QM 1: Display Inspection Characteristic

Exercise Display the Inspection Characteristics used in Quality Management. **Time** 10 min

Task Use the Fiori Launchpad to display the Inspection Characteristics.

Inspection Characteristic

An inspection characteristic describes what is to be inspected, that is, the inspection requirements for materials, parts, and products. To simplify and standardize inspection planning, you can define master inspection characteristics that you can use in various task lists.

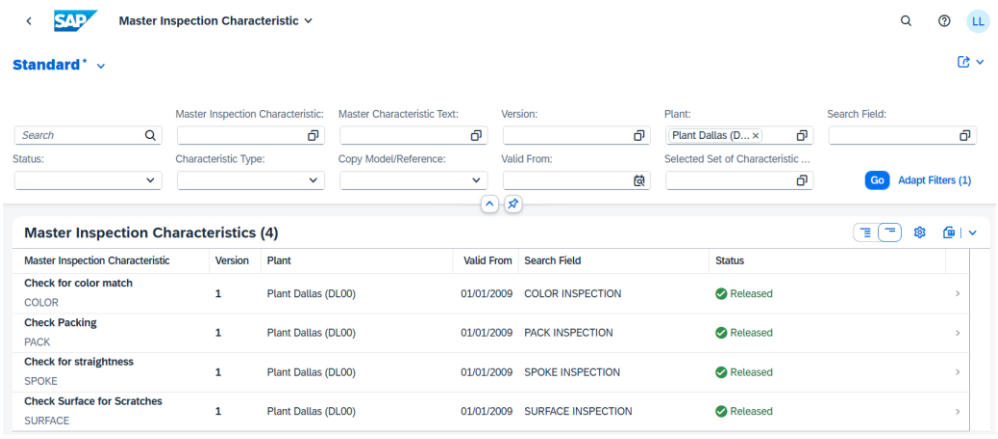

Start

To display an inspection characteristic, use in the *Quality Management* area in the *Warehouse Supervisor* role the Fiori App *Display Master Inspection Characteristics.*

DL00

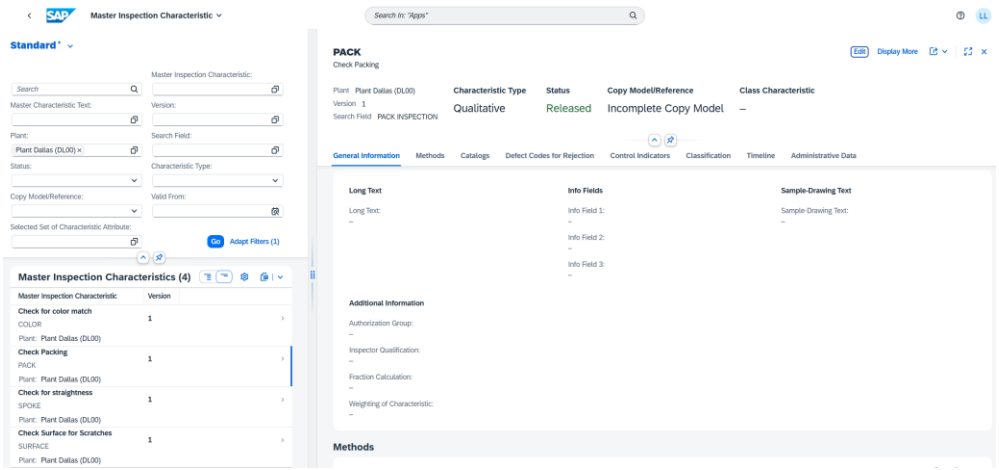

In the *Master Inspection Characteristic Screen* enter **DL00** as *Plant*. Click on Go.

In the following window *Master Inspection Characteristics (4)* select the Master Inspection Characteristic **PACK**.

PACK

You can obtain more detailed information about the inspection characteristic *PACK*.

What is the status of the inspection characteristic?

Besides packaging, what are the other inspection characteristics used in Global Bike?

Click on the home icon to go to the Fiori Launchpad Overview.

QM 2: Display Catalog

Exercise Display the catalog containing the inspection characteristics in the quality management.

Task Use the Fiori Launchpad to display the Catalog.

Time 10 min

To display an inspection characteristic, use in the *Quality Management* area in the *Warehouse Supervisor* role the Fiori App *Display Catalog*.

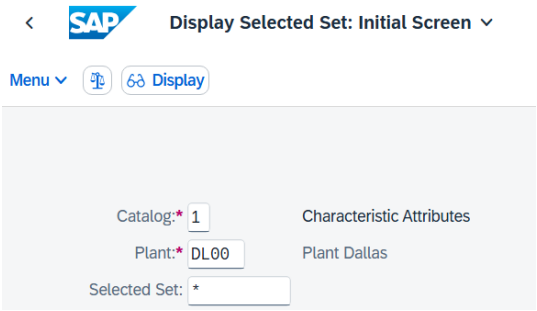

Start

In this case, the catalog of characteristic values is shown. It shows which values the inspection characteristic can have.

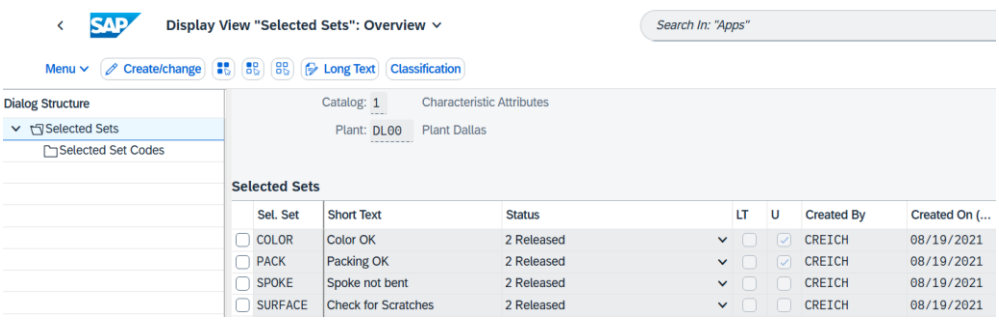

In the *Display Selected Set: Initial Screen* enter **1** as *Catalog*. Further choose the *Plant* **DL00**. Make sure ***** is entered as the Selected set.

1
DL00
*

Proceed with *Enter*.
