Customer Service (CS)

Curriculum: Introduction to S4HANA using Global Bike

SAP University Alliances

SAP UCC Magdeburg

Teaching material - Information

Teaching material - Version

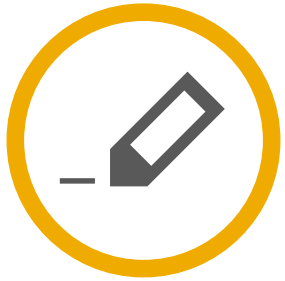

- 4.3 (July 2025)

- Software used
  - SAP S/4HANA 2023
  - Fiori 3.0
- Model
  - Global Bike

- Prerequisites
  - No Prerequisites needed

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Module Information

Authors

- Tim Böttcher
- Chris Bernhardt
- Stefan Weidner

Target Audience

- Beginner

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Module Information

Learning Objectives

You are able to

- name some functionalities of the CS module.
- define the central organizational structures of the CS module.
- summarize the master data which is most important for the CS module.
- explain standard processes of the Customer Service.

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Functionality

- Service Contract
- Service Notification
- Service Order
- Goods Return and Repair

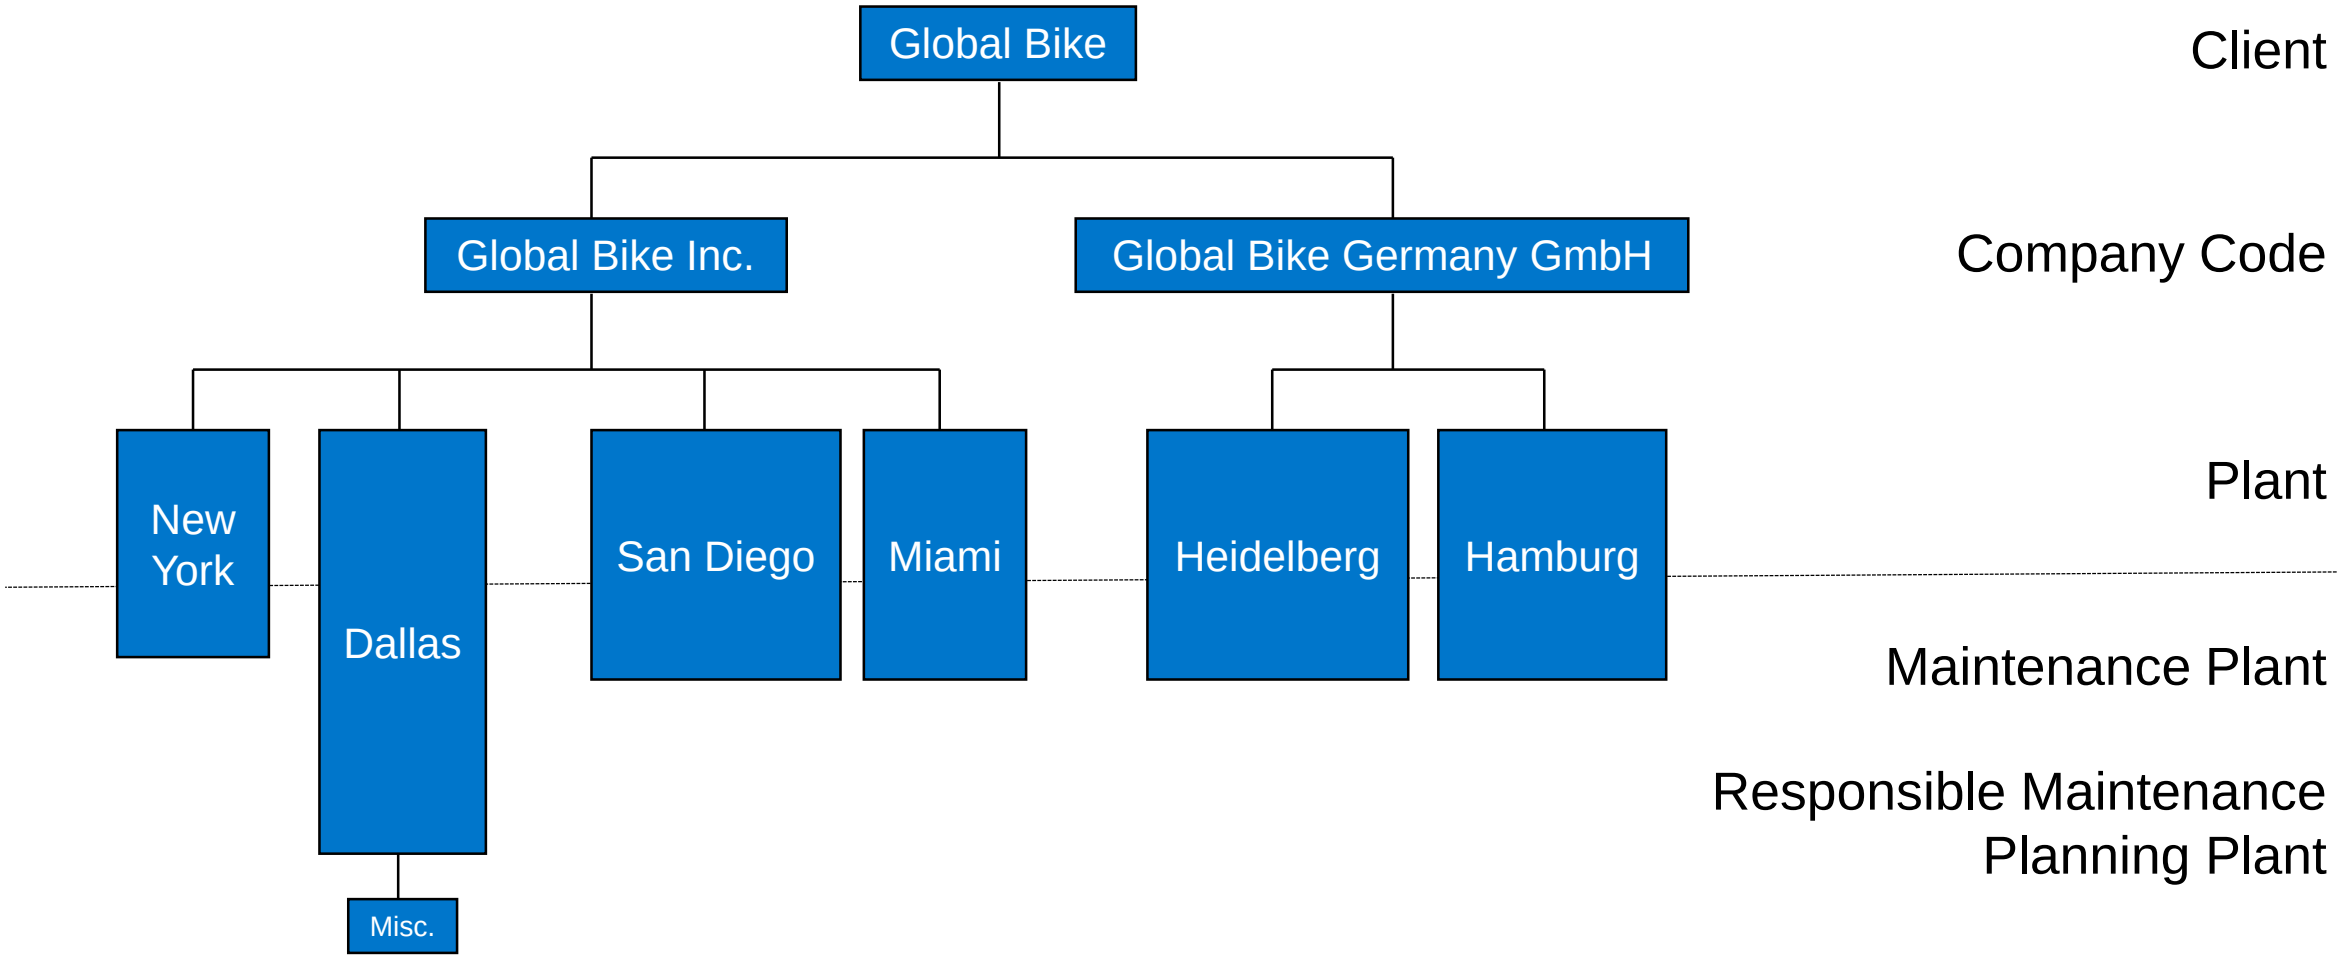

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Agenda

- CS Organizational Structure
- CS Master Data
- CS Processes

GBI Structure for Customer Service

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

CS Organizational Structure

- Client
  - An independent environment in the System
- Company Code
  - Smallest org unit for which you can maintain a legal set of books
- Storage Location
  - An organizational unit allowing differentiation between the various stocks of material in a plant
- Plant
  - Operating area or branch within a company
    - Manufacturing, distribution, purchasing or maintenance facility
  - Place in which the technical objects of a company are installed

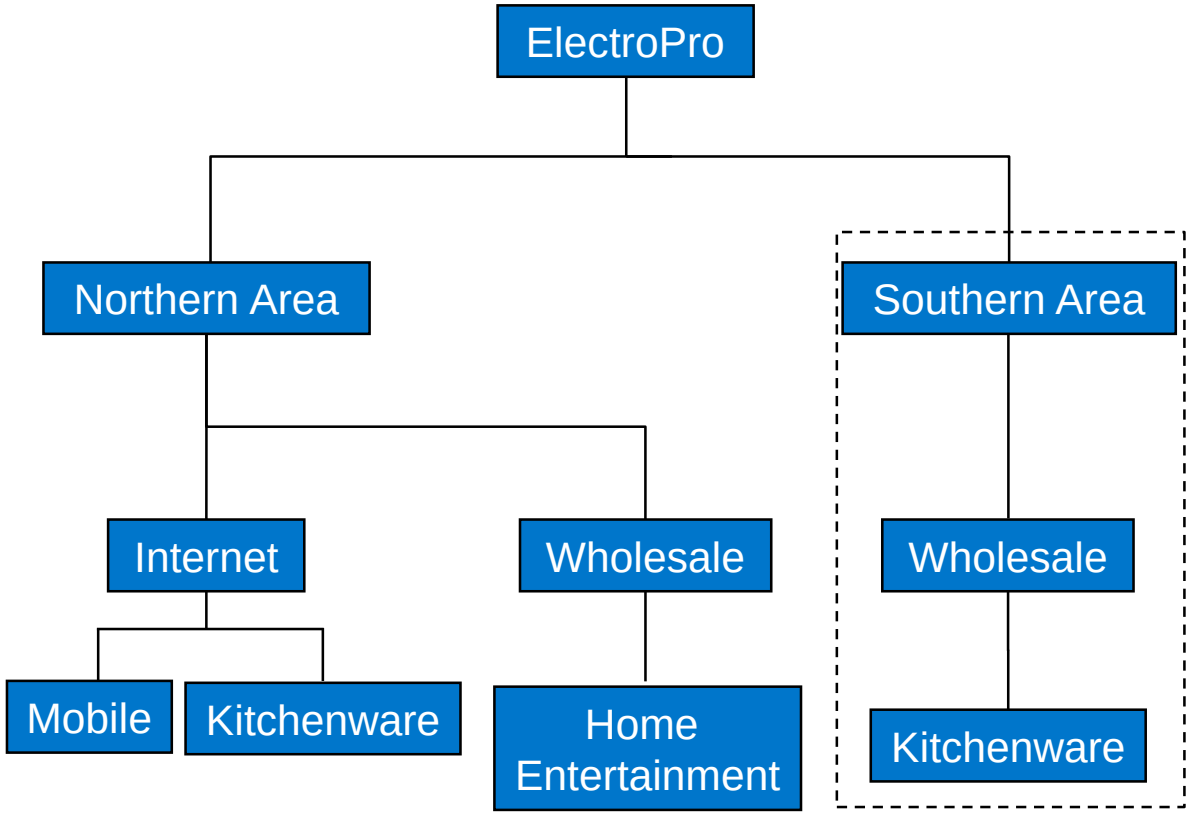

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

CS Organizational Structure (Sales)

- Sales Organization
  - An organizational unit responsible for the sale of certain products or services.
  - The responsibility of a sales organization may include legal liability for products and customer claims
- Distribution Channel
  - The way in which products or services reach the customer
  - Typical examples of distribution channels are wholesale, retail, or direct sales
- Division
  - A way of grouping materials, products, or services
- Sales Area
  - Combination of Sales Organization, Distribution Channel and Division
  - Determines conditions (i.e. pricing) for sales activities

CS Organizational Structure (Sales & Purchasing)

- Sales Office
  - establishes contact between the firm and the regional market
- Sales Group
  - performs and is responsible for sales transactions
- Shipping Point
  - performs shipping processing and is the part of the company responsible for the type of shipping, the necessary shipping materials and the means of transport
- Picking Location
  - place where the goods will be picked for shipping
- Purchasing Organization
  - organizational unit responsible for procuring services and materials

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

CS Organizational Structure (Controlling)

- Operating Concern
  - represents a part of an organization for which the sales market is structured in a uniform manner
  - a operating profit for the individual market segments can be calculated
  - multiple controlling areas can be assigned to one operating concern

- Controlling Area
  - a self-contained, organizational unit for which the management of revenues and expenses can be performed
  - may include one or more company codes; therefore, an enterprise can perform management accounting analyses and reports across several companies
  - a way to identify and track where revenues and costs are incurred for evaluation purposes

CS Master Data

- Work Center
- Equipment
- Bill of Material
- Customer Master Data
- Material Master Data
- Vendor Master Data

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Work Center

- A location within a plant where value-added work (operations or activities) are performed
  - Work Centers can represent
    - People or Groups of People
    - Machines or Groups of Machines
    - Assembly Lines
- Work center used to define capacities
  - Labor
  - Machine
  - Output
  - Emissions
- Capacities used in
  - Capacity requirements planning (CRP)
  - Detailed scheduling
  - Costing

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Equipment / Functional Location - Definition

- Equipment
  - Individual and autonomous technical unit
  - Physical object for which maintenance tasks are planned and performed
  - Equipments can be placed in functional locations

- Functional Location
  - Hierarchal organized structure which represents e.g. a technical system, a building or a part of it
  - Structural depiction of a technical plant
  - Planning and performing maintenance tasks

- Classification
  - assignment of an item or initiative to one or several buckets of a classification hierarchy
  - The act of assigning a value of a given characteristic to an object

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Equipment / Functional Location - Definition

- Measuring point and counter reading
  - describes the state of a technical object
  - important for regulations, e.g. emission limits of a plant

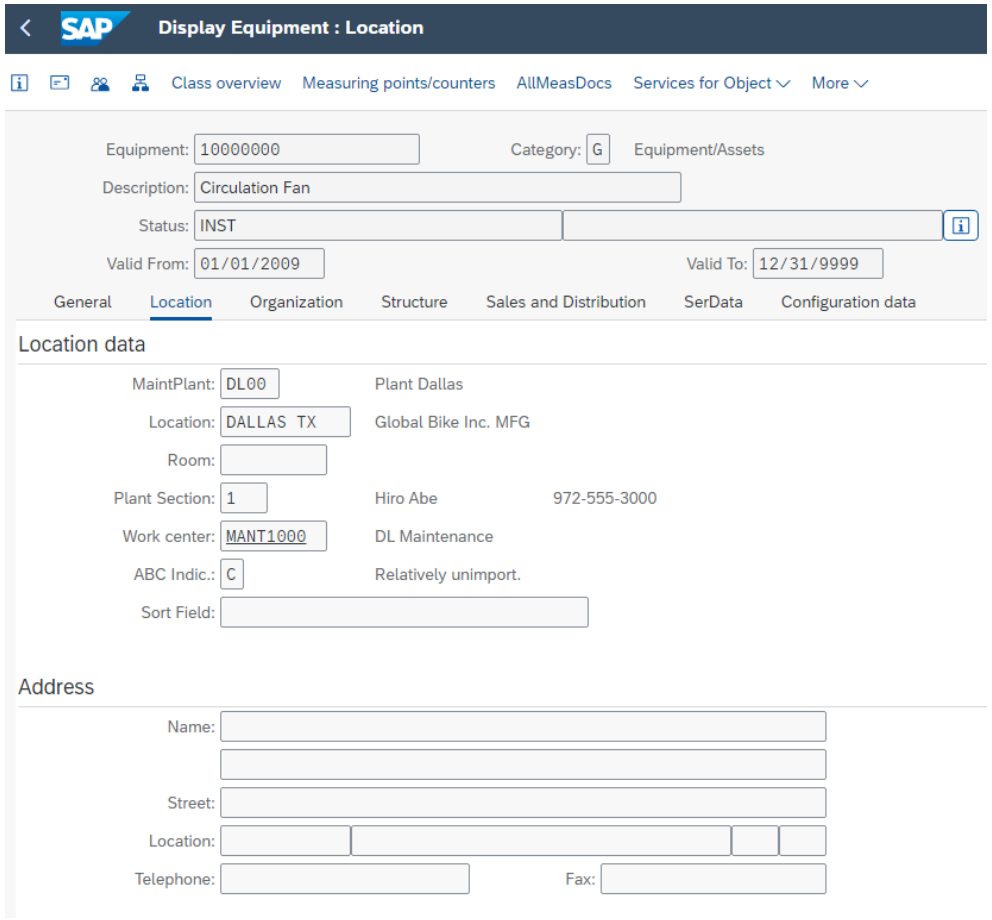

- Serial number
  - used for individualization of materials
  - distinguish materials with the same material number
  - specify the exact location of an unique good
  - save additional information
  - e.g. manual, warranty information

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Equipment Master Record

- Equipment Master Data
  - contains all information around equipment

- Information in four views:
  - General
  - Location
  - Organization
  - Structure

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Warranties

- A guarantee to vouch for defects or faults in the product purchased, valid for a specific period of time
- The type and scope of the services covered, such as repairing a defect for free or taking the product back, are defined in the warranty
- Can be distinguished in vendor-, manufacturer- or customer warranty
- Valid for a specific technical object
  - functional location, equipment or serial number

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

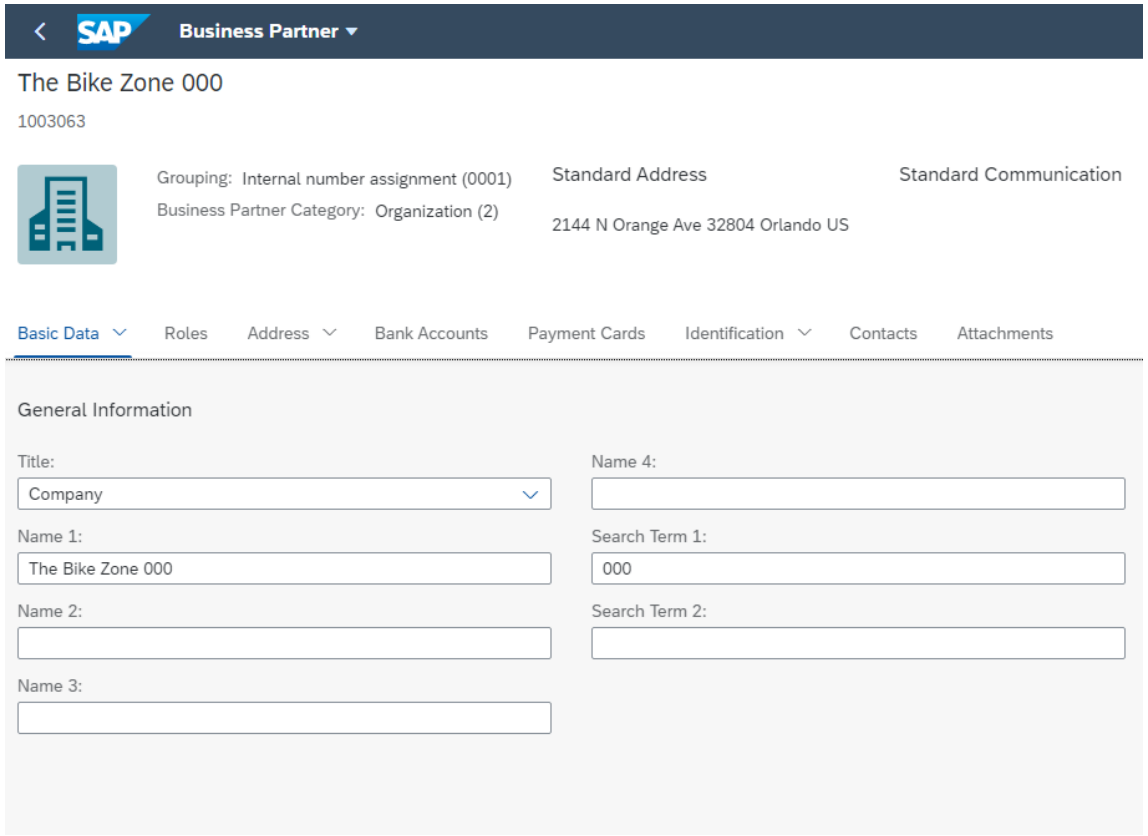

Bill of Material – Definition

- Complete formally structured list of all components
- Material BOMs can be allocated to functional locations or equipment
- Three types of BOMs in Enterprise Asset Management:
  - Material BOMs
  - Equipment BOMs
  - Functional location BOMs
- Advantages
  - Structuring of objects
  - Service parts planning in maintenance orders and maintenance task lists
  - Within plant maintenance BOMs are used, if similar object should be maintained

Customer Master Data

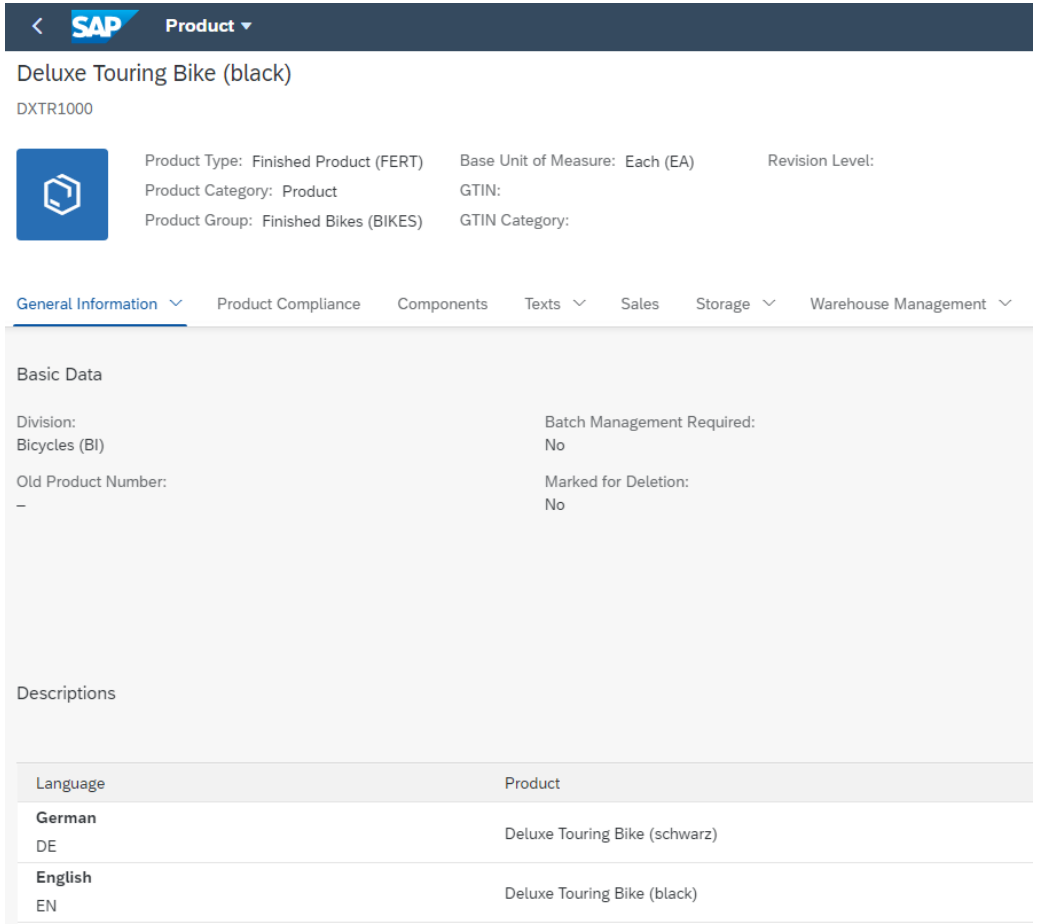

- Customer Master
  - Contains all of the information necessary for processing orders, deliveries, invoices and customer payment
  - Every customer MUST have a master record
- Created by Sales Area
  - Sales Organization
  - Distribution Channel
  - Division
- The customer master information is divided into 3 areas:
  - General Data
  - Company Code Data
  - Sales Area Data

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

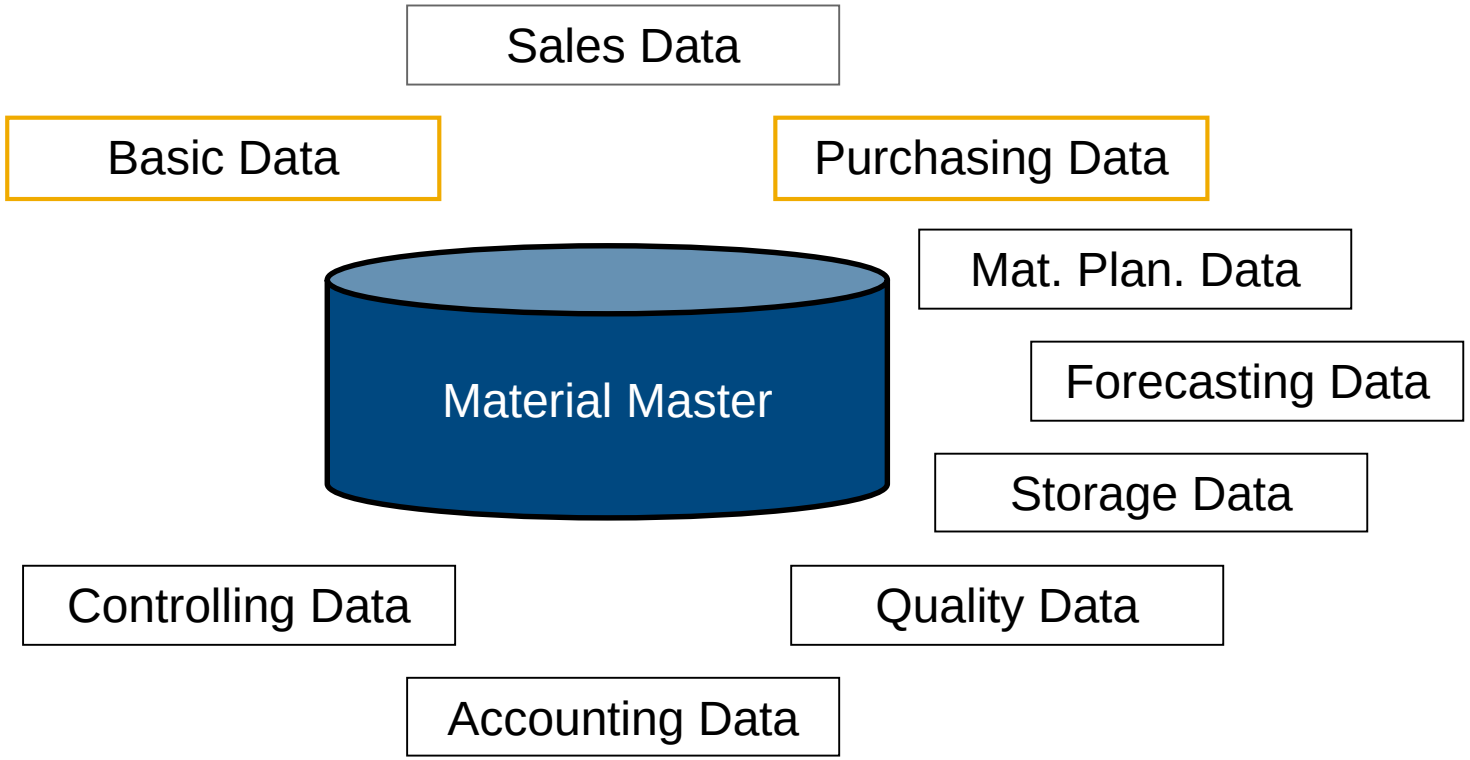

Material Master Data

- Material Master
  - Contains all the information a company needs to manage about a material
  - It is used by most components within the SAP system
    - Sales and Distribution
    - Materials Management
    - Production
    - Plant Maintenance
    - Accounting/Controlling
    - Quality Management
  - Material master data is stored in functional segments called Views

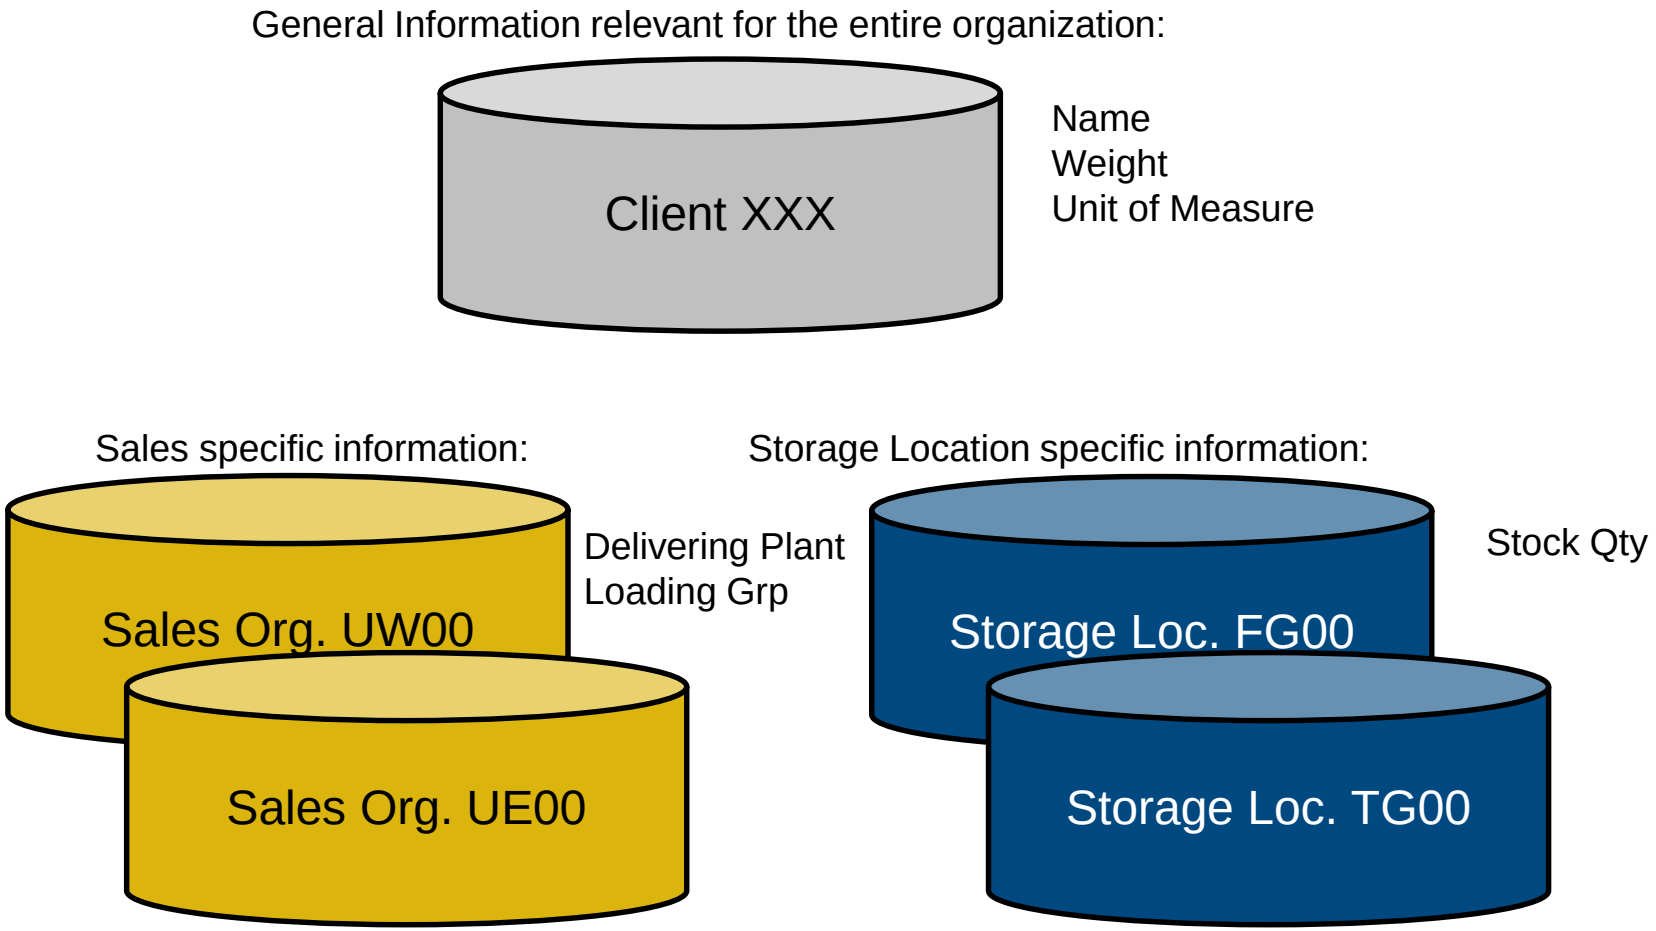

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Vendor Master Data

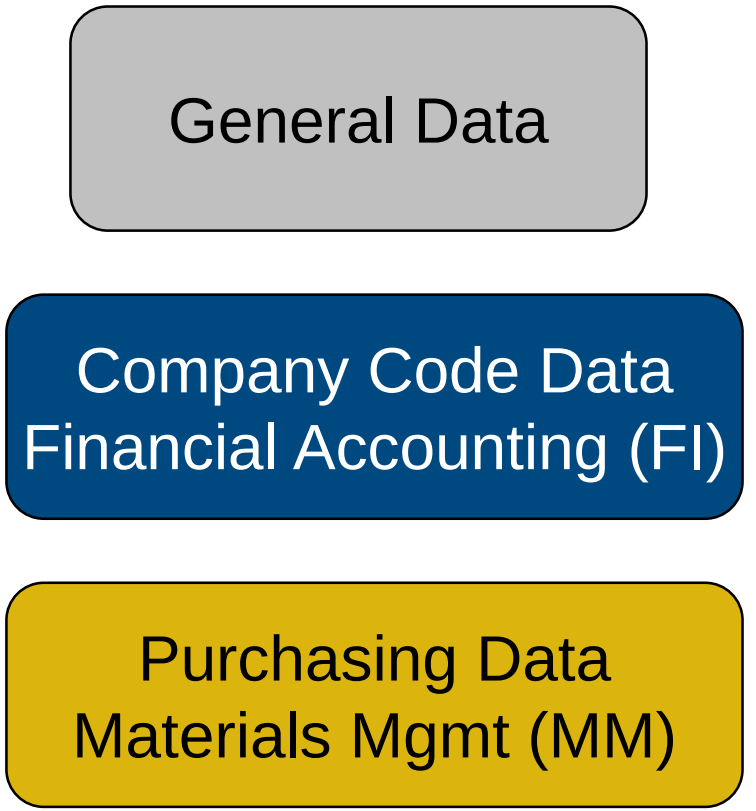

- Contains all the necessary information needed to business with an external supplier
- Used and maintained primarily by the Purchasing and Accounting Departments
- Every vendor MUST have a master record
- The supplier master record is created in SAP S/4HANA as a central business partner master record with different roles.
- For suppliers, these are often the business partner roles:
  - FLVN00 (FI Vendor)
  - FLVN01 (Vendor)

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Vendor Master Views

- Client Level
  - Address
  - Vendor Number
  - Preferred Communication
- Company Code Data
  - Reconciliation Account
  - Terms of Payment
  - Bank Account
- Purchase Org Data
  - Purchasing Currency
  - Salesman’s Name
  - Vendor Partners

Service Contract and Types

- Long term agreement
  - predefined validity period
  - for at least one technical object
  - predefined services
  - predefined conditions
- Header
  - Sales-, contract-, and billing data
  - Billing plan
  - Conditions
- Items
  - Service
  - Configuration
  - Technical Objects
- Service contract
  - Solve reported problems of a customer
- Service and maintenance contract
  - Maintenance of technical object in a predefined manner
  - Master agreement with a customer
  - Reversal of a predefined quantity or value

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Service Order - Process

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Service Notification

- Means by which notifications from a customer are entered and managed in Customer Service
- Used for documentation and evaluation

- Components
  - Customer information
  - Information about technical object and service contract
  - Information about valid warranties

- Types
  - Customer message / problem notification
  - Service request
  - Technical completion

- If there is need for action a service order will be created

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Service Order

- Precise assessment of time and ressources
- Can be created as follow-up of a service notification
- Planning of service actions
  - Resource planning for internal and external employees
  - Determination of specific execution date
- Confirmation

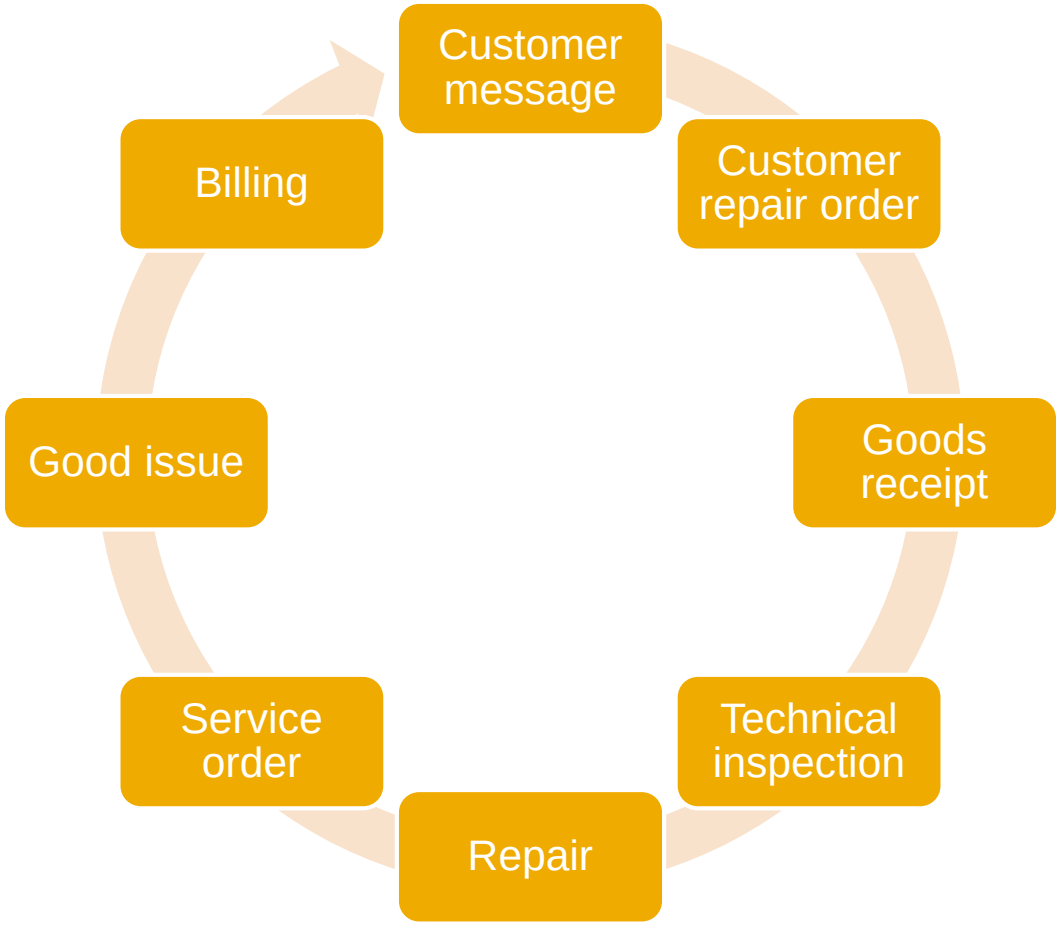

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Service Order - Content

- Customer information
- Information about the location
- Object information
- Information about planning and execution of activities
- Information about planned and actual costs
- Information about settlement of the actual costs

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Goods return and repair - Process

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.

Goods return and repair

- Return of a damaged good
- Receipt through goods return
- Repaired through customer service
- Billing

© 2025 SAP SE / SAP UCC Magdeburg. All rights reserved.
