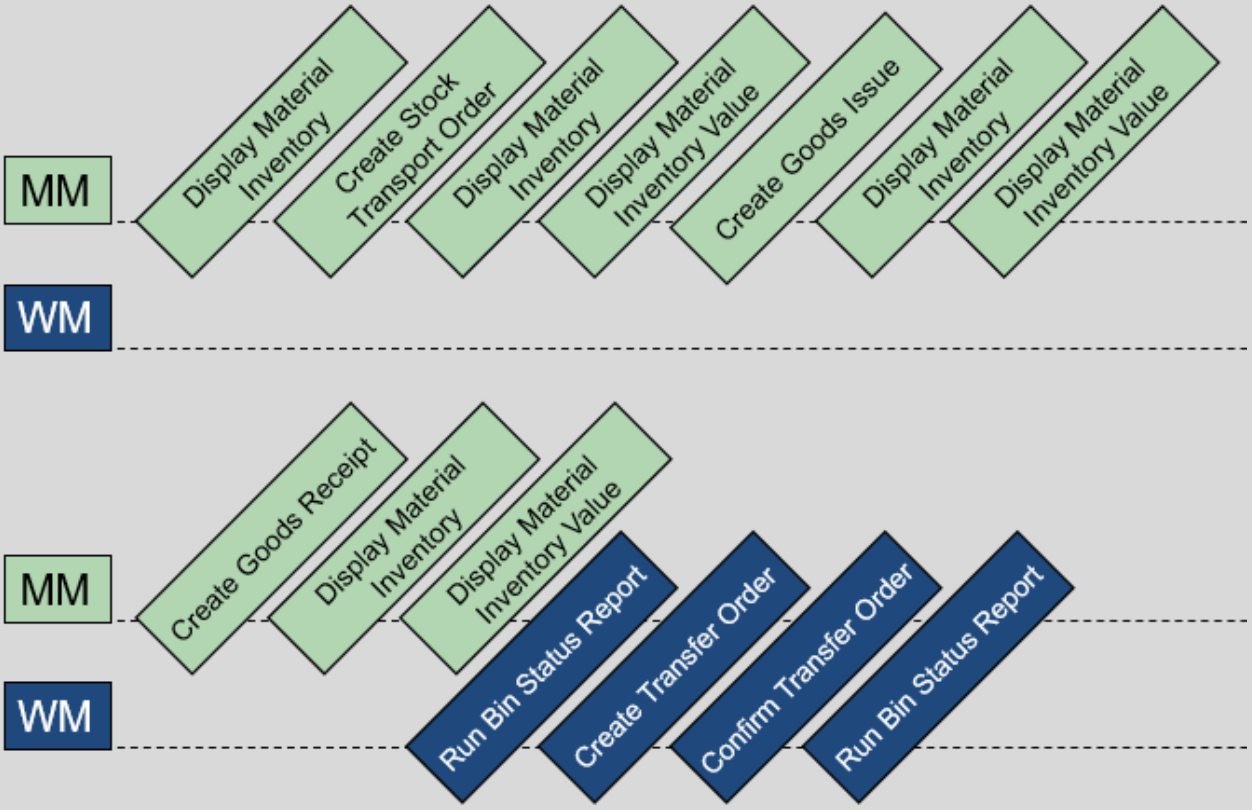

Learning Objective Understand and perform a warehousing process for int. goods

Time 90 min

Scenario Due to increasing sales output in your San Diego distribution center, management has decided to install a Warehouse Management System there. The implementation is completed and now the new system needs to be tested. For this purpose, finished goods should be requested from your manufacturing facility in Dallas and put in stock in San Diego using the new warehouse management system.

Employees involved Carolin Bruzik (Warehouse Supervisor)
Jennifer Brown (Plant Manager)
Sanjay Datar (Warehouse Employee)
Yoshi Agawa (Goods Receipt Clerk)

In order to receive goods from the plant in Dallas you need to create a stock transport order. Dallas will send the goods to the San Diego distribution center. As soon as you perform the goods receipt in San Diego, the system will create a transfer order for the received goods. Due to this order, the Warehouse Management will put the goods into stock. In the end, you can check if the goods have been sorted into the correct storage bins.

Step 1: Display Material Inventory

Task View the inventory of your material. **Time** 5 min

Short Description Use the SAP Fiori Launchpad to display the inventory of your material.

Name (Position) Carolin Bruzik (Warehouse Supervisor)

To display the material stock, use in the *Warehouse Management* area on the *Issue from Storage* page in the *Warehouse Supervisor* role the app *Stock - Single material*.

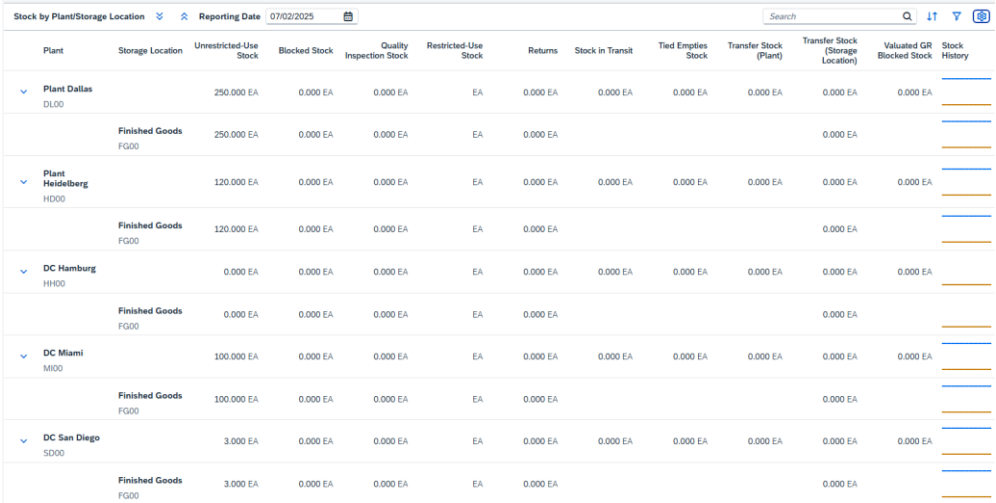

Start

In the *Stock - single material* view, enter **DXTR1###** (replace ### with your number) in the Material field.

DXTR1###

In the following screen you can see the total stock of your material in the warehouse as well as the current stock quantity in the Dallas plant from which you are ordering your material.

Plant	Storage Location	Unrestricted-Use Stock	Blocked Stock	Quality Inspection Stock	Restricted-Use Stock	Returns	Stock in Transit	Tied Empties Stock	Transfer Stock (Plant)	Transfer Stock (Storage Location)	Valuated GR Blocked Stock	Stock History

Write down the stock overview to each plant. Note that your numbers may vary, because of the case studies you performed before.

Plant Dallas

_____

Plant Heidelberg

_____

Plant Hamburg

_____

Plant Miami

_____

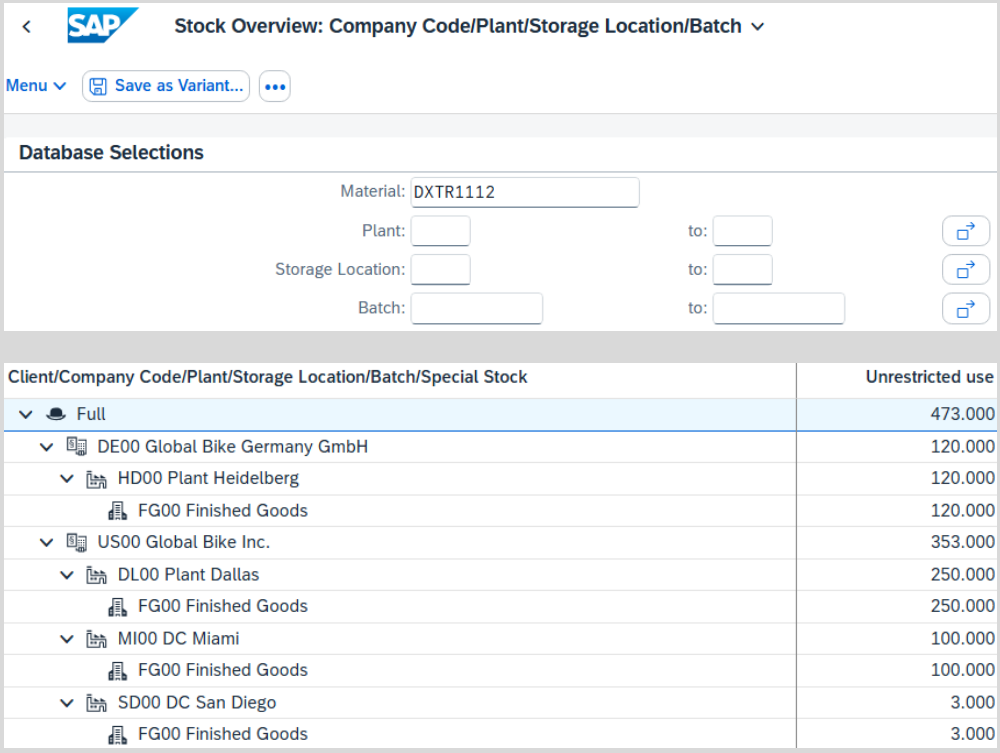

Plant San Diego

_____

Click on SAP to return to the SAP Fiori Launchpad.

Note To display the material inventory, use in the *Warehouse Management* area on the *Storage Purchasing* page in the *Plant Manager* role the app *Display Stock Overview*. Enter **DXTR1###** as Material.

DXTR1###

Click on SAP to return to the SAP Fiori Launchpad.

Step 2: Create Stock Transport Order

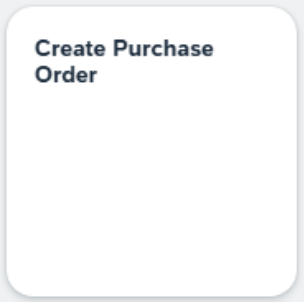

Task Create a stock transport order. **Time** 10 min

Short Description Use the Fiori Launchpad to create a stock transport order. This means that you request material from another GBI plant instead of procuring it from a vendor.

Name (Position) Jennifer Brown (Plant Manager)

To display the material inventory, use in the *Warehouse Management* area on the *Stock Transport Order* page in the *Plant Manager* role the app *Create Purchase Order*.

Start

In the *Create Purchase Order* screen, change the type of purchase order to **Stock Transp. Order** and accept any warning messages with Enter. Fill in **US00** as *Purch.Org.*, **N00** as *Purch. Group*, **US00** as *Company Code* and **DL00** as *Supplying Plant*. Press *Enter*.

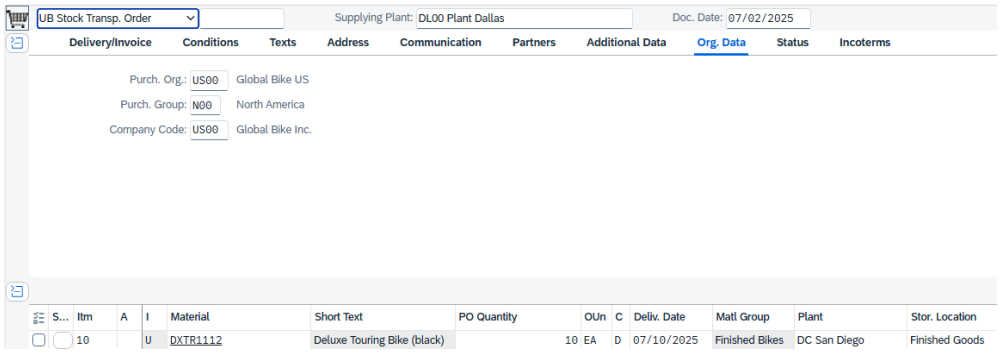

Stock Transp. Order
US00
N00
US00
DL00

Note Transfer postings should not involve a physical goods movement; however, in stock transfers, there is always a physical movement of goods. In a plant-to-plant stock transfer, the plants, between which the material is transferred, can belong to the same company code or different company codes. The cross-plant stock transfers can only be booked out of the unrestricted-use stock.

Select to expand the Item Overview. Enter **DXTR1###** as *Material* (replace ### with your number), **10** as *PO Quantity*, **SD00** as *Plant*, **FG00** as *Storage Location* and **8 days from today** as *Delivery Date*. Confirm your entries by pressing *Enter*.

DXTR1###
10
SD00
FG00
8 days from today

Compare your entries with the screenshot above.

Then, click on Save to save your order. You may receive a warning message which you can ignore by clicking on Save.

Save

The system will assign a unique *stock transport order document number*.

transport order document number

Stock Transp. Order created under the number 4500000021

Note the stock transport order document number:

_____

Click on SAP to return to the SAP Fiori Launchpad.

Step 3: Display Material Inventory

Task View the inventory of your material again. **Time** 5 min

Short Description Use the SAP Fiori Launchpad to display the inventory of your material again.

Name (Position) Carolin Bruzik (Warehouse Supervisor)

To display the material inventory, use in the *Warehouse Management* area on the *Stock Transport Order* page in the *Warehouse Supervisor* role the app *Display Stock Overview*.

Start

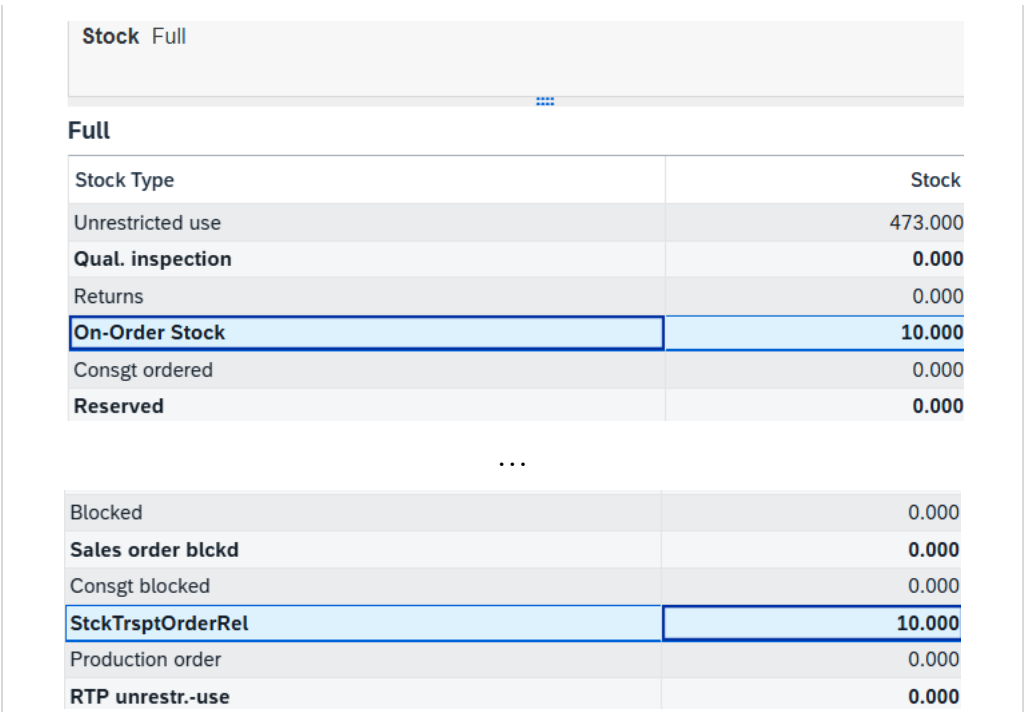

Enter **DXTR1###** as Material (replace ### with your number). Make sure that all other search criteria fields are blank and click on Execute. Your numbers may vary.

DXTR1###

In the following screen, you see the global amount of your material on stock as well as the current amount in your Dallas plant, which you will order the material from.

Client/Company Code/Plant/Storage Location/Batch/Special Stock	Unrestricted use	Qual. inspection	Reserved	Rcpt reservation	On-Order Stock

FG00	3	EA	0	0	0	0	0
	4,200.00	USD	0.00	0.00	0.00	0.00	0.00

As you can see, there is no total value associated with the DC in San Diego. Please be aware that your numbers may vary.

Click on SAP to return to the SAP Fiori Launchpad.

Step 5: Create Goods Issue

Task Create a goods issue from the issuing plant. **Time** 10 min

Short Description In this step, you will use the SAP Fiori Launchpad to issue the goods, requested from your plant in Dallas to your distribution center in San Diego.

Name (Position) Sanjay Datar (Warehouse Employee)

To create a goods issue, use in the *Warehouse Management* area on the *Stock Transport Order* page in the *Warehouse Employee* role the app *Post Goods Movement.*

Start

In the screen, change the Material Document drop down to **Goods Issue** and adjust the type of Goods Issue to a **Purchase Order**.

Goods Issue
Purchase Order

Note A purchase order is the same as a stock transport order, you technically purchase the goods from the other plant, but it is a transport, because the plants are under the same company code.

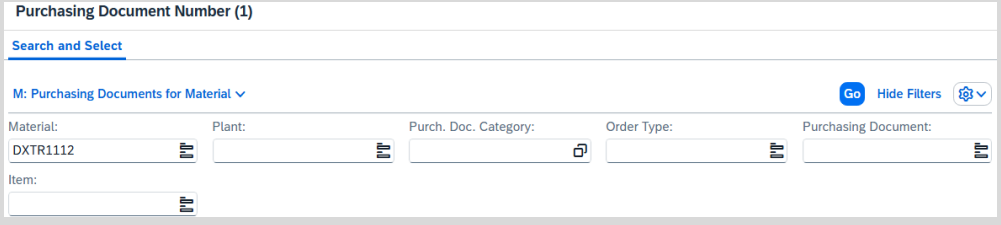

Input your **Stock Transport Order Number** in the blank space next to it and 351 as movement type.

Stock Transp. Order Nr.

If you have not written down the TO number you created in the second task, you may use the F4 help in the TO number field (first blank field next to the second drop-down field).

In the following screen choose the *Purchasing Documents for Material* tab by using . Then, enter **DXTR1###** as Material and click on Go.

DXTR1###

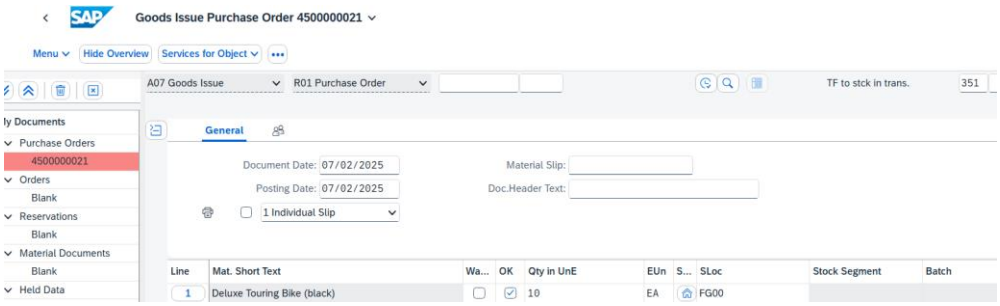

Double click on your entry. Your order number will automatically filled in.

Press Enter.

When your order comes up select **OK** and enter **Finished Goods** as Storage Location. Confirm your entries by pressing Enter. If the field is shown greyed minimize Item Overview by choosing

OK
Finished Goods

Then, click on Post to save your issue. The system will assign a unique material document number.

Material Document Number

Click on SAP to return to the SAP Fiori Launchpad.

Step 6: Display Material Inventory

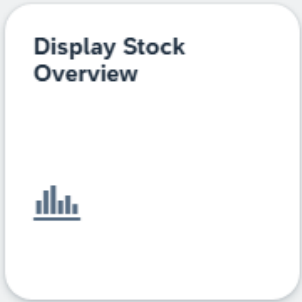

Task View the inventory of your material again. **Time** 5 min

Short Description Use the Fiori Launchpad to display the inventory of your material again.

Name (Position) Carolin Bruzik (Warehouse Supervisor)

To display the material inventory, use in the *Warehouse Management* area on the *Stock Transport Order* page in the *Warehouse Supervisor* role the app *Display Stock Overview*.

Start

In the *Stock Overview* screen, enter **DXTR1###** as Material (remember to replace ### with your number). Choose Execute. Please be aware that your numbers may vary.

DXTR1###

Client/Company Code/Plant/Storage Location/Batch/Special Stock	Unrestricted use	Qual. inspection	Reserved	Rcpt reservation	On-Order Stock
Full	463.000				10.000
DE00 Global Bike Germany GmbH	120.000				
HD00 Plant Heidelberg	120.000				
FG00 Finished Goods	120.000				
US00 Global Bike Inc.	343.000				10.000

FG00 Finished Goods	100.000				
SD00 DC San Diego	3.000				10.000
FG00 Finished Goods	3.000				10.000

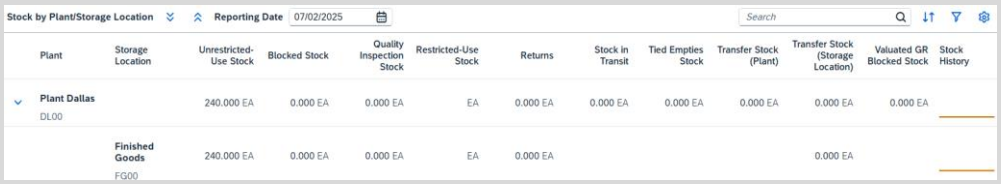

Note that your amount of goods in Dallas has changed now.

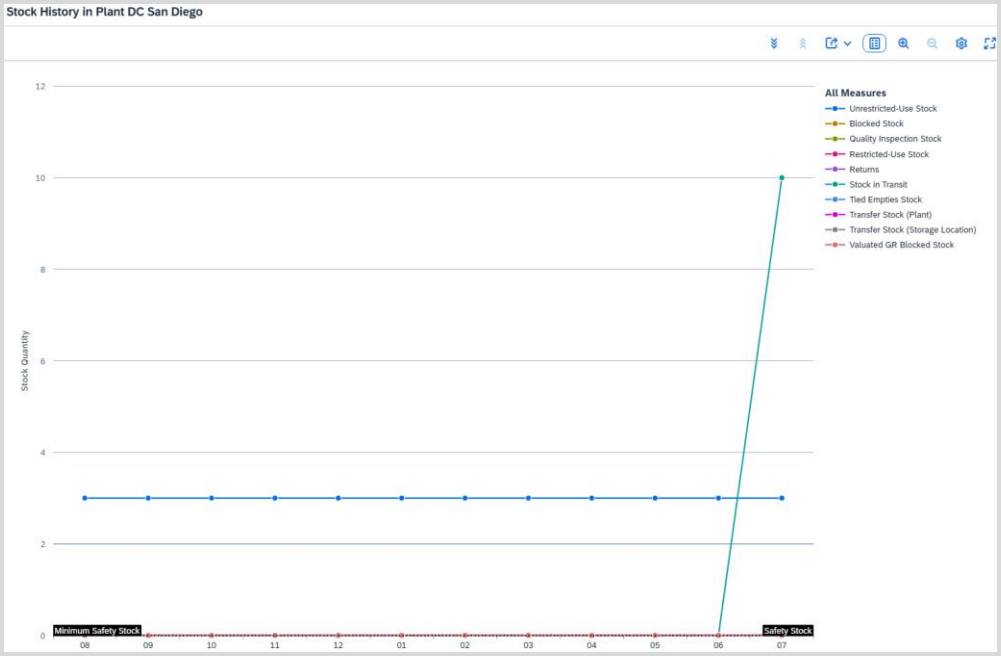

By double clicking on *SD00 DC San Diego* you can also see, that you still have an On-Order Stock balance of 10 for your distribution center in San Diego. This means that the goods have not arrived in San Diego yet.

Click on SAP to return to the SAP Fiori Launchpad.

You can also have a look at another overview. To do so, use the app *Stock – Single Material*.

Click on  to return to the SAP Fiori Launchpad.

Step 7: Display Material Inventory Value

Task View the value of your material inventory again. **Time** 5 min

Short Description Use the Fiori Launchpad to display the value of your material inventory again.

Name (Position) Carolin Bruzik (Warehouse Supervisor)

To display the material inventory value, use in the *Warehouse Management* area on the *Stock Transport Order* page in the *Warehouse Supervisor* role the app *Display Warehouse Stock.*

Start

In the *Display Warehouse Stocks of Material* screen, enter **DXTR1###** as Material (remember to replace ### with your number). Ensure that all other search criteria fields are blank and click on Execute. Please be aware that your numbers may vary.

DXTR1###

Material			Material Description		Plnt Name 1

	4,200.00	USD	0.00	0.00	0.00	0.00	0.00
* Total							
	✖		✖	✖	✖	✖	✖

As you can see the values associated with the material in Dallas has decreased. In addition, the value of *Transit/Transf.* for San Diego has now increased to the value of the goods on order.

Click on  to return to the SAP Fiori Launchpad.

Step 8: Create Goods Receipt

Task Receive goods at receiving plant. **Time** 5 min

Short Description Use the SAP Fiori Launchpad to confirm the receipt of goods from Dallas by creating a goods receipt.

Name (Position) Yoshi Agawa (Goods Receipt Clerk)

To create a goods receipt, use in the *Warehouse Management* area on the *Stock Transport Order* page in the *Goods Receipt Clerk* role the app *Post Goods Movement.*

Start

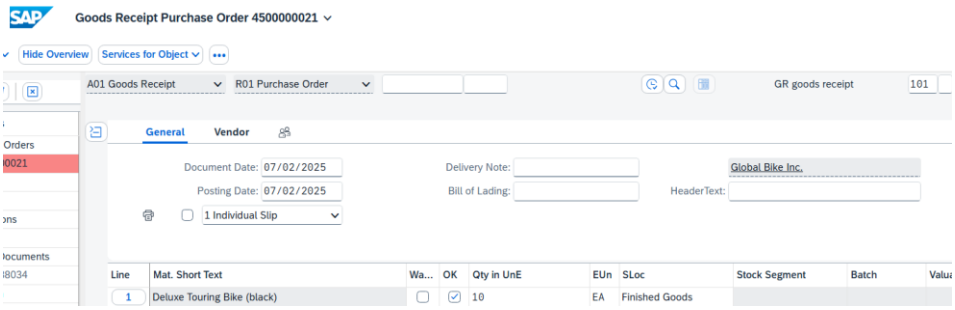

In the *Goods Movement* screen, change the Material Document drop down to **Goods Receipt**, adjust the type of Goods Receipt to a **Purchase Order**, and input your **Stock Transport Order Number** in the blank space next to it. You may use the F4 help like explained in the goods issue task. Then, press Enter.

Goods Receipt
Purchase Order
Stock Transport Order Number

After your stock transport order comes up select **OK.** Make sure that **SD00** is chosen as Plant, **101** as Movement Type and **FG00** as Storage Location (for some of this information you may need to scroll over to the right to find it).

OK
SD00
101
FG00

Then, click on Post to save your receipt. The system will assign a unique material document number.

Material Document Number

Click on SAP to return to the SAP Fiori Launchpad.

Step 9: Display Material Inventory

Task View the inventory of your material again. **Time** 5 min

Short Description Use the Fiori Launchpad to display the inventory of your material again.

Name (Position) Carolin Bruzik (Warehouse Supervisor)

To display the material stock, use in the *Warehouse Management* area on the *Issue from Storage* page in the *Warehouse Supervisor* role the app *Stock - Single material*.

Start

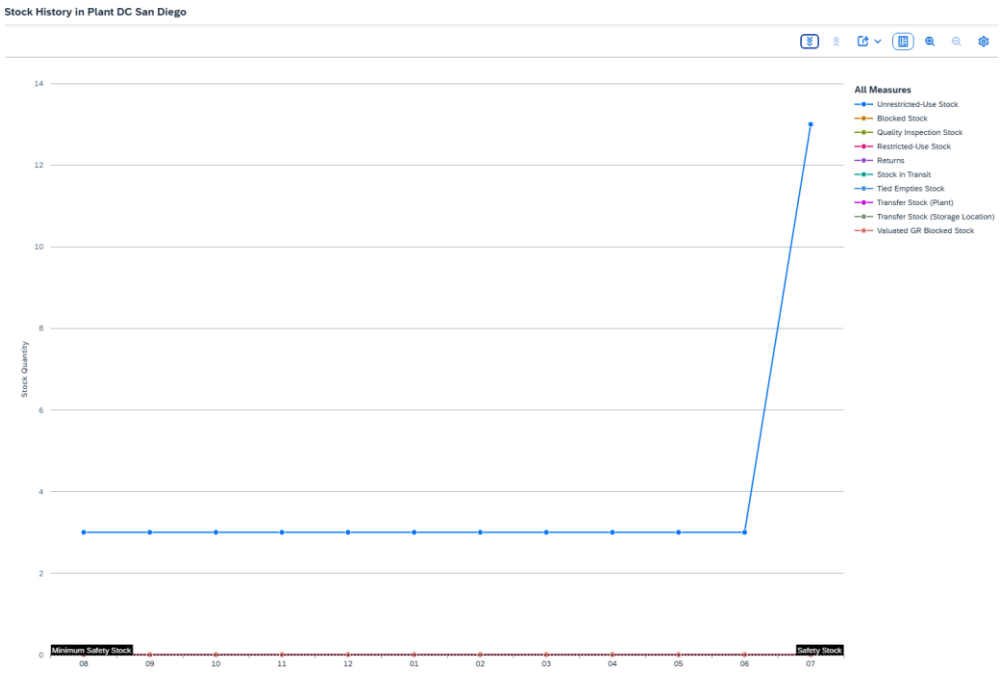

In the *Stock - single material* view, enter **DXTR1###** (replace ### with your number) in the Material field.

DXTR1###

	140,000.00 USD	0.00	0.00	0.00	0.00	0.00
DXTR1112		Deluxe Touring Bike (black)		SD00 DC San Diego		
FG00	13 EA	0	0	0	0	0
	18,200.00 USD	0.00	0.00	0.00	0.00	0.00

As you can see the value of *Transit/Transf.* for San Diego is now zero and its *Unrestricted Amount and Total Value is* increased.

Click on SAP to return to the SAP Fiori Launchpad.

Step 11: Run Bin Status Report

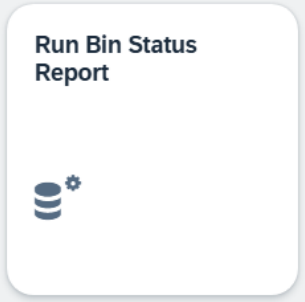

Task Check the status of your bins. **Time** 5 min

Short Description Use the Fiori Launchpad to run a bin status report, which will display a detailed report of each storage bin within the specified warehouse.

Name (Position) Carolin Bruzik (Warehouse Supervisor)

To run a bin status report, use in the *Warehouse Management* area on the *Stock Transport Order* page in the *Warehouse Supervisor* role the app *Run Bin Status Report.*

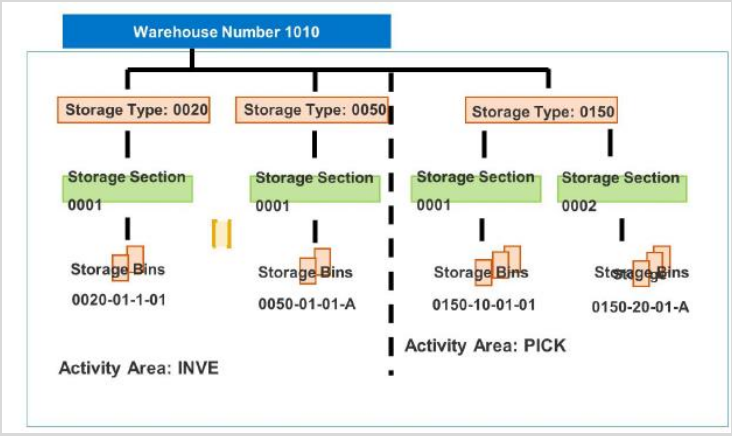

Start

In the *Bin Status Report: Initial Screen*, enter **100** (for your San Diego Warehouse) as Warehouse Number and **STBN*###** as Storage bin (replace ### with your number). Then, click on Execute.

100
STBN*###

Note The warehouse number is the highest level of organizational unit in warehouse management. In practice, the warehouse number usually corresponds to a physical building or distribution center. Each warehouse number has a substructure that maps the spatial relationship in the warehouse complex in details.

Storage bins are the lowest level of organizational structure. They are assigned to a storage type and a storage section (if one exists). Storage bins represent the physical location where the goods are stored in the warehouse.

In the *Bin Status Report: Overview* screen you should see a list of all of your storage bins for the entire warehouse in San Diego. Double click on one of your storage bins to get detailed information.

Typ	StorageBin	Material	Plnt
001	STBN-1-112	<<empty>>	
001	STBN-2-112	<<empty>>	
001	STBN-3-112	<<empty>>	
002	STBN-7-112	<<empty>>	
002	STBN-8-112	PRTR1112	SD00
002	STBN-8-112	PRTR2112	SD00
002	STBN-9-112	ORMN1112	SD00
002	STBN-9-112	ORWN1112	SD00

Note Your bin report might look different, depending on whether you have already processed a Warehouse Management case study or not.

Click on  to return to the SAP Fiori Launchpad.

Step 12: Create Transfer Order

Task Create a transfer order. **Time** 10 min

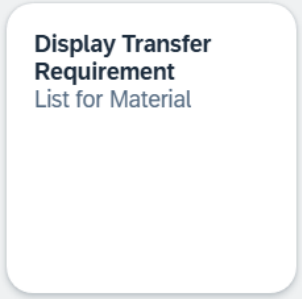

Short Description Use the Fiori Launchpad to create a transfer order to place your goods into your storage bin. It is a handoff from inventory management to warehouse management. The system recognizes that there are goods that have been received but need to be put away.

Name (Position) Yoshi Agawa (Goods Receipt Clerk)

To create a transfer order, use in the *Warehouse Management* area on the *Stock Transport Order* page in the *Goods Receipt Clerk* role the app *Display Transfer Requirement – List of Material*.

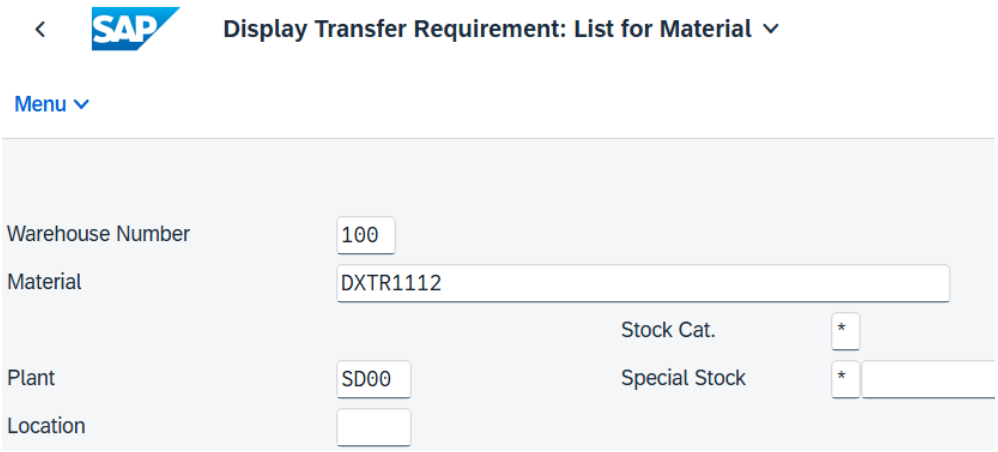

Start

Note If the app is not displayed, search for it using the search bar.

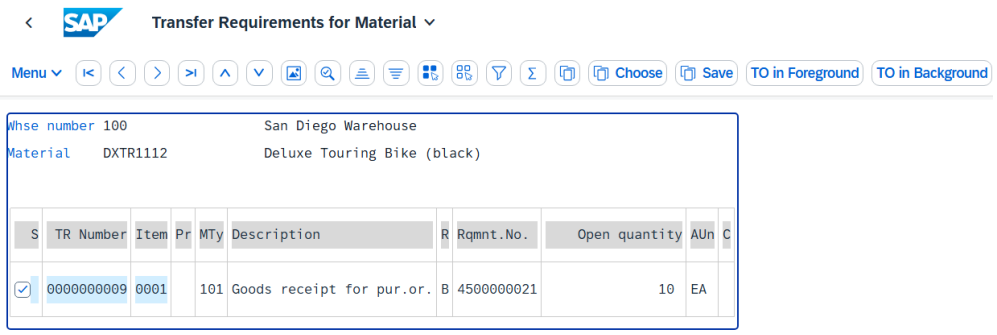

In the *Display Transfer Requirement: List of Material* screen, enter **100** (for your San Diego Warehouse) as Warehouse Number, **DXTR1###** as Material (replace ### with your number) and **SD00** as Plant. Compare your entries with the screenshot below and then click Enter.

100
DXTR1###
SD00

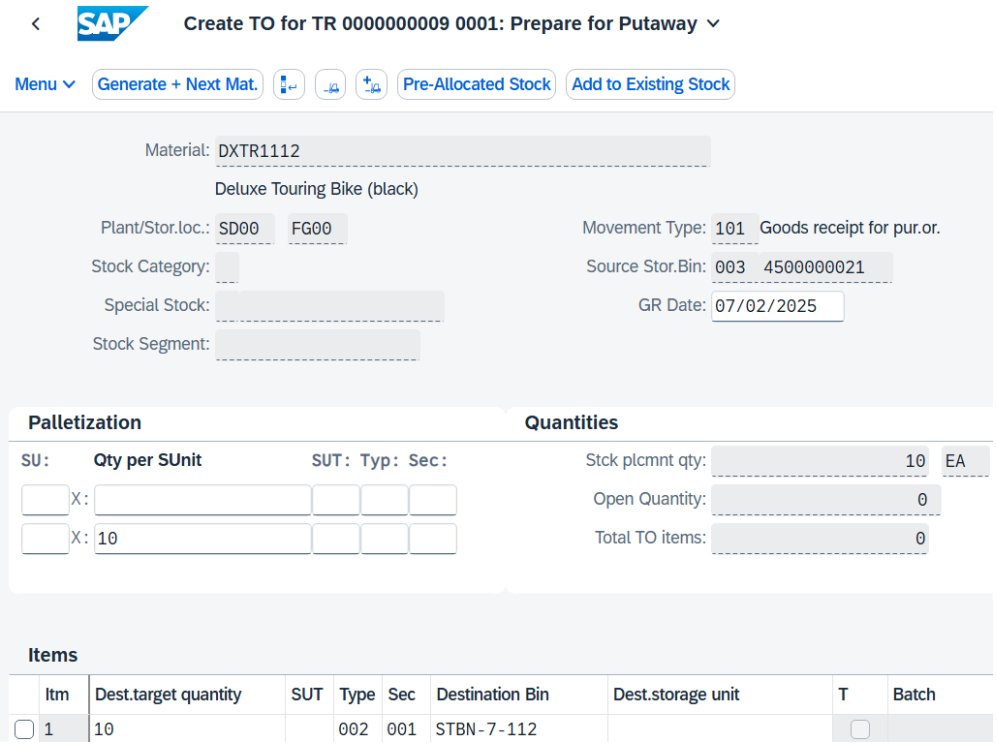

In the *Transfer Requirements for Material* screen, you should see a line item describing the goods, just received for your stock transport order. The requirement number should be the same as the stock transport order number, you received earlier. Make sure that the line item is selected and click on the TO in Foreground button.

In the *Create TO for TR 000000XXXX 0001: Prepare for Putaway* screen press Enter to copy your quantity of 10 from the *Palletization* section to the *Items* section. Enter **001** as Sec, **STBN-7-###** as Destination Bin (replace ### with your number) and use F4 to select **Pallet Storage** as Type. Confirm your entries by pressing Enter.

001
STBN-7-###
002 (Pallet Storage)

Then, click on Posting to save your transfer order. The system will assign a unique transfer order number. Please write down this number.

Transfer Order Number: _____

Click on SAP to return to the SAP Fiori Launchpad.

Step 13: Confirm Transfer Order

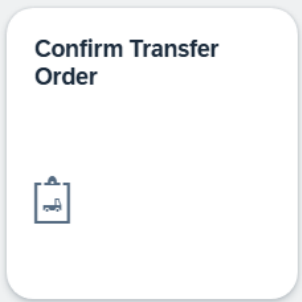

Task Confirm your transfer order. **Time** 5 min

Short Description Use the Fiori Launchpad to confirm the transfer order you created in the previous step. This is confirming that the goods are physically in the storage bin indicated in the transfer order.

Name (Position) Yoshi Agawa (Goods Receipt Clerk)

To confirm a transfer order, use in the *Warehouse Management* area on the *Stock Transport Order* page in the *Goods Receipt Clerk* role the app *Confirm Transfer Order*.

Start

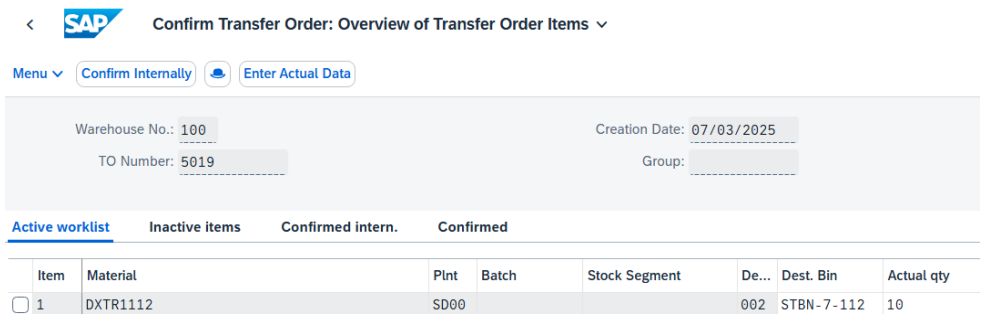

In the *Confirm Transfer Order: Initial Screen*, enter your **TO Number** from the previous task and **100** as *Warehouse Number*. Then, press Enter.

TO Number
100

Note If you have not written down the number you can search for it using the app *Display Transfer Order*.

In the *Transfer Orders: List of Resident Documents* you have to fill in **100** as Warehouse number. Then, click on Execute.

In the *Confirm Transfer Order: Overview of Transfer Order Items* screen, you should see an overview of your transfer order created in the previous step. Review all of the details to make sure you have the correct quantity and storage bin.

Then, click on Posting to confirm your transfer order. The system will return a success message.

Click on SAP to return to the SAP Fiori Launchpad.

Step 14: Run Bin Status Report

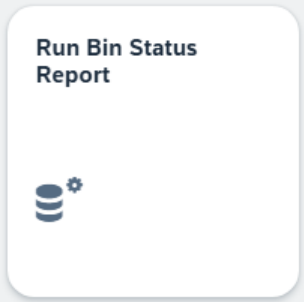

Task Check the status of your bins again. **Time** 5 min

Short Description Use the Fiori Launchpad to run a bin status report, which will display a detailed report of each storage bin within the specified warehouse.

Name (Position) Carolin Bruzik (Warehouse Supervisor)

To run a bin status report, use in the *Warehouse Management* area on the *Stock Transport Order* page in the *Warehouse Supervisor* role the app *Run Bin Status Report.*

Start

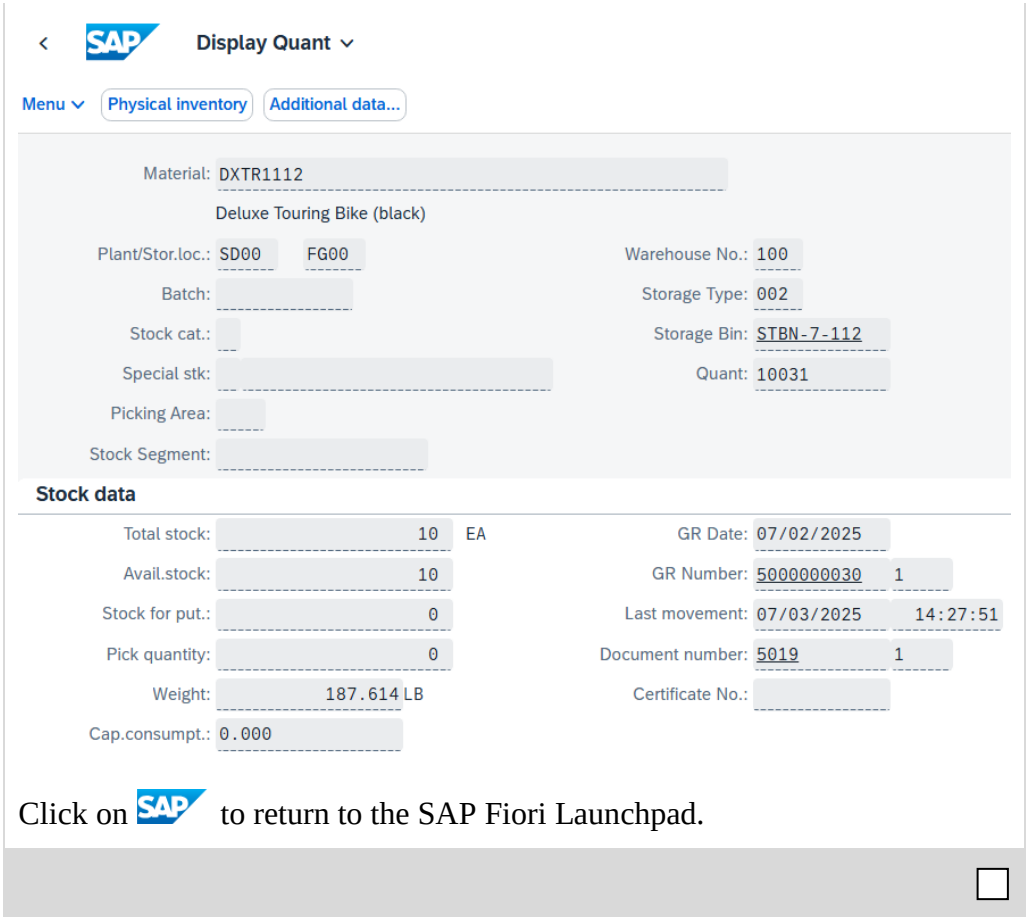

In the *Bin Status Report: Initial Screen*, enter **100** (for your San Diego Warehouse) as Warehouse Number and **STBN*###** as Storage bin (replace ### with your number). Then, click on Execute.

100
STBN*###

Typ	StorageBin	Material	Plnt
001	STBN-1-112	<<empty>>	
001	STBN-2-112	<<empty>>	
001	STBN-3-112	<<empty>>	
002	STBN-7-112	DXTR1112	SD00
002	STBN-8-112	PRTR1112	SD00
002	STBN-8-112	PRTR2112	SD00
002	STBN-9-112	ORMN1112	SD00
002	STBN-9-112	ORWN1112	SD00

In the *Bin Status Report: Overview* screen you should see that the Storage Bin **STBN-7-###** is filled now. Click on your material to display detailed information of this quant and check whether 10 pieces of your goods are stored in your storage bin.

Click on to return to the SAP Fiori Launchpad.

WM II Challenge

Learning Objective Understand and perform a warehousing process for int. goods

Time 75 min

Motivation After having finished the *Warehouse Management II* case study successfully, you should now be able to solve the following challenge.

Scenario The warehouse management system has been tested without any problems, so the management decided to use the system productively. The distribution center in San Diego will soon start delivering customers. In order to do so, you need to ensure that there are enough silver Deluxe Touring Bikes available on stock. Unfortunately, you cannot order any from your plants in Dallas, as there are no free resources available, because of problems with one of the assembly lines. In order to have on time 50 silver Deluxe Touring Bikes (estimation by the management) in San Diego you need to order them from your plant in Heidelberg (Germany). The delivery time is 10 days maximum.

As soon as the goods arrive in your DC in San Diego they need to be stored in the same bin, where the black Touring Bikes from this case study already are.

Task Information You can use the *Warehouse Management II* case study as a guideline, but it is recommended to complete this challenge without further assistance to prove your WM skills.
